COMPLETELY FREE OF CONSTIPATION

Tried for Years to Find Relief

"FRUIT-A-TIVES" GAVE IT

Chronic Constipation or insufficient action of the bowels, is one of the great causes of disease. Some authorities even claim that Constipation cannot be permanently corrected. This is a great mistake, because here is the proof that constipation can be cured and the bowels made to act regularly and naturally.

YARMOUTH, N.S.

"For years, I was troubled with Constipation, and had to take laxatives and purgatives all the time. If I neglected to take these, the bowels would refuse to do their work.

About two years ago, a friend advised me to try "Fruit-a-tives", which I did. The first box helped me so much that I obtained further supplies of the remedy and continued the treatment. After using about eight boxes, my bowels were able to perform their particular function without aid.

The relief in my case has been lasting, as up to date, I have never had any further trouble. I can recommend "Fruit-a-tives" to all suffering as I did and I am sure they will derive equal benefit."

A. W. FRANKLIN.

"Fruit-a-tives" are sold by all dealers at 50c a box, 6 for \$2.50, trial size 25c. or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

Our shoe repairing department is in full swing. McArthur's Shoe Store.

MATERIAL FOR ROAD SURFACING FROM TAR SANDS INVESTIGATED

EDMONTON, Alta., Oct. 20.

The research department of the University of Alberta has made excellent progress in developing a good road surfacing material from natural tar sands from the Fort McMurray district. A process has been developed whereby the asphalt can be extracted from the sand. It is planned to carry investigations on during the winter, the university having secured twenty-two tons of the sands which will be reduced. With the four or five tons of asphalt obtained, stretches of rural roads will be surfaced. If this surfacing stands the test, it is expected the development of the deposits will assume large proportions.

Two tons of the sand have been brought to Edmonton by the Dominion Government and all those who desire an opportunity to experiment with them can obtain samples from the lands office here.

The McMurray field comprises 75 square miles of tar sand deposits ranging to 18 feet in depth along the Athabasca river and its tributaries, according to a government engineer who recently concluded a special investigation.

KILLED IN IRELAND
