Mr. Hinton has sent the premier a message denying the statement attributed to him and also denying that he had in any way discussed in the interview the subject matter of his report to the British Columbia government.

## Whether Russian and Allied Positions Can be Adjusted Is Present Question Genoa

GENOA, April 25.—The Genoa Conference is drifting towards the rocks again. Whether it can be kept from wreckage depends on the possibility of reconciling the new demands of the Russian Soviet delegates with the position of the Allied governments, who declare that they will stand fast by the resolutions adopted at Cannes on which the conference is based.

The situation at the conference is made even more critical by the frank warning of Premier Poincare at Bar-le-due yesterday that France will withdraw if it is unable to see that the ideas expressed by the French cabinet before parliament can triumph.

Foreign Minister Tchitcherine of Russia declared today that the Allied resistance to the principle of nationalization is blocking the conference.

Can Go Without Drydocks,  
Says Nicol Thompson.

VANCOUVER, April 25.—Nicol Thompson, prominent Vancouver business man, in a letter to the press today, declares that a \$5,000,000 dry dock at Victoria would be a sheer waste of public money. He also advances the suggestion that a portion of the floating pontoon dry dock at Prince Rupert, which is little used now, might be towed to Vancouver to provide a nucleus for the proposed Wallace floating dock. This would not commit the government to capital expenditure.

## Fish Plant in Harbor To Resume Operations Employing Thirty Men

Operations at the Tucks Inlet by-products plant, which has been idle since the Tucks Inlet By-products Co. Limited became insolvent some two years ago, are to be resumed in the course of a very few weeks and the industry there is to be made a permanent one operating all the year around, according to an announcement made to The Daily News last night by G. G. Bushby, a prominent business man of the south, who has just reached the city to get operations started and take active personal management of the plant himself.

In speaking of his plans last evening, Mr. Bushby stated that it was his intention to carry on the plant along similar lines as before. Fish oil, edible fish meal and fish fertilizer will be produced from the salmon and halibut offal of this port and the canneries of the district. It is expected to have the plant in full operation again in the course of a fortnight's time. The supply of raw material in the form of fish offal will be drawn from the canneries and the local halibut packing houses.

There will be practically no extensions to the plant at this time, but it is estimated that in the course of the season 1000 tons of fish meal and fertilizer and 100,000 gallons of fish oil will be turned out.

Insistent Demand.  
Mr. Bushby declares that there is an insistent growing demand for edible fish meal as poultry, swine, cattle and even horse feed. The product is very strong in proteins and phosphates, which are most essential constituents in stock feed. The meal and fertilizer will for the time being go mostly to Oregon, Washington and California, although a B. C. demand is steadily developing. The oil will be sent to the eastern seaboard, where it is used in the tanning of leather.

The local plant will operate most heavily when the salmon season is on and at that time there will be a staff of some thirty men employed and four tug boats operated in bringing the offal from the various sources of supply. It will run all the year round and plans are being matured for the handling of a large tonnage of dogfish, on which there is a bounty.

The value of the plant will be considerable to the city in the matter of providing another industry supporting a considerable payroll. Fish offal, which during the past season has been taken out to sea and dumped, will be taken off the hands of the producers and turned into a useful commodity of commerce.

It has been decided to change the name of the company from the Tucks Inlet By-products Co. to some name in which Prince Rupert is emphasized, likely the Prince Rupert Fish Products Limited.

Bushby Well Known.  
Mr. Bushby, who has acquired the local plant, is a well known business man of long standing on the southern coast of the province. For twenty years he was president and general manager of the B. C. Marine shipyards, Vancouver, of which he is still a director. For several years he was salvage manager of the British Columbia Salvage Co. of Victoria, and is still a director. He served a term as president of the Manufacturers' Association of B. C., three years as president of the Metal Trades' Association of B. C. and three years as president of the Employers' Association of Vancouver. He is also identified to 2,500 men.
