

All Canada Applauds VICTOR Bi-acoustic Radio

Listeners throughout the country are amazed by its startling improvement in

TONE

—richer by two full octaves of music—
music that no previous radio ever reproduced!

EVERYWHERE, from coast to coast, it has won the praise of musicians—music lovers—radio fans! Opened the eyes of thousands who thought that radio had reached its peak of perfection!

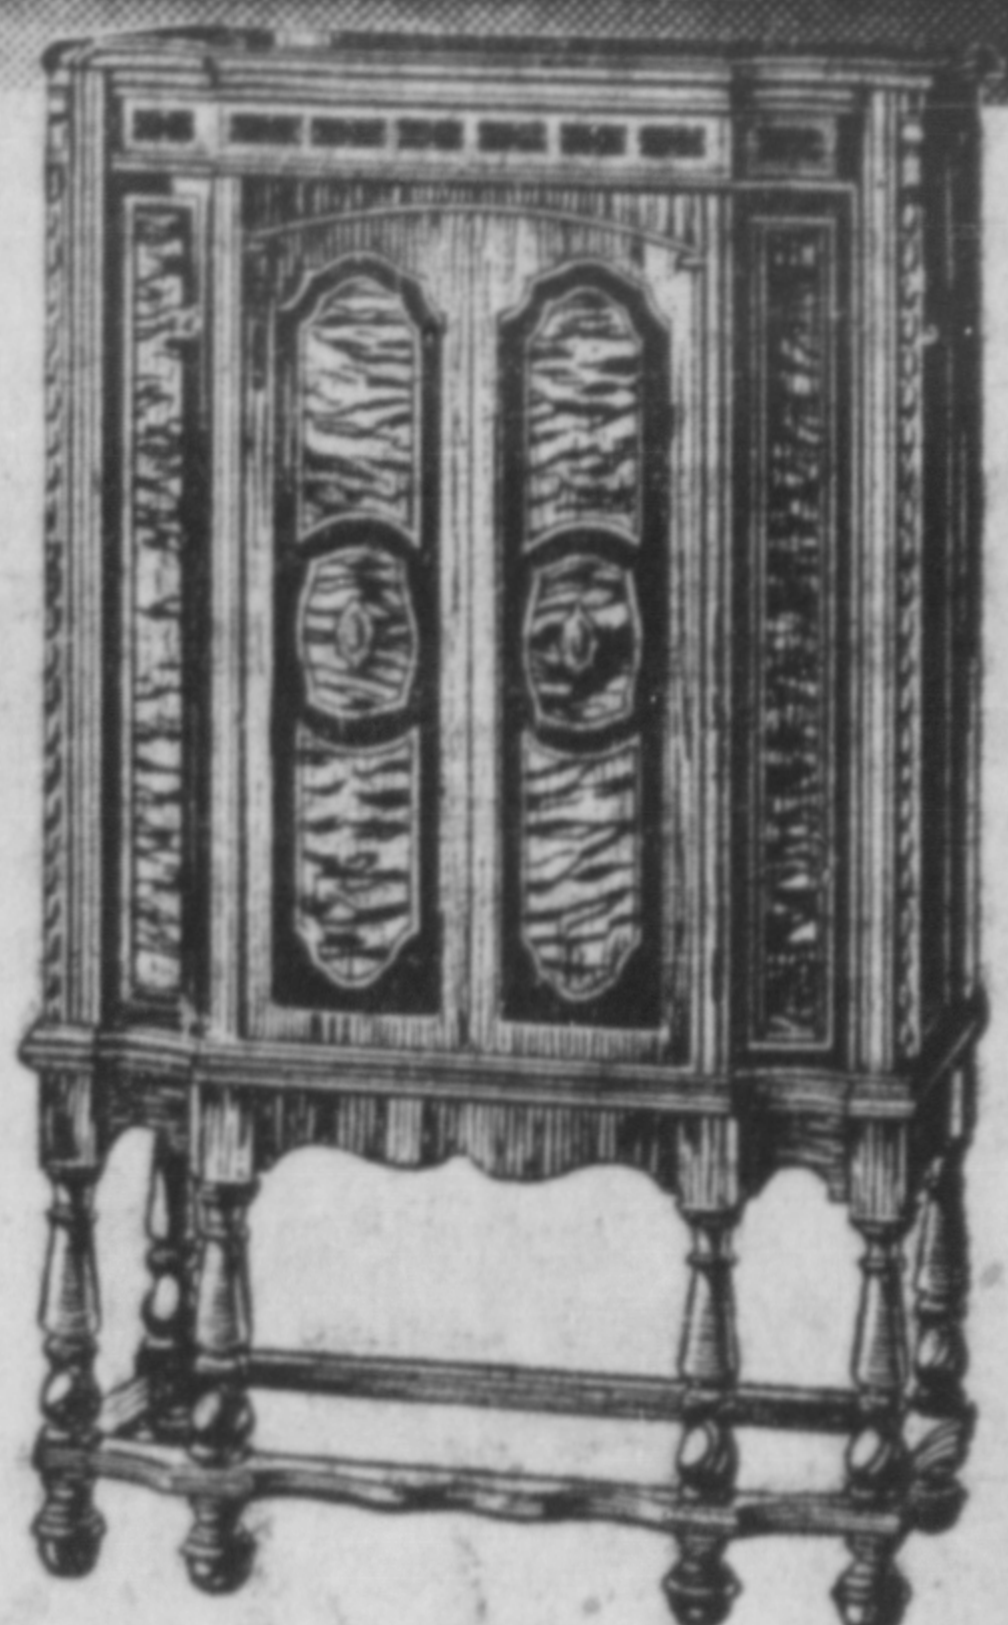

Victor Bi-acoustic Radio actually gets two more octaves of music than ordinary radios. Catches the feeling of the artist as well as the song! Puts a completely new thrill into orchestral pieces—dance bands—vocal programs—mystery dramas—sport broadcasts!

Victor Bi-acoustic Radio is a completely new circuit with eight great advances. "B" amplification doubles the power without distortion at any volume. Extended musical range reproduces all instruments from lowest to highest tones. Automatic tone compensators take out "tininess." Tone equalizers remove cabinet "boom."

Dual automatic volume control counteracts fading and ends between-station noises. Ten new-type tubes make possible more power, greater fidelity, smoother performance. New dynamic speaker handles all frequencies at all volumes. New cabinets are acoustically-tuned for finer, truer tone.

All these extra features give twice the power, twice the range, twice the tone quality to the most advanced basic circuit known—the famous Victor Super-Heterodyne.

Hear it. Judge it for yourself. Spend only five minutes in front of the new Victor Bi-acoustic Radio and realize how really wonderful radio can be. Victor dealers are now showing the 10-tube model illustrated at only \$149.00 complete. Easy terms.

VICTOR Bi-acoustic RADIO, Model R-56, complete with 10 tubes \$149.00

Other Victor models range in price from \$69.50 up
