Come over to the SUNNY SIDE OF LIFE

Do you want to feel always at your best? To meet each day with fresh vitality? You can. For when you're healthy, you're

A delicious cereal provides the "bulk" that is so important in overcoming common constipation.

Tests show Kellogg's ALL BRAN also supplies vitamin B to further aid regular habits. In addition, ALL-BRAN is twice as rich in iron as an equal weight of beef liver.

The "bulk" in ALL-BRAN is much like that in leafy vegetables. What a relief to enjoy an appetizing cereal instead of taking patent medicines.

Serve as a cereal or use in cooking. Directions on the redand-green package. Sold by all grocers. Made by Kellogg in London, Ontario.

Roy Summers of the C.N.R. district freight and passenger agent's Quality and Value Shop office will sail tonight on the ss. Prince Rupert for a holiday trip to

# Victor answers the big question of the year...

# BI-ACOUSTIC

A straight-forward explanation of this exclusive Victor receiver-and why, on sheer performance and

its advent this year has been so enthusiastically acclaimed

THOUSANDS of Canadians have asked the question "What is Bi-Acoustic Radio and why is it so vastly superior in tone and performance?" We answer this query in one clear, uncolored statement . . . a statement outlining how Victor engineers, building upon the foundation of the super-heterodyne circuit, were able to produce twice the power, twice the range, twice the tone quality - and more than double the all-round performance. Here are the engineering achievements which, combined, have made Bi-Acoustic possible:

"B" Amplification - An entirely new principle of audio amplification which produces an enormous reserve of power, ensuring true, undistorted tone over a greatly increased musical range - two octaves more than the ordinary radio - at any volume. A system of amplification which enables the receiver to reproduce music's volume peaks and softest passages absolutely true to the original.

Automatic Tone Compensators - Necessary to utilize to the full the powers of "B" Amplification. At full or at whisper volume, high and low frequencies are automatically maintained in proper relation, making possible for the first time musical fidelity at all volume ranges . . . from lowest to highest.

Tone Equalizers — Wooden tone-chambers which give this radio the qualities of a real musical instrument. Tone is purified . . high notes are freed from shrillness - bass is freed

from unnatural boom . . . cabinet resonance is

New Mercury Vapor Tube - Like the "freewheeling" of motordom, this new tube regulates power requirements. It automatically supplies the necessary power to meet the particular requirements of the instant. The use of this tube in the Bi-Acoustic circuit makes possible the faithful reproduction of the faintest tones, as well as the thrill peaks of radio reception - the startled exclamations in a drama, the sudden crescendos of an orchestra. In addition, because of this control of power, Victor Bi-Acoustic costs less to operate! Other features are all new-type tubes, new improved dynamic speaker, dual automatic volume control and acoustically-tuned cabinets, com-

bining to give the finest receiver ever developed - Victor Bi-Acoustic Radio. Your Victor dealer will gladly demonstrate Bi-Acoustic . . . . in a choice of three beautiful models.
