Strike Position Is Serious In The U.S.

ATTORNEY GENERAL THREATENS TO SMASH POWER OF UNIONS

United States Government Will Crush Unions if They Will Not Permit Trains to Run Says A.G.

CHICAGO, Sept. 2.—The Federation of Labor says the strike will proceed in spite of the injunction secured in the courts by the government preventing the Unions interfering with the operations of trains to maintain the general principle of the open shop.

The injunction is looked upon as the most drastic step ever taken in fighting a strike and Samuel Gompers says the result may be to drag in many other unions not now concerned in the strike. A scathing denunciation of the "Usurpation of the powers of the Court" was made by Gompers, who says the unions heretofore treated such injunctions as scraps of paper.

The government, on the other hand, says while the injunction was aimed at the unions directly it must be accepted as an expression of the sovereignty of the United States Government. The union still will not permit trains to run, then the government will crush the unions.

The Attorney General said the injunction was necessary to the preservation of the unions themselves. The government expected to use the authority to prevent the labor union from destroying the open shop. If acts of violence and murder were inspired by the unions, it is time to call a halt. He said the organization would be permitted to laugh in the frozen faces of famishing people without proper punishment.

WANT ARMORY FOR RUPERT

Board of Trade Endorses Application—Reception For Montreal Visitors Arranged

The regular monthly meeting of the Board of Trade was held last night in the city council chamber. President C. B. Orme was in the chair and fourteen members were present.

A notice was read announcing that the Militia department at Vancouver had asked that an armory be built at Prince Rupert. This application was endorsed, it being pointed out that an armory was more than ever needed here now, especially since the creation of a regiment with headquarters here. At present there was no place for drilling or indoor shooting.

E. C. Gibbons reported for the entertainment committee with regard to the reception for the Montreal Board of Trade excursion which will arrive from the south on the morning of September 23 and will be here until leaving for the East on a special train in the evening. The excursionists will be met at the steamer and will be taken by several launches or one big boat to the dry dock and cold storage plants and other points of interest on the waterfront. A good part of the afternoon will thus be filled.

Arrangements are being made to obtain sufficient quantities of various kinds of fish and sea food to be packed and put on the train for a fish dinner. Accompanying the fish will be special menu cards on the reverse side of which statistics and general information regarding Prince Rupert will be given.

PROGRAM OF LABOR PARTY

For Dealing With Unemployment in Great Britain—Government Criticized

LONDON, Sept. 2.—Criticizing the government committee's proposals for dealing with the unemployment problem, the Labor party has formulated a program in which it urges that steps be taken to check the flow of juveniles into the labor market. Other proposals are that a minimum 44 hour week be legalized, production work on government contracts for the next decade be started at once, a five year program of house building, making of overdue repairs on railways and waterworks, a reorganization of land cultivation by agricultural work and also increases in roadmaking and repairing.

General Strike Is Thought Likely in the States Result Injunction Against Shopmen

NEW YORK, Sept. 2.—Interest in the United States strike situation today centres in the possibility of a general strike by organized labor throughout the country which would bring about a situation similar to that which tied up Winnipeg when the One Big Union held sway three years ago.

While Samuel Gompers is very guarded in his statements regarding a general strike, the strong belief prevails that a walk-out of all unions under the control of the American Federation may be ordered as labor's reply to the government's move in securing a blanket injunction restraining the shop workers from interfering with railway operation.

The announcement is generally regarded as of very serious importance. "Never previously has there been such demand upon me to call a general strike," said Gompers today. He said he had received numerous circulars, resolutions and letters asking for a general strike.
