G. H. ARNOLD, Notary Public

FIRE INSURANCE is a hobby of ours. We take keen pleasure in making sure that all policies are so written that they cover your property exactly as you intend. If you entrust your fire insurance to careless, inexperienced or ignorant agents you may find, when you come to collect your fire loss, that your policies are so worded that the insurance company is not liable and so will not pay the loss. Why take chances?

BRITAIN IS STILL SUPREME

Her Plans for Naval Disarmament More Ideal Than Other Nations.

WASHINGTON, Dec. 23.—The latest available statistics on the naval strength of the powers indicate that while Britain is undoubtedly in a position still to "rule the waves," her future plans are more in line with the ideals for which the conference is striving than are those of any of the other big powers represented at Washington.

The competitive fighting strength of the navies in total number of ships and total tonnage is:

Great Britain, 533 ships, 1,860,180 tons; United States, 464 ships, 1,289,463 tons; Japan, 99 ships, 528,689 tons; France, 138 ships, 462,356 tons; Italy, 86 ships, 275,622 tons.

The figures include fighting ships of all classes, from battleships to submarines and aircraft carriers. The building programs in the same terms are:

Great Britain, 12 ships, 39,380 tons, and four additional battle cruisers aggregating 160,000 tons planned but not yet laid down; United States, 69 ships, 734,928 tons; Japan, 85 ships, 805,188 tons; France, 34 ships, 94,230 tons; Italy, 21 ships, 19,928 tons.

In broadside strength of capital ships of the first line now afloat, which means the number of guns of 12-inch bore and up, the figures for the three leading powers are: Great Britain, 288 guns; United States, 196 guns; Japan, 96 guns. This existing gun power strength is carried in the following groups of capital ships: Great Britain, 26 first line battleships and six first line battle cruisers; United States, 18 first line battleships; Japan, six first line battleships and four first line battle cruisers. The tonnage figures for these ships are: Great Britain, 811,950; United States, 568,650; Japan, 288,320.

AMERICAN ARCHITECTS EXHIBIT AT LONDON

Three Hundred Photographs and Drawings Interesting Display at Paris Salon.

LONDON, Dec. 24—A prominent feature of the Paris Salon during the summer was the exhibition of three hundred photographs and drawings of the best American architecture of the past ten or fifteen years. These works were brought to London and put on view to the public free of charge at the Royal Institute of British Architects.

All the most famous American architects are represented—Cram, Bertram Goodhue, Paul Cret, Cass Gilbert, and the firm of McKim, Mead and White. Amongst the exhibits are the Temple of Scottish Rite at Washington, a monumental building in the classic style; the California Exposition buildings; various business buildings of the skyscraper type in New York; and several fine examples of domestic architecture, in which department American architects are wonderfully good.

Advertising is often expensive, but it is nothing like as expensive as an empty store and idle clerk.
