## BRINGING UP FATHER

## TEN MILLION DOLLAR CORPORATION TO TAKE OVER MASSETT TIMBER LIMITS AND OPERATE MILL ON QUEEN CHARLOTTE ISLANDS

(Continued from Page one).

ed, holds from its owners, the British Timber Corporation, Ltd., the logging rights to this acreage, which is declared by experts to be the finest single tract of standing timber on the American continent. It is estimated that the tract contains between six and eight billion feet of spruce, hemlock, cedar and other varieties of timber.

Shortly after the outbreak of the European war, Mr. Buckley, of Vancouver, B. C., with western associates and in co-operation with Scotch and English owners of this valuable tract, organized the Massett Timber Company, Ltd., and at an expenditure of over \$2,500,000 for extensive plant, sawmills, logging and other necessary equipment on Graham Island, developed a big lumber production to meet the urgent need of the British government.

The plant became particularly well known through the quality volume of its spruce timber, classified by the trade as airplane spruce, which it shipped for airplane construction to the British and French armies. The Allied armies drew their spruce for use in building airplanes, from a total of over 400 sources of supply. Mr. Buckley's company, however, is credited with having shipped to them a greater volume of this important material than that from all other sources combined. Through its shipment during and since the war the Massett product has been regarded as consistently showing an unusually high percentage of first quality timber and its seasoned cedar, in particular, is in increasing demand among the trade because of the high finish it takes when used for fine interior work.

### Buckley a Director.

Mr. Buckley, who is said by his associates to have been mainly responsible for the success of the Massett company, will be a director and hold an executive position with the new corporation, sharing with the shipbuilding company's officers the management of the corporation's affairs.

The logging, sawmill and shipping activities of the Massett Company, offering the main source of employment on Graham Island, the company maintains its own complete and permanent camp, with stores and necessary community buildings on the shores of Buckley Bay. This bay affords an ideal and well-protected harbor from which vessels pass with their loads of lumber into the Dixon entrance, and through the inside passage south to Pacific coast ports.

The combination of the interests of the Massett Company with those of the Los Angeles Shipbuilding and Dry Dock Corporation is the outgrowth of long-sustained investigations and negotiations on the part of the management of the shipbuilding company in its efforts to maintain in the Los Angeles Harbor community a permanent industrial institution, and even still further to develop a plant which, in its extent, scope and facilities was built considerably beyond the needs of normal peace time, in order that it might meet the nation's call for steel ships during the late war.

### Prominent Englishmen.

Following satisfactory Pacific Coast negotiations covering a considerable period, and with the support and co-operation of

their associates among many of the leading business men of Southern California, Messrs. Baker and Leaf went to Europe in February, returning last week, having secured the endorsement of their plans and the co-operation in the development of these plans from those representing the ownership of the great timber tract, including such men as Sir Travers Dawson, chairman of the board of directors of Vickers, Ltd.; Sir William Beardmore, W. Allan Coats, Esq.; Alexander Walker, Esq., and many Scotch and English names of particular prominence in the British business world.

The arrangements made and engagements tentatively entered into by their chief executive officers both with the English and the Canadian parties to the deal, having now been ratified by the stockholders of the Los Angeles Shipbuilding and Dry Dock Corporation, steps are immediately to be taken for the organization of the new \$10,000,000 corporation and the execution of the final details in the purchase of the various interests concerned.

The development of the operating plans of the new combination is, it is reported, to be immediately and most actively pushed. These plans call for the logging and rough sawing of lumber at Graham Island, and the shipment of this product to the shipyard plant. Here a large area of the yard's unused water frontage is to be converted into a lumber yard and here also modern sawmills of large capacity are to be erected to finish and dress this lumber for the market.

### Own Steamer Line.

For the transportation of the rough sawn lumber from British Columbia to Los Angeles Harbor, as well as for the transporting of the finished product to Pacific Coast and other markets, the new corporation will maintain its own line of vessels and to this end it purposes building six or more large steel lumber schooners of the most modern type. Those vessels are to be constructed at the shipyard, and it is understood that keels will be laid and construction work pushed as fast as plans can be prepared and building ways made available.

In addition to providing every facility on its seventy-acre harbor site for the development of a large wholesale lumber business, a shingle mill will be built, and a box "shook" factory erected immediately to supply the demands of the California market and especially those of Southern California fruit packers, with the same class of product as is put out by the Puget Sound Box Company at Seattle, and which now will be part of the combination.

### Immense Enterprise.

While no definite figures can be obtained as to the increased employment which the new activities will provide, the construction of lumber schooners, the erection of sawmills, shingle mill and box factory and the operation of all of these, in combination with the logging and sawmill plants in British Columbia and the box factory at Seattle, should together call for the work of several thousand men. Added to these new plans for the local shipyard, its regular ship repair and drydocking work, the manufacture of tractors in its machine shops for the Kroyer Motor Company and the construction of two steel ferry boats for the Key Route System at San Francisco, for which contract was recently awarded to the shipyard, give every indication of the rapid return of the payroll of this large plant to the substantial figures which it displayed during the war.

Mrs. C. L. M. Giggey arrived from Terrace on last night's train and is registered at the Hotel Prince Rupert.

### COULDN'T DO HOUSEWORK HEART WAS SO BAD

Many women get weak and run down and unable to look after their household duties owing to the heart action becoming impaired or the nervous system unstrung. Nature intended women to be strong, healthy and happy instead of sick and wretched. But how can a woman be strong and healthy when day in and day out she has to go through the same routine of work, sweeping, dusting, cooking, washing, etc. Is it any wonder that the heart becomes affected and she gets irritable and nervous, has hot flashes, faint and dizzy spells, smothering and sinking spells and can't sleep at night?

To all women whose heart is weak and whose nerves are unstrung we would recommend

**MILBURN'S HEART AND NERVE PILLS** as the best remedy to tone up the system and strengthen the weakened organs. Mrs. Daniel Beazons, Loganville, N. S., writes: "As I was troubled with a weak heart for nearly two years I am writing to tell you what your great remedy, Milburn's Heart and Nerve Pills, has done for me. My heart was so bad at night I could not sleep. I would take smothering spells, and was so weak I could not do my housework. I tried two doctors, but got no results. A friend advised me to try your pills. I used six boxes and am completely relieved. I think they are the best remedy for heart trouble there is."

Price, 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont. tributed during the last months of its war-time work. Since 1917 the local yard has executed approximately \$65,000,000 of ship construction and repair work, employing during the peak of its war-time activities 12,000 men. Under its new plans as a permanent and basic industrial enterprise, it is expected that its benefits to the harbor community and indeed to the entire Coast will, however, be incalculably greater.

Prominent local men who will be interested in the new enterprise include Dan Murphy, Charles Doolan, Lawrence Macomber, W. L. Hollingsworth, H. Jevne, J. A. Jevne, George W. Walker, J. O. Koepfli, P. F. Sartori, J. E. Shelton, George B. Jess, R. J. Dillon, Milo A. Baker, C. C. Spicer, H. O. Cornish, E. T. Off and Godfrey Holterhoff, Jr.

### "SOFT FINISH" STATISTICS

A great many ladies took advantage of our special price on "Soft Finish" laundry last week. That they were satisfied is evident by the number who have sent again.

As we placed no limit on the size of the bundle, it is interesting to note, that the largest did not exceed 40 pounds, that the ordinary charge, Soft Finish, varied from \$1.15 to \$3.35, and that the average bundle did not exceed \$2.00 in price.

We noted also that washing from our regular patrons finished in much better condition than work which had previously been done at home or elsewhere—another argument in favor of patronizing the laundry where scientific processes are followed.

A trial will convince you.

RELIABLE agent wanted for Rupert District. The Sovereign Life Assurance Company, Head office, Winnipeg, Man. Write Chas. A. Pyne, Prince George, manager for Northern British Columbia.

### WORLD SHORTAGE OF TEA MAKES PRICES CLIMB MUCH HIGHER

During 1919 and 1920, the greatly increased production and unlimited shipping facilities resulted in enormous quantities of tea reaching every market of the world. A consequent drop in price was the result. To stabilize the situation, the tea growers of Ceylon and India agreed to curtail production 20% in 1921. Since that time, the demand has been constantly increasing and the price rising. The recent reduction of duty on tea entering Britain has further increased the demand, and the price is expected to rise accordingly.

### QUEEN CHARLOTTE LAND DIVISION.

Take notice that W. G. McMorris, of Vancouver, B. C., miner, intends to apply to the Minister of Lands for a license to prospect for coal, petroleum and natural gas over and under the following described lands, situate on Skidegate Inlet, Graham Island, B.
