RECENT INVENTION IN PROPELLING LIFEBOAT

Newly Approved Device Avoids
 Danger From Oars Becoming
 Brittle and Useless

Among the many recent inventions concerned with life saving at sea, one of the most interesting is a new form of mechanism for propelling a lifeboat. Case after case has happened where lifeboats have been launched and the oars, owing to long exposure to sun and air, have become brittle and have broken almost at the first stroke. Further, oars are exceedingly difficult things to bring into action under the usual conditions in which lifeboats are launched.

The new invention consists of a very simple form of hand propelling gear operated by six levers, arranged three on each side of the boat. The lower end of each lever is connected with rods and cranks, so that when the levers are moved backwards and forwards a screw is propelled. The screw can be reversed by the helmsman without affecting the movement of the levers in any way.

If necessary, ropes can be fixed to the top of the levers so that several persons may take part in the work of propulsion. The same inventor has devised a collapsible hood which protects the occupants of the boat against all weathers.

Both of these devices have been officially approved by the British Board of Trade, which allows a reduction of fifty per cent on the usual oars required under the life saving appliances rules.

DELIGHTFUL TEA WAS GIVEN YESTERDAY BY QUEEN MARY CHAPTER

Mrs. Henning Won Luncheon Set
 Presented by Mrs. F. G.
 Dawson

The tea held at the home of Mrs. J. C. McLennan, "The Cedars," Borden Street, yesterday afternoon by Queen Mary Chapter, Imperial Order Daughters of the Empire, was a very pleasant and successful affair and was enjoyed by a large number of ladies who called. The home was beautifully decorated with seasonal adornments.

The draw for the luncheon set presented by Mrs. F. G. Dawson resulted in Mrs. Henning being declared the winner.

Mrs. McLennan was hostess and was assisted by Mrs. S. P. McMorris and Mrs. D. McD. Hunter. Those serving were Mrs. S. Darton, Mrs. R. Blane, Mrs. William Miller, Mrs. W. S. Fisher, Mrs. D. C. Stuart, Mrs. W. H. Wilson Murray, Mrs. J. H. McMillin, Mrs. George Wilson, Mrs. J. R. Gritins and Mrs. David Thomson.

REAL DEVELOPMENT WORK DONE ON ALICE ARM MIN- ING PROPERTIES IN 1922 PROVED VALUE OF DIS- TRICT.

(continued from page one)

Muskelee, Moose, Vanguard, Homestake and Matilda groups of claims. The Torie, Muskelee and Moose properties are in a position to ship were transportation conditions favorable. The Homestake, Vanguard, and Matilda group of claims lie in the "Copper Belt" of the upper Kit-sault. No work has been done on the Homestake this year; the syndicate having it under option have met their payments. Quite a lot of work was done on the Matilda group during the past season. Much good ore was shown up.

Coming down to the head of Alice Arm, assessment work kept up and development work done on the claims located on McGraw mountain. The Horse Shoe group is under option and will be opened up in the spring. Further development work was done on the Standard group of zinc claims. A tunnel was driven for fifty feet to tap the surface lead. This property would indicate a large zinc tonnage, the surface lead showing sixty feet in width with 10 per cent ore. The usual amount of work was done on the silver-lead properties on the east side of Alice Arm. The G. Morley group of claims is under option to Seattle capital and will be developed during the coming year. The Lynx group of claims on Line creek was further proved by the driving of a fifty foot tunnel. This property consists of a large mineralized area of molybdenite ore. The tunnel encountered the characteristic mineralized ore all the way.

Illiance River
 Nothing further than assessment work was done on the claims of the Illiance river property this year. Last year the A. A. Holding Co. did a large amount of work on their Bellevue property, and Bone and Hodgson had a small crew of men on both the Silver Star and Monarch claims. There was no further work done on the Bellevue this year, while Bone and Hodgson have since allowed their option to lapse. This district was examined during the past season by Dr. Hanson of the Dominion Survey.

Very few new prospects of commercial importance were recorded this year. Angus McLeod opened up the basin group on East creek this year. This property has a nice surface showing and can be traced for a considerable distance. It is a copper lead with good gold and silver values. Rod Campbell struck a high grade zinc lead on the West creek late in the season, but not enough work was done on it to estimate its importance.

Good Roads and Trails

In passing it would not be out of order to note the roads and trails of the district. There is an excellent pack trail leading from tide water to the upper reaches of the Illiance. This road is extensively corduroyed and on a better grade than the usual log. A pack trail taps the North East Fork as well as Line and Roundy creeks.

 CONTROLLED & OPERATED BY IMPERIAL TOBACCO CO. OF CANADA LIMITED

From the end of steel at the Dolly a trunk pack trail extends up the valley as far as Clear Water creek. From there a trail taps the "Copper Belt" country, also, branch lines extend up Clear Water and Trout creeks. A new piece of road of direct benefit to the upper Kitsault country was begun and partly completed during the past season. This road leaves the railway grade at the Dolly Varden, crosses to the east side of the canyon on a 16 foot cable suspension bridge, and runs up the east side of the canyon for 4000 feet, joining up with the grade north of the proposed railway crossing. This change removes any danger from snow or rock slides in winter traffic.

In closing this resume and making into consideration the number and extent of the developed properties, it is evident that the district possesses great potential possibilities.
