Well Pleased With Report of Delegates.

Most of the people of Prince Rupert feel well pleased with the report of the delegates to Ottawa, and the more they think about it the more impressed they are with the value of the work done by the delegation and the optimism of the reports received.

Naturally the reports are guarded. There is nothing of that recklessness that sometimes constitutes the reports of delegates. They state the case exactly as it is without any exaggeration. The fact that the delegates themselves are pleased with the outlook is most encouraging. As one man expressed it on the street yesterday, it looks as if a new era was about to open up for this city an era of progress.

Development of Railway

Is Chief Problem. The development of the G. T. P. is the most important thing that can happen to Prince Rupert, for the development of the

railway means the development of the port. If the railway languishes the port will suffer. If we all get behind the railway and aid it all we can we shall be aiding ourselves. Co-operation is as necessary here as elsewhere. The difficulty in the past is that we have not had the co-operation from the railway which we have a right to expect. Now things are changing and we are looking amidst glorious weather, many forward to a better condition.

Do Our Utilities

Pay Well or Not? Citizens want to know if the utilities are paying well. If Communion was celebrated at 8 for grade or curvature. they are they have a right to know it. According to the figures a.m. and 9 p.m. and a fully quoted last night by Alderman Perry there is a difference of opinion in the city hall as to what the standing is. In view of this, it looks as if the auditor should be asked to make a public statement showing where the discrepancy occurs so that the citizens, who are the shareholders in the concern, may know what it all means. If there is a profit of \$30,000 a year from light and Handel's "Messiah" by Mr. power, it means that the large users of light and power have been robbed to pay the taxes of the other citizens. They should pay their share with a slight margin of profit for safety, but there is the Power of His Resurrection." country. no reason in the world why extortionate rates should be charged

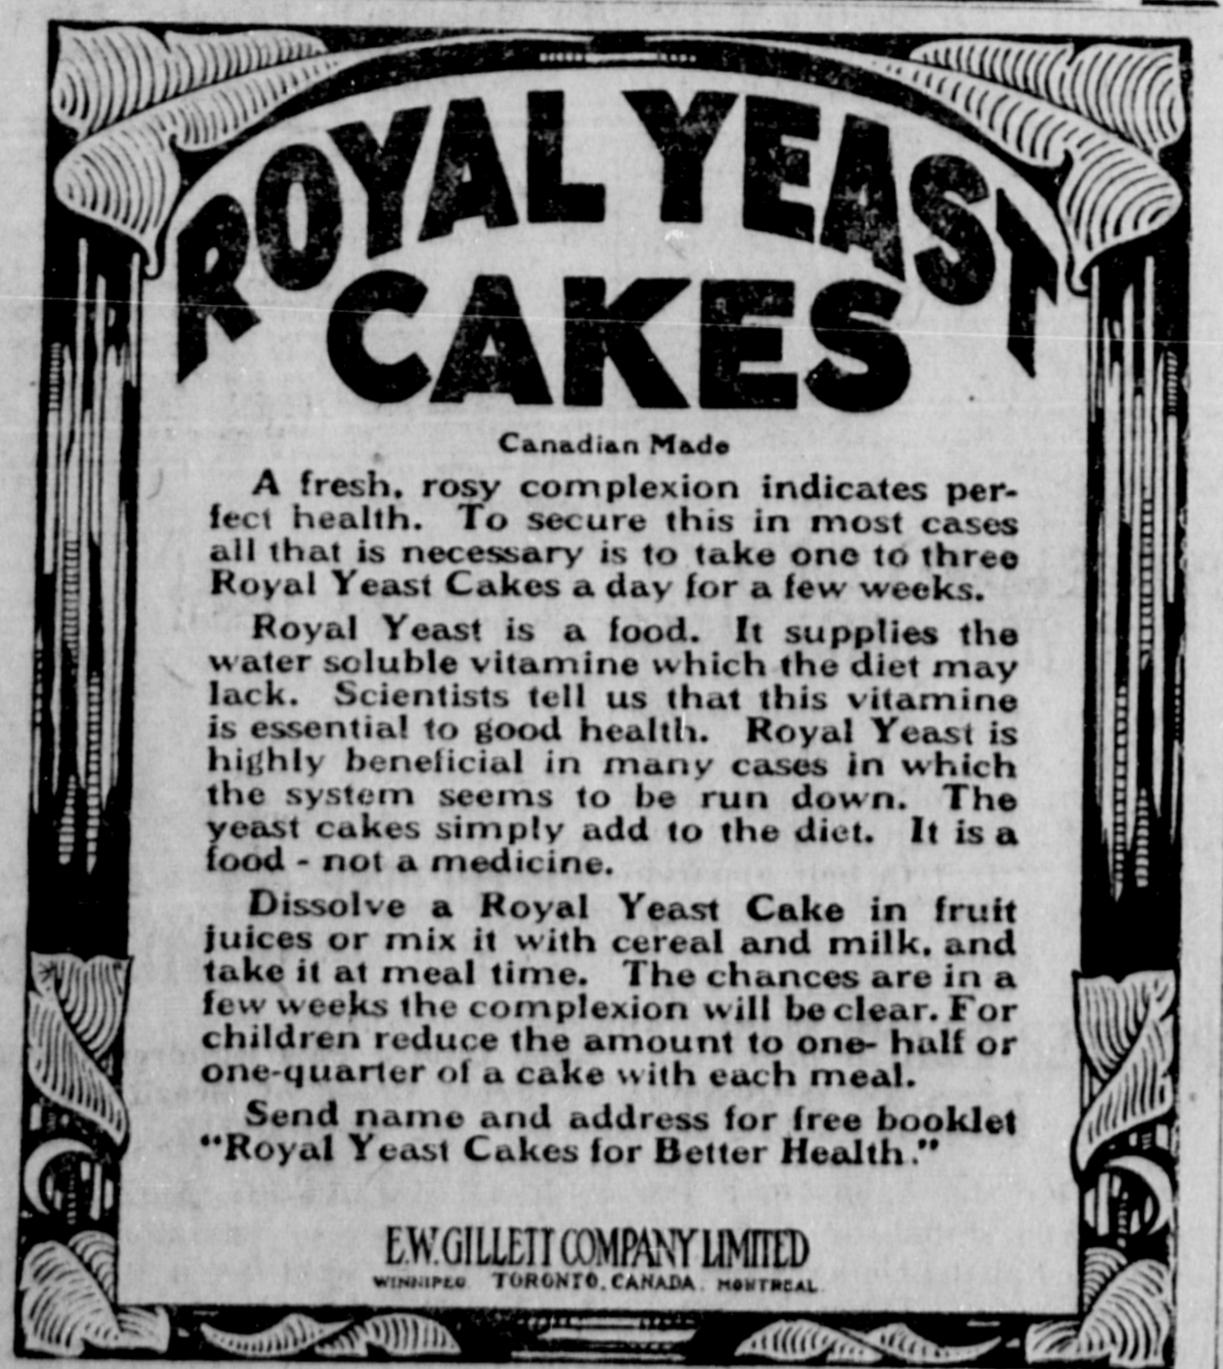

in order that the mill rate may be reduced. We have no information to indicate who is right, but we do which was fully choral. There know that citizens are uneasy over the situation and want to was an evening service at 7:30. over the freight rates. British Lyons, Marseilles, Cannes, Nice, know whether the rates paid are as much too high as the one set The subject of the addresses of of figures would indicate.

There is often too much of a tendency in the conduct of city affairs to forget that the citizens are the shareholders in the business and that they should be kept informed of all the activities and especially on matters of finance.

Much Interest in Genoa Conference.

Owing to the reports coming through on the telegraph and published, the people everywhere in Canada are intensely interested in the Genoa Conference. Very quick service is given in regard to any of these important movements. News is sent out and reaches the farthest points in a very short time. The signing

of the Russo-German treaty is the trouble just now, but what will he the outcome it is impossible to tell.
