PATTULLO WILL NOT PAY VISIT TO EGYPT

William Turnbull Detained in
England Owing to Illness
of Wife.

VICTORIA, Sept. 12.—Word
received at the Department of
Lands intimates that Hon. T. D.
Pattullo, Minister of Lands, will
leave England about the 15th
inst. on his return home, elimi-
nating his proposed visit to
Egypt to investigate the possi-
bilities of that country as a
market for British Columbia
lumber. The Minister and F. C.
Wade, Agent-General for British
Columbia at London, have just
returned from a trip to Norway
and Sweden, where they investi-
gated water power development,
paper making and the manufac-
ture of fertilizers from nitro-
gen derived from the air, these
processes being studied with a
view to future possible develop-
ments along similar lines in this
Province. William Turnbull,
Lumber Commissioner, who went
to England with the Minister,
and contemplated visiting Egypt,
has been unable to do so, hav-
ing been detained in London
through the illness of his wife.

MITCHELL ALBERT INTERESTED IN MINE

So Says Current Issue of Om-
ineca Herald Just to Hand.

It is expected that the gold
property at Dorreen, formerly
owned by the late Louis Kubus,
an abandoned to the Fiddler Creek
Gold Mining Co., since defunct
will this fall be re-opened and
development continued all winter
says the Omineca Herald.

Last week W. G. Norrie-Low-
enthal was in Prince Rupert for
several days in consultation with
D. Tredway-Edmonton and M.
Albert of Vancouver and Rupert,
and as a result a new company
is being organized to carry on
the development. Mr. Tredway
has the controlling interest and
Mitchell Albert is closely as-
sociated with him. Mr. Norrie-
Lowenthal will be the engineer
in charge and as soon as the
finances are arranged he will
take a small crew of men down
and get things started.

The property is close to the
railway and connected with a
good wagon road. A lot of de-
velopment work has already been
done and the ore proven of good
grade. The plans of the new
company provides for the ex-
penditure of \$15,000 on devel-
opment which it is expected will
block out 20,000 tons of ore.
Then the grade of ore and the
system of treatment will be de-
cided and a plant installed.
