DAILY EDITION

MONDAY, OCTOBER 30, 1922.

Movies and Movie People

Devoted to the doings and sayings of those who entertain the public.

WEEK AT THEATRES
 Monday and Tuesday.
 "Tom Mix in "Sky High".
 Sunshine Comedy "His Noisy Still".
 Wednesday and Thursday.
 Neil Shipman in "The Girl from God's Country."
 Friday and Saturday.
 Miss Lois Wilson, Milton Sills, Theodore Roberts and Helen Ferguson in a William de Mille production "Miss Lulu Bett."

**DE MILLE PICTURE
HERE AT WEEK END**

Lois Wilson is Star in "Miss Lulu Bett" Which Will be Seen Friday.

Lois Wilson, the dainty Paramount actress, is a home-wrecker in William de Mille's latest Paramount production, "Miss Lulu Bett," which comes to the Westholme Theatre, Friday, that is to say, she smashes furniture, and dishes and plays havoc with the appointments of a kitchen in which she has drudged for years, merely to give vent to her feelings.

In the story, Miss Wilson is a spinster who lives in the home of her sister and brother-in-law as a sort of servant. She takes part in a mock marriage ceremony to discover that she is not only married, but that her husband already has a wife. Then her troubles begin. Neil Corrish, a teacher loves her and driven to desperation by her brother-in-law's conduct, she wrecks the furniture and leaves her home forever, eventually to find peace and happiness with her sweetheart. Milton Sills is the leading man and others in the cast are Theodore Roberts, Helen Ferguson, Mabel Van Buren and Clarence Burton.

Nell Shipman is a Canadian girl from British Columbia but she has reached a pivotal point in the movie world. She is a star among the stars. Her picture this week "A Girl from God's Country" is said to be an excellent one and should be seen by all Canadians.

"Sky High" is on tonight at the Westholme. It must be a tiptopper judging by its name.

"Trapped by the Mormons" is making quite a stir in Canada and thousands have been flocking to see the picture in Montreal. The story deals with the secret polygamous activities of the Mormons of Utah and is an exposure of the methods said to be used in persuading women and children to join them.

Mary Pickford recently remade the picture that made her. There is gratitude! "Tess of the Storm Country," on which she has been working this past summer in Southern California is said to be the "crowning achievement of Mary Pickford's career." It is not often that an actress has made the same picture twice. This picture was made several years ago and in it the queen of the movies first caused a furore. Yet she was not satisfied. She spent the whole summer remaking it, and movie fans

will wait anxiously for an opportunity to see the work.

"Notoriety" is one of the sensational new pictures.

The two boys Jackie Coogan and Wesley Barry are full-fledged movie stars. Jackie has been the hero in Oliver Twist and Wesley in "Rags to Riches."

Constance Talmadge as Ming Toy, a Chinese girl, in East is West, is proving very popular.

Mack Sennett has a great Dane dog that he rents to movie producers at \$250 a week. Now don't everybody try to rent their dogs. There are only a few like Teddy.

"Public Benefactors" Those who contribute towards the destruction of these pests must be regarded as public benefactors, but, gentlemen, it requires the expenditure of money to do the work, and this brings me directly to the kernel of my subject.

"In the first place, do not rush to the conclusion that I am here to ask for anything for my company. I have no such intention. I am here to tell you that it is beyond the resources of any individual or company or group of persons to adequately develop this fishery, for if will become a fishery. It is a community matter and must be undertaken, in part, by the custodian of our fisheries, the Dominion Government.

"Any reduction plant operating in this province is competing for business in a very close market, and the larger the output of the plant the keener the competition, for the reason that difficulty is generally experienced in finding ready buyers for large lots of goods, and the placing of such large lots upon the market always has a tendency to sag the market.

Market Limited

"Our market in Canada is extremely limited at the present time, for the consumer has not awakened to the advantages of utilizing our products as stock feed and fertilizer, but this market will grow in proportion to the knowledge which is disseminated regarding the use of these commodities.

"Our market for oil is in the state of New Jersey, away on the Atlantic coast, in direct competition with the Menhaden and other well established oil supplies. In this case we face a transcontinental freight rate of \$4.05 per

**ASKS BOUNTY
ON DOG FISH**

George Bushby Addresses Council of Board of Trade on Subject

ARE VERY DESTRUCTIVE

Prior to Passing Resolution Matter is Discussed at Meeting

Prior to the passing of the resolution asking the Dominion Government to grant a bounty on dog fish, George Bushby addressed the Board of Trade at length on the subject and there was considerable discussion and a good many questions were asked the speaker. Mr. Bushby said:

"I presume that you all are aware of the nature of the plant which I am operating, and that you realize the usefulness of such a plant as a complement to the fishing industry, providing, as it does, the means of disposal of the waste which is inevitable in the fishing business, and in the disposal of that waste the Reduction Plant converts it into most useful and valuable products, namely, edible fish meal, suitable for supplying the protein element in the feed of domestic livestock such as poultry, swine and cattle, fertilizer, for the enrichment of the soil, especially as regards fruit and vegetable cultivation, and oil, indispensable in the tanning industry and also used in the soap and paint manufacture as well as in other branches of the arts and crafts.

Continuous Operation

"You will readily understand that, in order to make such a plant remunerative, it must be kept in practically continuous operation during the entire year, for when the steam cookers and dryers are allowed to cool considerable loss ensues. Under present circumstances the plant here operates under the disadvantage that when the salmon canning season closes the plant has only the waste from the halibut fishery to depend upon for raw material, a very insufficient supply in proportion to the capacity of the plant to absorb raw material. The management, therefore, has been casting about to avail itself of a steady and ample supply of raw material, and has, logically turned its attention to the most ready and available source, shark and dogfish.

"These fish abound in the waters adjacent to Prince Rupert and in all our British Columbia waters and upon the Atlantic coast, and wherever they exist they prey upon the fisheries, destroying vast quantities of edible fish and cause much damage to fishing gear.

Public Benefactors

"Those who contribute towards the destruction of these pests must be regarded as public benefactors, but, gentlemen, it requires the expenditure of money to do the work, and this brings me directly to the kernel of my subject.

"In the first place, do not rush to the conclusion that I am here to ask for anything for my company. I have no such intention. I am here to tell you that it is beyond the resources of any individual or company or group of persons to adequately develop this fishery, for if will become a fishery. It is a community matter and must be undertaken, in part, by the custodian of our fisheries, the Dominion Government.

"Any reduction plant operating in this province is competing for business in a very close market, and the larger the output of the plant the keener the competition, for the reason that difficulty is generally experienced in finding ready buyers for large lots of goods, and the placing of such large lots upon the market always has a tendency to sag the market.

Market Limited

"Our market in Canada is extremely limited at the present time, for the consumer has not awakened to the advantages of utilizing our products as stock feed and fertilizer, but this market will grow in proportion to the knowledge which is disseminated regarding the use of these commodities.

"Our market for oil is in the state of New Jersey, away on the Atlantic coast, in direct competition with the Menhaden and other well established oil supplies. In this case we face a transcontinental freight rate of \$4.05 per

"I Can Now Do My Work Without Feeling Tired"

Mrs. A. Moffatt, Roxton Falls, Que., writes:

"I suffered from a run-down system and nervous debility. I could not sleep or rest at night, and felt so weak I could not walk any distance. I took several tonics, but they only helped me while I was taking them. Mother advised me to take Dr. Chase's Nerve Food, and I felt great benefit from the first box, and continued taking several boxes. Today I feel like a new woman, and am able to do my work without that dreadful tired feeling."

duty of 20 per cent ad valorem, cd into the local circulation and face keen competition into through these sales. We export

material at a price which will enable us to operate at a profit. We can-

not pay a large price for raw ma-

terial, we should not pay any-

thing for it at all, and make a

profit after paying cost of man-

ufacture, overhead, handling

charges, transportation and duty.

If we cannot operate at a profit

it would be foolish to operate at

all upon a large scale, but we

would cut down our staff to a

minimum and content ourselves

with taking care of the waste from

the halibut fishery during the

winter.

"Such a proceeding would not pay anybody, if carried out. We would buy very little fuel, little foodstuff, few supplies of any kind, would maintain possibly four men on the payroll, would be of very little benefit to the community, in fact we would just rust out in a comfortable manner for want of some reasonable means of utilizing the superabundant supplies of raw material.

"Swimming about at our very doors, carrying on their nefarious occupation of fish destroy-
