

PRODUCTION OF COPPER IS CHEAPER

Granby Is Now Able to Produce For About Nine and Half Cents a Pound.

VANCOUVER, Aug. 23.—Granby Consolidated Mining, Smelting & Power Co., is making its copper for around 9.50¢ a pound. This is cheaper than at any time in the company's history, comparing with 11.63¢ a pound last year and 15.94¢ in 1920. With a 14-cent copper market and a monthly production of about 2,500,000 pounds, Granby should be earning at an annual rate of \$1,200,000. Operations last year resulted in a profit of \$12,838, against a \$687,000 deficit in 1920. Production last year totalled 129,967,051 pounds of copper. Production in the first half of 1922 was at the annual rate of 25,000,000 pounds. Production through the latter half of this year will probably total 15,000,000 pounds as the company does not intend to increase output before completion of the new dam unless there is a material increase in price of copper. With present equipment Granby could produce about 50,000,000 pounds of copper annually.

Mines 75,000 Tons Ore.

Granby is mining from 75,000 to 85,000 tons of ore monthly at Anxox, where it is employing about 1,500 men and doing considerable construction work in connection with Hydro-Electric installation. The new storage dam for impounding water should be completed in three months. The use of Hydro-Electric power will enable the company to decrease the cost of producing copper one-half to two-thirds of a cent a pound. Dammed mill work is meeting with good results, and ore in sight is fully as large as at the first of the year. At that time estimate reserves of high-grade ore in sight were 10,761,527 lbs. of 25 per cent copper.

Use Own Coal.

Granby produces its own coal, mining about 25,000 tons monthly from its property on Vancouver Island. Most of this is used in supplying the Anxox smelter and mill. Some is sold commercially. After the completion of the Hydro-Electric plant Granby's coal will be used for making coke for the company's blast furnaces, and the surplus sold.

Their cases proceeded with before Judge Young this afternoon. Crown evidence was heard yesterday and adjournment made until today. W. O. Fulton, of Patmore & Fulton, is conducting the prosecution and S. W. Taylor, of Williams, Manson & Gonzales, the defence.

PIGS FED BETTER THAN ARE RUSSIANS

Former Juneau Priest Tells Story of Want in Letter From Russia

JUNEAU, Aug. 23.—"Five years ago pigs in Russia were fed better than the mass of the Russian people are today," declares Rev. John Bartnofsky, the first Russian priest in charge of the local Russian Church and located here from 1894 to 1896. In a letter just received by Rev. A. P. Kash-evaroff, who now occupies the position then held by Father Bartnofsky, the latter describes touchingly the terrible conditions prevailing in his country.

In his letter he said: "No doubt some of the Juneau people still remember me. I was the first rector of the Juneau church. Please tell them that at present I and the family are in great want. We are without sufficient food; we suffer from lack of clothes, footwear and underwear. To make my story short, I may say that five years ago the Russian pigs were fed better than we are at present and the most needy beggar had less necessity for clothing than we have. There are no places to buy from and certainly we have no money to buy with."

Prices are Prohibitive

"Commerce is just about beginning to be re-established, but prices for all commodities are very prohibitive. As examples: One needle is worth 100,000 rubles; salt is worth 4,000,000 rubles for a good 36 American pounds. Flour 8,000,000 rubles per pound. Ten eggs 300,000 rubles. Butter 8,000 rubles. The winter is approaching and we are hungry and naked. We have no permanent home. Just now I am serving at a temporary pastorate at Peskie. I am anxious to get to my native country of Poland, but the government will not allow this. I beg the clergy of St. Nicholas Church to make our wants known to the public. Perhaps some kind soul may be found who will respond to our appeal."

CHILDREN'S CLINICS HELD IN ALBERTA

EDMONTON, Aug. 23.—Between fifteen and twenty children's clinics have been held at various country points throughout the province this year by the provincial department of health and special attention has been given to travelling clinics in the unorganized districts. Some of these clinics have been held at fairs and in connection with the Soldiers' Settlement board.

There have also been a number of such clinics held by the nurses in the southern part of the province in their own districts. Among the nurses who have been travelling around on this work have been Miss Emmerson, Miss Lavell, Miss Conroy, Miss West, Miss Reid and Miss Jones. Four nurses have been working in the unorganized districts of the south and permanent child welfare stations have been established in a number of places.

HYDROPLANE CAN RIDE OUT ROUGHEST SEA

Innovation in Air Craft May Have Wide Effect on Naval Construction

EDMONTON, Aug. 23.—A hydroplane that can ride out the roughest sea and will bridle to anchor like a whaleback, is now being experimented on in Great Britain. Captain A. G. Haskell of the Royal Air Force, who was a visitor to the city recently, stated that the new machine is an innovation that might modify naval structures to a considerable degree. Although the strictest secrecy is being observed regarding details, it is known that the machine is in reality, a ship to which aeroplanes are attached. The hull is long, of slight beam and extremely flexible; the elasticity is the outcome of many years of mechanical research at the Royal Aircraft factory. The combination is supposed to give airworthiness equal to the craft's seaworthiness and it is further proposed to establish an aerial navy if performance is as indicated.

An experimental machine that was completed recently carried but seven people but models now designed will be entirely suitable for transoceanic use. They will be turned out on a commercial scale and with two engines will be capable of maintaining a cruising speed of 100 miles per hour. Its principal naval value lies in the fact that it can travel on the water should it not be able to fly; thus it could accompany battle fleets without cumbersome housing facilities. The service machine will be equipped with a full complement of arms and incidental accessories in the shape of wireless, bomb sights, camera and other instruments.

CALLIES DEFEAT SONS OF CANADA

Sons Eliminated From Gihuly Cup Series by 5 to 2 Score

The Callies proved themselves the masters of the situation in the football match against the Sons of Canada last night on the Acropolis Hill grounds to the tune of a 5-2 victory in the first round for the Gihuly Cup. A good turnout of soccer fans witnessed the Scotch victory. The game throughout was a fast one and the first half was particularly exciting. The rain had made the ground and ball heavy, the latter being hard to control. The teams lined up as follows:

Callies—Brice, goal; Kinghorn and Martin, backs; Abbott, Scott and Campbell, half-backs; Jack, Sellars, McIntosh, Currie and W. Mitchell, forwards.

Sons of Canada—J. Scott, goal; Wood and Anderson, backs; G. Mitchell, Tait and Davis, half-backs; Marks, B. Long, J. Marks, Warren and J. Mitchell, forwards. W. Waldorf acted very capably as referee.

First Half

Upon the teams taking the field the Sons of Canada kicked on the up grade. From the centre the Sons took the offensive but the Callies' defence proved equal to the task. The Callies soon took hold of the ball and Scott, in goal for the Sons, was called upon to watch things. A corner awarded to the Callies and taken by Jack was not converted. The Scotchmen continued to force the play and Wally Anderson conceded a corner. W. Mitchell, on taking the award, put in an excellent centre, but Scott cleared and the half-backs took the sphere from the danger zone. During a scrimmage in front of the Son's goal, Davis endeavored to clear a greasy ball at his toe but it glanced off it into his own goal taking Scott completely by surprise. This constituted the first point for the Scotchmen. From the centre the Callies got away and Jack tried a shot at the Son's goal which went wide. A dangerous dash by the Scots was pulled up short by Anderson. The Canadians then made a combined dash and worked the ball in front of Brice, Warren for the Sons heading it into the net, thus equalizing the score. This put every man on his toes and from the centre the play was very spirited. Two corners in favor of the Callies were not made use of. After good combination work the Sons succeeded in getting the ball within shooting distance of their opponents' stronghold, but were unable to use it to advantage. As the result of an excellent dash by E. McIntosh for the Caledonians who shot at Scott, the latter fumbled the ball in the goalmouth and Jack finished the job. From the centre the Sons made various dashes for Brice but were unable to get very far, the defence of the Callies being too strong. Good team work by the Callie forwards put Eric McIntosh in an open position of which he took full advantage and with a fast ground ball Scott was beaten for the third time. At half time the score stood 3-1 in favor of the Callies.

Second Half

From the commencement the Callies forced the play. The Sons got away with the sphere and after a few moments exciting play in front of Brice, J. Mitchell put the ball past him. From the centre the game continued at a merry clip. The Caledonians were constantly on the ball and a good try by McIntosh at Scott went wide. At this juncture the fog crept over the field for a few moments and the light was not of the best. A foul against the Sons resulted in Eric McIntosh putting a fast ball past Scott.

The Callies were certainly on the ball and Scott was called upon to save from Jack. An independent run by W. Mitchell for the Callies, which was a very pretty piece of work, resulted in him leading Scott with a ball to the corner of the net, the final score being 5-2 in favor of the Callies.

Comments on Play

The Callies deserved their win and certainly had the best of the play throughout. Everyone of their men played a good game and it would be hard to mention exactly who was the best. Both Kinghorn and Martin at full back were on the job at all times while the half back line gave excellent support. McIntosh, Jack and W. Mitchell in the forward line play-

ANYOX ELKS INVITE PRINCE RUPERT TEAM

Want Return Baseball Game in Order to Reciprocate Kindness and Get Revenge if Possible.

An invitation for a return baseball game at Anyox has been received by Ben Self from William Robertson, of the Anyox Elks' Lodge sports committee. The intention, it is stated, is to reciprocate the kindness extended by Prince Rupert to the smelter boys on Flag Day and also, if possible, get revenge.

Sport Chat

Weather permitting (reminds one of old times) the Elks and Sons of Canada will meet tonight on the Acropolis Hill grounds for the fifth lacrosse game of the season. If the Sons win they have achieved their fourth victory of the season and, out of the series of eight games originally planned, it will give them a pretty good cinch of the championship for the year and the Stark Cup. On the other hand an Elks' victory, which fans concede is about due, will make the race more interesting with the Sons having three wins and Elks, two. The lineups this week will be about the same as last.

EDMONTON SWIMMING POOL WAS COSTLY

EDMONTON, Aug. 23.—Action taken by Aldermen Richards at the last meeting of council in asking for a report upon the cost and operation of the south side swimming pool has precipitated what appears to be a very serious situation.

The main point is that the swimming pool has cost up to the present some \$18,000 to \$20,000 instead of \$10,000 for swimming bath purposes for which consent was given by the council. Ever then it was not anticipated that the whole amount would be spent on the one bath, and Ald. Adair has been raising objection to what has taken place along that line.

As for the \$18,000 the burgesses recently turned down a \$20,000 bylaw for the south side market, and it is fairly sure they would have turned down an \$18,000 swimming pool bylaw had it been submitted to them.

QUICK WORK OF A REVENUE OFFICER

The effete east may be slow in some things but not in carrying out the ends of justice. Inland Revenue Officer Floody of Toronto recently left the city at 6 o'clock, proceeded to a farm in Toronto township near Erindale, seized a still on the premises, arrested Arthur Dunning, brought him to Port Credit, had him arraigned before the police magistrate and fined \$200 and costs for operating a still, and got back in the city by 9 o'clock. Three hours was enough time to complete the entire job.

Cookies and Small Cakes

WHEN the children romp in hungry as young bears, here are some wholesome, economical delights that will not only be received with glee, but will satisfy the most ravenous appetite in a most wholesome manner.

(All measurements for all materials are level.)

COOKIES

1/2 cup shortening
1 cup sugar
1/2 cup milk
2 eggs
1/2 teaspoon grated nutmeg
1/2 teaspoon vanilla extract or
grated rind of 1 lemon
4 cups flour
2 teaspoons Dr. Price's Baking Powder

Cream shortening and sugar together; add milk to beaten eggs and beat again; add slowly to creamed shortening and sugar; add nutmeg and flavoring; add 2 cups flour sifted with baking powder; add enough additional flour to make stiff dough. Roll out very thin on floured board; cut with cookie cutter, sprinkle with sugar, or put a raisin or a piece of English walnut in the center of each. Bake about 12 minutes in hot oven.

COCOA DROP CAKES

4 tablespoons shortening
1 cup sugar
1 egg
1/2 cup milk
1/4 cups flour
2 teaspoons Dr. Price's Baking Powder
1/2 cup cocoa
1/4 teaspoon salt
1 teaspoon vanilla extract

Cream shortening; add sugar and beaten egg; beat well and add milk slowly; sift flour, baking powder, salt and cocoa into mixture; stir until smooth, add vanilla. Half fill greased muffintins with batter and bake in moderate oven about 20 minutes. Cover with boiled icing.

ORANGE CAKES

4 tablespoons shortening
1 cup sugar
1 egg
1/2 cup milk
2 cups flour
2 teaspoons Dr. Price's Baking Powder
1/4 teaspoon salt
1 teaspoon orange extract
grated rind of 1 orange

Cream shortening; add sugar slowly, beating well; add milk a little at a time; then add beaten egg; sift flour, baking powder and salt together and add to mixture; add flavoring and orange rind; mix well. Bake in greased shallow tin, or individual cake tins, in hot oven 15 to 20 minutes. When cool cover with orange icing.

DR. PRICE'S CREAM Baking Powder

Made from Cream of Tartar, derived from grapes. Produces foods that are finer in texture, richer in flavor and thoroughly wholesome.
