**THIS IS ALL EMBRACING**

Often we get letters that seem to cover all the reasons why Pacific Milk has such a hold in the affections of the housewives of the West. Mrs. George Hardie, for instance, says: "I have tried fresh milk and almost every kind of canned milk. I must give Pacific Milk the preference because I can use it in everything and get better results than I ever got with anything else. I have made several converts among my friends by showing them what could be done with a can of good milk."

### BIG DROP IN MEAT PRICES

Beef Selling on Local Retail Market Much Lower.  
 Slashing of prices of beef in local butcher shops causes the chief change on this week's market report. The drop is from 5c to 20c a pound and in some cases reductions of fifty percent are noted. Prices of other lines of meat, with a few exceptions, remain firm.  
 There are a few drops in the vegetable lines and many summer fruits are off altogether.

turns out 45 tons of pulp per day and the sawmill 100,000 feet of lumber and 300,000 shingles. These mills work and produce on the 24 hour day basis. Three more pulp mills are planned for the district. The Prince Rupert Pulp and Paper Company's plant at Prince Rupert is to be in operation in 1923 turning out 40 tons of sulphite pulp per day. Surveys are now being made for a paper mill at Prince George with a capacity of 200 tons of newspaper daily. A mill is also projected for Gumsheva Inlet on the Queen Charlotte Islands.

### LUMBERING INDUSTRY IS MOVING TOWARDS NORTH OF PROVINCE

(Continued from Page one.)

### Temporary Depression.

There was great activity in timbering and lumber cutting up to the end of 1919 in the district especially on account of the war demands. In 1918 there was sufficient clear spruce from the Queen Charlottes to build 20,000 aeroplanes. During the past year a combination of reasons have caused a temporary depression in the business and of the 40 mills of the district, there are today operating only about ten. In the boom in prices of all commodities following the war, lumber was the first article to start climbing and the first to revert to normal. The peak was reached in February, 1920, and since that date the price has steadily declined. In the latter part of 1920 the Oriental and Australian demand dropped owing to financial conditions in those export markets, while economic conditions in the home market, along with the heavy increase in railroad-freight rates last September, retarded buying in Eastern Canada and on the prairies. This part of the province was hit hard along with every other part and the freight rates increase has militated against lumber from the Pacific coast on the Eastern market in favor of lumber from across the line which now has an advantage on account of the much shorter haul. The price of lumber has reached bottom now, but costs of operation have not gone down correspondingly so there is very little activity pending a general deflation of production costs. The lumbering business in this part will, doubtless, recover as quickly as anywhere. When conditions come to normal, the mills will reopen and the industry will make greater strides than ever before. The lumber business is but in its infancy and the field here presents one of the greatest in the world.
