NEW SILVER MONEY

Soviet Issuing Coin Which Eventually Will Replace Notes.

PETROGRAD, June 28.—New silver money which in time the Soviet government hopes to put in circulation to replace, partly at least, the paper ruble of today is being coined in the Petrograd mint, the only existing plant of its kind in Russia.

The mint began operating several months ago; up to the present time it has manufactured 5,000,000 rubles in silver of denominations of 10, 15, 20, 50 copecks and 1 ruble pieces. The coins contain 90 percent silver and ten percent copper, and in general appearance are much the same as those in use before the war. Close inspection, however, shows that the Soviet coat of arms has replaced the old Imperial eagle. Another striking feature is the Bolshevik motto "Proletariat of the world, unite!" on the reverse side.

The new coins are sent to Moscow where they are held as part of the government reserve. When a sufficient quantity has been assembled the government contemplates using them as a form of guarantee for paper money.
