DAILY EDITION  Tuesday, Jan. 31, 1922.

Welcome Given
Hon. A. M. Manson.
 The welcome extended Hon. A. M. Manson by the citizens of Prince Rupert yesterday must be taken as an indication of the personal regard in which the people here hold the new attorney-general and of the appreciation by the people of the action of the government in recognizing the constituency of Omineca, the sister constituency to that of Prince Rupert in Northern Central British Columbia. It gives the North a double representation.
 Until the appointment of Mr. Manson the whole of the North country was ably and well represented by Hon. T. D. Pattullo, minister of lands, but he was only one. While his influence in the cabinet was as great as that of any other member, if not greater, yet he was alone there with no colleague representing a district farther north than Nanaimo. Now the northern influence is doubled by the addition of the representative of Omineca.

No Politics in Demonstration.
 There was no politics in the demonstration to Mr. Manson yesterday. There were people present of all shades of political opinion. The mayor, who is usually looked upon as a Conservative in politics, rose to the occasion and showed himself to be a man with a wide outlook who could sink all party differences and extend the welcome of the whole city to one of her prominent sons, no matter what his political opinions. His welcome to Mr. Manson was wholehearted and such as would become the head of a city of promise such as this. Prince Rupert will be known abroad by the character of her citizens. It has often been claimed that there are here men and women who compare favorably with any other part of the Empire, and it must be a source of civic gratification that the world is beginning to recognize the fact and that there are now two men from the North who hold most prominent places in the government of the province.

Support Until Proved Unworthy.
 Now that the North is well represented in the provincial cabinet, it has been suggested by citizens that carping criticism of our representatives shall cease and that we all stand by them. Being human they must sometimes make mistakes and they must make enemies if they are men of strong opinions, as they should be. At the same time while they hew to the line of sound statesmanship they should receive the support of all good citizens, Liberal, Conservative or any other party. When the next election comes, if it is found that they have not measured up to the Prince Rupert standard, that will be the time to show them that others might do better. Politics, it is hoped, will be a thing of the past for the next few years so that industrial development may be carried on unhindered by political influences.

Sir Ernest Shackleton, Intrepid Explorer.
 Everyone will regret the death of the explorer, Sir Ernest Shackleton. The British people love an adventurer. The Empire was founded on adventure by adventurers and the spirit of adventure still burns in every breast. Sir Ernest was a representative of the race. He was a big man of his type and the eyes of the world were watching him. His sudden death caused general regret that a life so full of the romance of adventure and so typical of the feelings of the people as a whole should be cut off so suddenly and in such a commonplace manner. It is a matter for gratification that Sir Ernest chose men to aid him of such calibre that they could continue the work which he has commenced.

HEALTH MESSAGE TO THE WORLD

Take "Fruit-a-tives" And Make Yourself Well
 "Fruit-a-tives", the marvelous medicine made from fruit juices and tonics, is the most beneficial medicinal agent that has ever been given to mankind. Just as oranges, apples, figs and prunes are nature's own medicine, so "Fruit-a-tives"—made from these fruit juices—but concentrated and intensified—is the greatest Stomach and Liver Medicine, the greatest Kidney and Bladder Medicine—the greatest Blood Purifier—the greatest remedy for Headaches, Constipation, Indigestion, Nervousness and Bad Complexion—in the world. To be well, take "Fruit-a-tives".

BOARD OF WORKS HAS CHOSEN INCINERATOR SITE THIRD AVENUE

Ald. Kerr, chairman of the Board of Works, reported at last night's council meeting that his committee had selected a site for the proposed incinerator on Third Avenue East just below and somewhat west of the Isolation Hospital. He stated that the site was a very suitable one from the point of view of unloading garbage and removing ashes and the heat generated might possibly be used for the general hospital, thus effecting a saving to the board of some \$3,000 per year. Ald. Montgomery added that it might also be used for the heating of water in a civic swimming tank at some future date, this being a very favorable location for such a tank.

The Board of Works will submit a report embodying this recommendation at an early meeting of the council.

MAYOR IS NOT YET ADVISED REGARDING NEW RELIEF SCHEME

Questioned by Ald. Kelly at last night's council meeting, Mayor Rochester stated that he had not yet been given official advice as to the extended participation of the Federal Government in relief work as reported in last week's telegraphic press reports.
 Ald. Kelly suggested that the new scheme, whereby permanent work can be done with the government co-operating in the costs be put into effect as soon as possible and requested the mayor to take the matter up at once. In the meantime the mayor will confer with the local provincial employment authorities.

REORGANIZATION OF DEPARTMENT

City Engineer to Be Building Inspector and Sanitary Inspector and Supt. of Works.

The city engineer's department in the City Hall is to be so reorganized that Harry L. Landry, present building inspector, and W. B. Martin, sanitary inspector, will no longer be officials and last night the council passed a recommendation from the Board of Works giving these posts together with that of Superintendent of Public Works officially to the City Engineer who is to be solely in charge of and responsible for all outside work of the city with the exception of that of the electric light, telephone and fire departments. The engineer will take up his duties under this plan on and after March 1 and Mr. Landry and Mr. Martin are to be given notice to that effect. The action does not necessarily mean that these men will lose their posts as employees but that they are to be on a new status directly responsible to the engineer where before they were only responsible to the council. Officially, they will simply cease to be.
Made Unanimous.

The proposal was discussed fully in committee of the whole. Ald. Kelly could not see where the action would make any change in the conduct of affairs and asked for a week to consider the report and accordingly moved that it be laid on the table for that time. This view was not supported by the rest of the aldermen and the motion, in the nature of an amendment to another recommending the adoption of the report, was lost. Ald. Kelly being the only one voting for it. The original motion was then carried and the mayor was instructed to cast a unanimous ballot, in compliance with the rules of procedure, appointing the city engineer to the three official posts.

BOOTH SCHOOL SEPTIC TANK

Ald. Perry's Motion for Estimates Linking Hays Cove Residences, Goes to Board of Works.

ENGINEER SAYS SEPTIC TANKS NOT FUNCTIONING

Ald. Perry's motion that the city engineer be instructed to prepare estimates for the linking up of residences on Hays Cove Circle and Fourth, Fifth, Sixth, Seventh and Eighth Avenues east of Green Street with the Booth School septic tank was last night referred by the council to the Board of Works for consideration and report, the alderman stating that he would keep after the question until some action had been taken by the Board of Works.
 There was considerable discussion on the matter and it was pointed out by Ald. Perry that the present sanitary state of affairs in this section of the city was anything but good. The people there were entitled to better provision, Ald. Kelly and Ald. Siiversides were in favor of a permanent sewer unit if such could be managed, the former stating that the septic tanks now in use in various parts of the city were absolutely a failure and were in fact a menace. He pointed to Westview as an example. There were several septic tanks there and the condition was even worse than in the vicinity of the Booth School.
Not Functioning.
 "It may be surprising to many," qualified City Engineer Whitaker, "but there is not a single septic tank in this district that is functioning properly. They should be equipped with alternating filters." The city engineer said that he would, of course, prefer permanent sewers where possible but that temporary provision could well be made in the locality in question.

The city is to call for tenders for a 10 by 10 foot air compressor which will be used for rock work on the streets. It will be a portable machine and will cost in the neighborhood of \$500. The council adopted a report from the Board of Works to this effect last evening.

Sinclair Fisheries, Ltd. - Prince Rupert

Ten Years Ago in Prince Rupert

January 31, 1912.
 Ald. Morrissey's report was again discussed in the council last night, particularly a clause proposing to dispense with the services of M. J. McNeill, Superintendent of works. Mr. McNeill demanded that decision be deferred until the return of Col. Davis, city engineer, and the council carried a motion to that effect.

The city council last night considered the matter of establishing an isolation hospital. Two sites, one on the Cemetery road and another near Hays Creek are to be inspected.

The sunken tug Glen Rosa has been brought to the surface and now lies in Hays Creek. There are signs of a sad struggle for life but nothing is to be seen of Captain Tallander and his son who are believed to have been drowned when the vessel sank.

Now is the time of all times to boost the fishing industry, and support local prosperity. Buy and eat fish on Wednesday, February 1st, CANADA'S NATIONAL FISH DAY.
