Zam-Buk WONDERFUL in PILES

Mr. WILFRED AMEY, 42, Lyell Avenue, TORONTO, writes: "On active service with the R.F.C. I contracted piles *through sleeping on damp ground.* Treatment by the M.O. brought no relief and various "pile remedies" I tried proved equally hopeless. Shortly after my discharge from the service a friend strongly advised me to get Zam-Buk. One box of the balm brought such benefit that I determined to continue the treatment. In a few weeks Zam-Buk caused the piles to completely disappear. All other sufferers should know of this wonderful herbal healer."

Use ZAM-BUK for all your Skin Troubles.

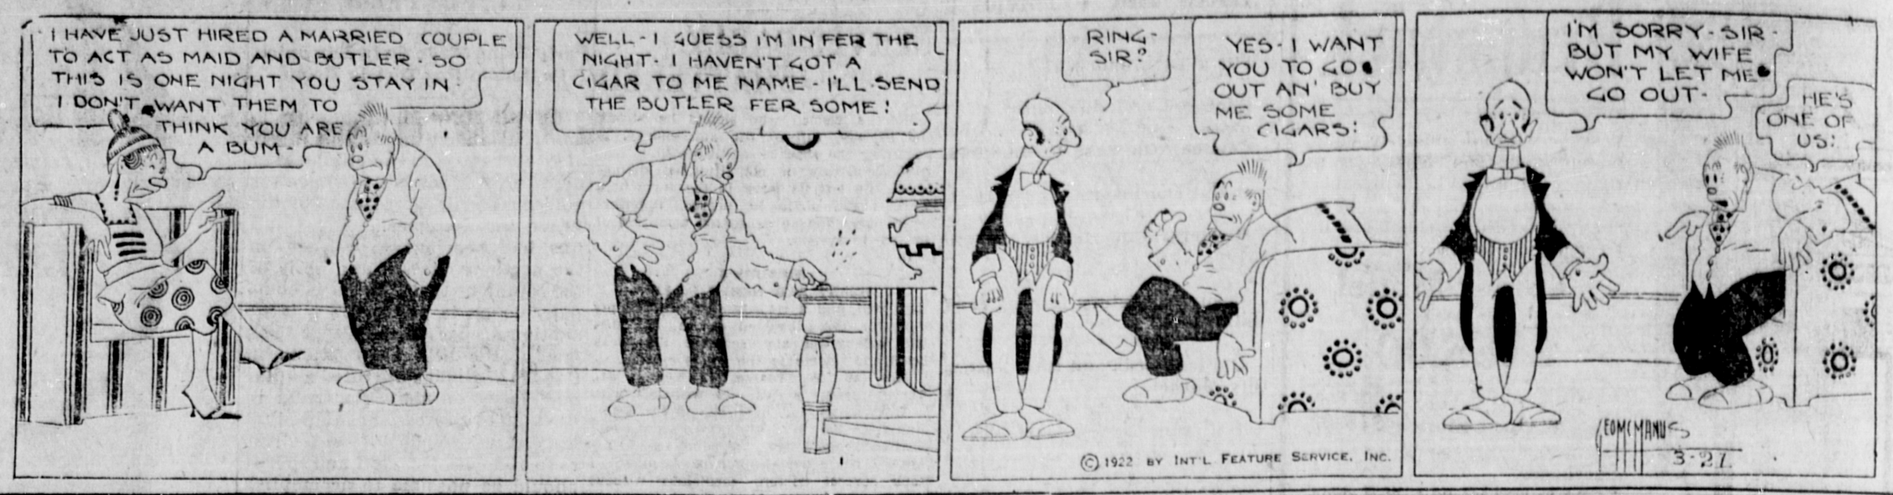
BRINGING UP FATHER

By George McManus



PORTLAND CANAL MINE DISTRICT

Described by Expert of United States Geological Survey.

Portland Canal, a steep-walled fiord, penetrates the Coast Range for some 90 miles from Dixon Entrance, at the southern boundary of Alaska, cutting obliquely across the trend of the mountains, writes Lewis G. Westgate of the United States Geological Survey. This great trench through the mountains is extended northward by the alluvium-floored valley of Bear River, which reaches far back into the upland beyond the Coast Range. At two miles from its head Portland Canal is joined on the west by Salmon River, the mineral deposits of whose basin are separated by the Reverdy Mountains, a southward-trending spur of the main range. At the seaward end of this spur is the settlement of Hyder, which has a population of a few hundred people and is the ocean port, supply point, and post office of the Salmon River district. Its location is on the international boundary, and the steep slope immediately to the north has crowded the settlement onto the tidal flats, where it is in part built on piles. The newer part of the town, however, is in a better location to the northwest, on the gravel-floored Salmon River valley.

Two miles to the northwest is the town of Stewart, on the British Columbia side of the boundary. Though older than Hyder, it has about the same population.

Canadian Side.

Metal-bearing lodes, chiefly of gold and silver, were found in the Canadian portion of this region about 1898, and similar discoveries had been made on the Alaska side of the boundary by 1901. These deposits received little attention until 1909, when a small boom was started in the Canadian district. This boom subsided in a few years, but meanwhile the town of Stewart and some 12 miles of railroad were built. Interest was revived in 1917 by the discovery of some rich silver ores on the Canadian side of the line, and in 1918 a commercial ore body was found at the Premier mine, which though in the Salmon River basin, is also in Canada. As a result, many claims were staked on both sides of the boundary, and the town of Hyder sprang up. The upper part of the Salmon River basin lies in Canada, but its only practical access is through Alaska.

Hyder's Importance.

This lack of adjustment of the international boundary to the topography gives Hyder a much greater importance than it would have if it served only the Alaska portion of the district. Though no mines have been largely developed on the Alaska side, many claims have been staked, and on some of these, as will be shown, considerable work has been done during the last two years.

In view of the fact that the geologic features on the two sides of the boundary were known to be essentially the same, there appeared to be good hope that commercial ore bodies might be found in the Salmon River district. For this reason the writer undertook a geologic examination of the region, a task which occupied him from July 19 to August 17, 1920. Though the salient feautures of the geology are simple, the heavy vegetal cover below timber line greatly enhances the difficulties of field examination and increases the work of the prospector.

SANTAL CAPSULES MIDY — Easy to Take-Quick to Relieve CATARRH of the BLADDER Safe, Successful. Each Capsule bears name (MIDY). Beware of counterfeits

Topography.

The region is one of mountainous topography and high relief. The floor of Salmon River and of its principal tributary, Texas Creek, rises from sea level to about 500 feet where they issue from their glacial sources. From these low valley altitudes the mountains rise steeply and in places by unscalable cliffs to heights between 5000 and 6000 feet. The highest points within the area examined are a little over 6,500 feet above the sea. The only level land in the district consists of the gravel floored bottoms along Salmon River and Texas Creek. The lower slopes, up to 3,000 feet or more, are covered with forest; at higher levels the mountains, where not covered by snow fields and glaciers, are largely bare rock. Even the narrower ridges along Portland Canal and the lower parts of Salmon River carry snow fields and small summit and cliff glaciers, and farther inland the larger valleys reach above snow line and serve as collecting basins for extensive ice fields, the sources of large valley glaciers. The snow line stands at about 4,500 feet, and the glaciers descend within 500 feet of the sea level.

Climate.

Portland Canal lies within the Pacific Coast climate province, an area of abundant rainfall and comparatively moderate temperature due to prevailing westerly winds from the Pacific Ocean. The annual precipitation at the entrance of Portland Canal, is about 130 inches; at the head of the canal it is less, possibly not far from 100 inches. The least rainfall occurs late in spring and early summer, and abundant rains set in by September. From November to March the precipitation is in the form of snow. The summers are not hot, and the temperature seldom drops much below zero in winter.

Commercial Conditions.

Hyder, being on tidewater, is readily accessible throughout the year to large ocean vessels, but Hyder has no wharf, and all freight is handled by scows. Provisions can be purchased in both towns, and more elaborate equipment can be brought from Ketchikan, with which there is communication about twice a week by means of gasoline boat. The distance from Hyder to Ketchikan is 155 miles by the water route. Stewart has steamer communication with Prince Rupert, British Columbia, 135 miles distant.

Travel inland is difficult, except along the few established roads and trails. The best road in the region is one connecting Hyder to Stewart, (2 miles), which is suitable for automobiles.

Swift Streams.

Salmon River and Texas Creek are swift and practically impassable streams, which effectually divide the country through which they run. Texas Creek and Salmon River south of Ninemile flow in a network of channels through a broad valley bottom, floored with coarse gravel. A road has been constructed up the east side of the Salmon to Elevenmile and thence to the Premier mine, in Canadian territory. Except at a few points where it is forced to the valley side by eastward swings of the river, the road follows the overflow and washout, as was well shown in the high-water stages of an area of abundant rainfall and mile the road is on the valley slope. From the road three pack trails branch off, one in Canada to the Big Missouri and neighboring properties, one at Elevenmile to the New Alaska property, and one up Fish Creek to the Watkins and Tonkin properties.

Timber and Power.

The valley bottoms and mountain slopes up to 3,500 feet are heavily forested, chiefly with hemlock and spruce. In the valley bottoms and on the lower slope there is good timber in sufficient abundance for mining and other local needs.

As yet there has been no demand for water power, and the possibilities of developing it have not been closely scrutinized. Fish Creek and its tributary, Skookum Creek, the largest of the small streams, descend rapidly and are worth consideration as sources of power. There are no accurate records of their flow, which is greatly diminished in winter. The other streams in Alaska east of Salmon River are small and probably without value for power.

ROYAL PURPLE TO HAVE ANNIVERSARY BANQUET THURSDAY

The Ladies of the Royal Purple, Prince Rupert Lodge No. 8, will celebrate the first anniversary of their establishment with a great banquet to be held in the Elks' Home on Thursday night. A fine musical program and toast list is being arranged for and the place is to be handsomely decorated. All indications point to the function being a rousing success. Card playing and dancing will follow the banquet.

It is pointed out by the committee that only Elks, their wives and Ladies of the Royal Purple will be admitted. Tickets may be procured from the executive of either lodge.

PRINCE GEORGE

N. B. Walton, C. N. R. superintendent, visited here last week to investigate certain charges that aliens were being employed on the railway at the expense of returned soldiers. Mr. Walton went on East from here.

* * *

John Aitken, of this city, who was recently appointed assessor for Fort George, is at Quesnel making arrangements for the moving of the office from that place to Prince George.

* * *

H. G. Perry, M.E.A., addressed a meeting of the Dunster Farmers' Institute on Thursday last.

* * *

Mayor Johnson left here on Sunday for Victoria where he will attend the convention of Associated Boards of Trade as delegate from Prince George. The mayor expects to be gone about ten days or two weeks.

* * *

H. P. Hansen, secretary of the Lumber Workers' Union, has been committed for trial on charges of doing wilful damage and assault with intent to do grievous bodily harm. Hansen, himself, has a charge of assault against J. B. Daniell.

HAZELTON

Fred Johnson, fisheries warden at Babine Lake, was found dead in his cabin last week and the body was taken to Burns Lake.

* * *

Rev. J. R. Hewitt, of Hazelton, preached on Sunday at Telkwa.

* * *

Rev. William Deans, of Telkwa, delivered illustrated lectures at Hazelton and New Hazelton last week.

* * *

Neil McArthur, of Vanderhoof, aged 71 died at the Hazelton hospital last Friday morning.

* * *

The ladies met at the home of Mrs. W. W. Anderson on Friday afternoon to sew for the hospital.
