Fifteen Hundred Expelled From Russia.

Fifteen hundred people have been expelled from Russia. Why? Because they do not like the form of government and the methods of those who have forcibly taken charge of the affairs. of the country.

In Canada there are a lot of people who do not like the method of government and a few who have openly defied the government or who have broken the established laws of the land under which they live, have been deported. They have been in tellectuals who professed to know more than the rest of the community and who have not been backward in stating that the average man is uneducated.

If Canada were to set to work to gather up fifteen hundred of the leaders of revolutionary propaganda and send them out of the country there would be a howl go up that there was no freedom in this country and that the forces of capitalism were being temptous Boooo! While two or used to keep the workers down.

Yet under this model government in Russia they send people out of their native country with impunity. They imprison without trial and their trials when they do take place are often mockeries of justice.

Labor Did Well To Ignore Them.

The Dominion Trades and Labor Congress did well to ignore any pleas for backing loans to Russia or for copying the forms of so great and the supply so limitgovernment they have in that country. The system has not been ed in almost any city in Canada a success. It has not made better conditions for the workers of and the United States that many the country nor has it done anything which cannot be done under manufacturers have a standing the British constitution. What is needed in this country as in Russia is education. There are not sufficient trained The men who loaf their time away on the street corners, spitting men to fill the demand. Uphold Standard Of Paper Money.

Under the fallacy that debts could be paid by printing more paper money, some of the countries of Europe have been keeping their printing presses going busily and for a short time it looked fine but the value of the money steadily dropped until today some of these countries find themselves cut off from the rest of the world because they have no currency that is acceptable to foreign nations. They have to revert to the old fashioned game of barter in order to secure from other nations those articles they need in exchange for other goods of which they have a surplus.

As year follows year the scarcity of skilled labor in all trades and professions is becoming more and more acute, whilst this modern age is demanding in no uncertain voice: "Give us skilled men and women."

Can you interpret the language of modern machinery? Listen to the hiss of a modern engine as it gathers momentum, "Ssss! Sska! Sska! Skill- Skill! She says they tasted strong, seeming to be tainted by the tin, though, o course, this is not the fact. Someone mentioned Pacific Milk one day in a grocer's store and she tried that.
