KETCHIKAN RENEWS EFFORTS TO SECURE FISHING BUSINESS

(Continued from Page one).

the farsightedness of the Canadians, the latter use it to build up their towns, their citizenship their fleet, while Alaska drops backward.

"Figures recently published by the Prince Rupert Board of Trade, prepared by themselves and spread broadcast, boasted that in 1920, upwards of $5,000,000 was paid the fishermen alone. The facts were available for them and undoubtedly are correct. This sum did not represent all, however, for it is safe to estimate that if they spent five millions for the fish, that they must have circulated other hundreds of thousands of dollars for boxes, handling, boxing, icing, and the like. In other words the payroll in Prince Rupert from its fresh fish business amounted to more than a half a million dollars a month, alone sufficient to support a population of consequence.

"That amount of money paid for fresh fish for the fresh fish market was much greater than paid at all the Alaskan and Puget Sound ports put together. This money goes not to big companies or corporations, but directly to the fishermen, the poor man, the family man.

Previous Attempt.

"In 1916, when it was realized that Prince Rupert was getting the greater portion of the fresh fish business which rightfully belonged to America, through furnishing special facilities, and inducements, official Washington awakened. An amendment was inserted in the revenue bill which read:

"That from and after ninety days after the passage of this act no fresh or frozen halibut or salmon from the North Pacific ocean or its tributary waters shall be admitted into the United States through any country, except when the same shall be in bond from an American port."

"That measure had the support of the department of Commerce. William C. Redfield, then secretary, in letters to President Wilson, endorsed it heartily. The President endorsed it. The Bureau of Fisheries endorsed it. The State Department approved it. The committee reported it unanimously and the Senate passed it unanimously.

Retaliatory Measures.

"Canada, realizing the importance of the thing, sent some of its most able men to Washington to fight it. Even the British ambassador himself took a hand, writing the State Department and openly threatening retaliatory measures if it was passed.

"It came up in the House and through one of those freaks of American legislative procedure, required unanimous consent for its consideration. Practically every Republican as well as Democrat was for it, but then up stepped Congressman Gardner of Massachusetts and offered objection. He alone in a Congress of 531 members had the power to, and did kill this measure which was so unanimously approved.

Effort Died.

"Efforts to have it restored in conference failed and it died. Since that time nothing has been done to check the growth of the industry as Canadian, and it has flourished.

"At that time, however, when it appeared that the amendment was going to become law, the buyers of fresh fish at Prince Rupert were preparing to establish on American soil and would have done so and would be doing business in Alaskan ports today if it had become law.

"Prior to the time Prince Rupert became the fish market of the Pacific, there were many fine American fishing vessels. The fleet was a source of rightful American pride. Since America permitted it to slip, and because of the Canadian Orders in Council, the greater part of this fleet has gone out of the fresh fish business or has been compelled to transfer from American to Canadian register and is today flying the British flag. While five or six years ago the American fishing fleet of the North Pacific included many splendidly built and equipped steamers today there is but one steamer engaged in this business and she is manned by a crew from a Canadian port.

Becoming Canadian.

"Masters, sailors and fishermen who were Americans or who would be are now Canadian citizens. Their children are growing up as Canadians. Their homes were and are being built of Canadian soil while the population of Alaska in the same period has been dwindling.

"Although Prince Rupert has an economic advantage of being the terminus of the railroad direct to the markets of the east that fact is of little consequence. The principal source of revenue to that railroad on eastbound freight is its fresh fish business. If America insisted on having the business done on the American side but thirty odd miles distance from its terminus that railroad would reach out for it, car ferry services would be running to Alaskan ports to connect and the fish would be reaching the ultimate consumer just as quickly, just as directly and just as cheaply as at present.

Price of Fish.

"One of the remarkable and appealing features of the proposed tariff on fresh fish is that it would not raise the price to the consumer, nor cut it for the producer. For, the fish, produced in American waters, instead of being permitted to be handled through a foreign port, would be handled in Alaskan territory, and going through in bond there would be no tariff or duty of any kind.

"Erroneously, when the matter of excluding fresh fish from foreign ports was discussed in 1916, it was urged that such action would mean that the fishermen would be at the mercy of the American markets, not having the competitive buyers of Prince Rupert. This would not be true for the reason that every buyer who is now doing business in the Canadian city, or virtually everyone, would come to an Alaskan port to do business, and would be as much a competitor then as now.

"If Congress and the administration wants to do something really worth while for Alaska, something which will start immediately and without cost to anyone let it put through this proposed amendment to the tariff bill."

Make Up Your Mind to preserve your health—your best asset for making life successful. Good digestion is all-important. The best way to insure it is

To Take Beecham's Pills. When the digestive organs fail, nutrition is interfered with; blood is tainted, nerves suffer, headaches and minor ailments multiply. A reliable cleansing, corrective agent that acts quickly and with highly satisfactory results is

ALBERTA CROPS ABOVE AVERAGE

Conditions in Central Part of Province Indicate Plenty of Rain.

EDMONTON, July 22.—Crop conditions throughout central Alberta are very favorable and the indications are that the crop will be well above the average in yield. There has been plenty of rain in most districts during the past two weeks for all growth requirements and some of the early sown wheat that was somewhat injured by the dry weather during June has, for the most part, fully recovered. The late wheat, however, it is expected, will be the best. In most districts the wheat is fully headed out. The oats and barley is also heading out and the prospects are for a good yield.

The potato crop is reported to be one of the best in years, and all of the garden crops are also making splendid progress. Up to the present there has been no reports of damage from rust, or grasshoppers.

PREPARING FOR PASSION PLAY

Famous Drama to Be Enacted Next Year at Oberammergau.

OBERAMMAGAU, Bavaria, July 23.—Thirty performances of the Passion Play have been scheduled for 1922 by the committee of 21 which is directing the spectacle, but this number will be increased if the attendance demands, as was the case both in 1900 and 1910.

It will require an outlay of 1,500,000 marks to stage the Oberammergau play and the villagers are extremely anxious about the German political situation, lest conditions be such that foreigners will not attend.

The 350 burghers, who constitute the descendants of the original peasants who made the vow to produce the play decennially, personally assume the responsibility for this expenditure, and the failure to attract sufficient visitors to meet the cost would result in the bankruptcy of practically the entire village as the Oberammergau folk have slight resources.

Most of the burghers are wood carvers, potters, painters, sculptors, farmers, merchants and small shopkeepers. Only the descendants of the villagers who were saved from the plague in 1635 take part in the Passion Play and assume responsibility for its production.

Choose Players October.

Next October will be a fateful month for then the names of the villagers who are to have the leading roles in the spectacle will be announced.

To be selected to enact the role of Jesus Christ or one of the apostles is a far greater honor to an Oberammergau man than election to the presidency of Germany or any other office within the gift of the entire German people.

And any woman of Oberammergau would far rather be chosen to play the role of Mary or Martha or Mary Magdalene than to be in the position of Frau Ebert as mistress of the President's palace in Berlin.

Same Jesus Christ.

Many of the actors in the Passion Play next year will doubtless be the same as those in the cast when the play was last produced in 1910. Anton Lang, who enacted the role of Jesus Christ in 1900 and 1910, will probably be chosen for the part again, as he is still young enough to untakee the arduous task and looks the part so well that younger aspirants are not likely to displace him.

Ottilie Zwink, who played the role of Mary in 1910, has married since that time. No married woman can play a role. Consequently all the young women of Oberammergau with ability and experience as actors are eagerly trying to qualify for the highly important part. Paula Rendl, daughter of Peter Rendl, the sculptor, who was Joseph of Arimathea in the play of 1910 and enacted the role of St. John 21 years ago, is one of the most promising candidates for the role of Mary. Fraulein Rendl has shown great ability in minor religious plays which are produced for the Passion Play.

Marie Mayr, who played the role of Mary Magdalene in the 1910 production, has also married and is living in Chicago. Marie Schmid, who was the Veronica in the last production has also married.

Many Died During War.

Eighty-two of the Oberammergau men died during the war and many of the older actors of the last production will be disqualified by age for important roles. Consequently there are scores of places in the cast to which young men with ability as actors may aspire. They have begun to let their hair grow. Wigs and makeup are not permitted by the directors of the Passion Play.

Practically all the older men who had important parts in the last production have never cut their hair. Many of them have retained their long beards and pride themselves on their resemblance to the biblical characters they have depicted.

Miss Florrie Burritt was a successful candidate in first year harmony and senior rudiments at the recent Toronto Conservatory of Music examinations. This young lady was the only candidate to take this examination.
