Nothing is more wonderful than the human skin. It breathes through tiny months called pores. If it is kept whole and strong it improves the entire bodily health.

Those who know most about the complex structure of the skin appreciate the care that must be taken in deciding what is the safest, purest and best dressing to apply in time of accident or disease.

Much scientific thought and experiment was expended in the search for an ideal natural healing substance, but it has actually been found at last, in Nature's

own storehouse of medicinal herbs. Never in the world's history has there been another preparation like zam-buk. Amongst other virtues, it possesses that rare quality of actually growing new skin in Nature's own way.

A MIRACLE BEFORE YOUR EYES. Healing the injured and diseased tissues by this precious herbal balm is a miracle that may be performed before your cwn eyes. Children remember zam-buk best for its great power in soothing and healing their hurts, whilst in the treatment of eczema, ringworm, chronic sores, ulcers and poisoned sores, zam buk powerfur antiseptic and tissuebuilding properties ensure success; again, many thousands have zam buk alone to thank for their con. lete release from torturing piles.

Differing fundamentally and in action from all ordinary ointments, zam-buk is free from animal fats and mineral compounds. It is highly refined and contains no ingredient which the skin cannot readily absorb. A fifty-cent box of zam-buk may save you dollars in doctors' bills. It is a unique preparation with a wonderfully wide range of usefulness.

BRINGING UP FATHER

Northern Coast Was Predominant Figure Mineral Production

The Northern Coast District produced nearly seventy per cent. of the tonnage of ore mined in British Columbia last year, carrying about fifty-five per cent. of the total value of the metalliferous output, according to the annual report of Hon. William Sloan, minister of mines, which was just made pablic last week. For an explanation of this, it is only necessary to turn to the statistics relating to the gold and silver production of the Premier Mining Company, Portland Canal District, and to the copper production of the Granby Consolidated Mining and

Coal Industry. plant converted coal into coke for the report states that there has Mordie was master of ceremonies the district produced 59,434 been no metallic iron produced in and Arthur's Orchestra provided. long tons of coke, of which about British Columbia, "but it has the music.
