**Effect Of Collapse  
Of Mark On France.**

It is already becoming evident that the next reparations crisis will occur before the Allies have matured their plans for dealing with it, says the Manchester Guardian. In fact, the trouble has already begun. The further collapse of the mark has dismayed not only the German government, which has passed an emergency decree in order to arrest it, but the Reparation Commission and the Paris press. Every fresh fall in the mark has its repercussions on the franc, makes the ultimate receipt of indemnities more shadowy and remote, and gives further unwelcome evidence of the necessity for a prolonged moratorium. None of these things would be bettered by an invasion of the Ruhr or by any other measure of coercion. On the contrary, the mark would be driven down still faster. But they are all damaging to France, and the demand that she should retaliate forcibly gives natural outlet to a resentment which is all the keener for the belief, almost universally held by Frenchmen, that the depreciation of the mark is a matter of deliberate German policy. The danger is that if France should be driven to despair of getting substantial money payments out of Germany her advocates of military aggression will have things all their own way. But that danger is probably not imminent. The French government is committed to the holding of an inter-Allied conference, and, a semi-official statement shows she still adheres to that policy. This conference will not take place for over a month, but whatever happens to the mark in the meantime the French government is unlikely to take the bit between its teeth.

**New York Paper Eulogizes  
Canadian Business.**

The New York Herald, commenting on the fact that "the Canadian dollar is taller now by a fraction of a cent's width than the dollar of Uncle Sam," declares it is natural that Canada should be proud of this fact as it is only a short time since Canadian currency was at a discount of 16 or 17 per cent. in United States money.

"The change registers a story of prosperity and sound business conditions of which any country would have a right to be proud," continues the Herald. "Several things have combined to bring about this happy state of affairs.

"In the first place Canada has turned an adverse balance on international trade into a favorable balance, and, of course, the very foundation stone of foreign exchange is imbedded in foreign trade balances.

"Again, Canadian Government and industrial loans have met very hospitable receptions in American money markets, with the resultant flow of large sums across the border.

"Large amounts of money have been spent in Canada by boot-legging outlaws. A substantial boost to Canadian prosperity came from these two sources.

"American motor car tourists have contributed to it importantly. In the last twelve months 600,000 American motor cars crossed the border into Canada. On the basis of an assumed seven day trip and the expenditure of \$25 a day for each car it is computed by Canadian statisticians that the total of American money thus left with our neighbor reached upward of \$100,000,000. This is not a staggering amount, to be sure, in these billion dollar days, but it is a tidy sum.

"Canada may well be exultant over the recovery of her currency."

**GOVERNMENT IS  
QUITE STRONG**

Review of First Week of Session  
Indicates Solidarity of Party

**LITTLE REAL OPPOSITION**

Conservatives Not Behind Their  
Leader in Policy of Petty  
Bickering

(By H. F. Pullen.)

VICTORIA, Nov. 5.—The general impression obtained of the first week of the session from those who attended and listened to the proceedings was that the Government is today stronger than it has been since the last election. There was an absence of that cross purpose bickering among supporters of the Government which marred the effectiveness of the Government during last session. All are in one accord in matters of policy and it looks as if the Government was good for another three years. Also there is evident here a feeling of optimism in regard to the by-election to be brought on before very long in Vancouver.

There has been a great parade of opposition on the part of W. J. Bowser, but the rank and file of the opposition has not shown any of that hostility which has characterized the attitude of the leader. Any opposition has been of a constructive nature rather than destructive.

At the opening of the session Premier Oliver asked that the old custom be adopted, the same as that in the Dominion House where the mover and seconder of the address in reply to the speech from the throne spoke first and they were then followed by the leader of the opposition and the Premier answered. This proposal was refused by Mr. Bowser, so Government members refused to speak and the opposition members had it all their own way.

Tiring of this Mr. Bowser delivered his address and the Premier followed and then came the Attorney General. At the time of writing it was expected that the debate would last until about Wednesday of this week and that the budget speech would follow close after.

A number of bills have been introduced, mostly by the Attorney General, and some of them advanced to the second reading. The plan adopted this year is to bring down all the bills and let them lie on the table long enough to be considered by the people in every part of the province so that suggestions may be made in regard to possible amendments. This gets away altogether from the rush system in vogue a few years ago under which the most important bills were brought down in the dying days of the session and speeded through with scant consideration.

**Bowser Ineffective**

The speech of Mr. Bowser seems to have had little effect on his followers. None of them followed his lead. In fact there is a feeling that all is not well with the opposition ranks. There is a lack of that solidarity that is necessary to success. One thing lack of that solidarity that is necessary to success. One thing the Conservative party must learn before it can hope to succeed and that is to agree upon a policy and stick to it. There must be unity of purpose in the party, else the people will never have confidence in it.

John Oliver's reply was not by any means a masterpiece, but the evident reason was that there was so little in the speech of the leader of the opposition to which to reply. It is impossible to reply to aimless innuendo and street gossip.

**CELEBRATION OF  
ARMISTICE DAY**

G. W. V. A. at Terrace Had Service  
in Morning—Sale of  
Poppies and Dance

TERRACE, Nov. 9.—The G. W. V. A. celebrated Armistice Day by holding service in the morning which was conducted by their chaplain, Rural Dean Marsh.

In the afternoon the sale of poppies was very successful and a good sum was collected for the Widows, Wives and Orphans Fund.

A dance was held in the evening. There was a good attendance and the music was excellent.

**GRANBY COMPANY  
HAS REDUCED ITS  
COSTS MATERIALLY**

Year's Operations Showed Profit  
As Against Deficit of 1920

Granby Consolidated has materially cut its operating cost and the outlook for this property is bright says the Financial Post. Present costs for copper run 9.50 cents per pound as compared with 11.63 cents in 1921 and 15.94 cents in 1920. Last year a profit of \$12,838 replaced a deficit of \$687,000 in 1920. Production last year totalled 29,967,051 pounds of copper. Production in the first half of 1922 was at the annual rate of 25,000,000 pounds. Production through the latter half of this year will probably total 15,000,000 pounds, as the company does not intend to increase output before completion of the new dam unless there is a material increase in price of copper. With present equipment Granby could produce about 50,000,000 pounds of copper annually.

Granby is mining from 75,000 to 85,000 tons of ore monthly at Anyox, where it is employing about 1,500 men doing considerable construction work in connection with Hydro-Electric installation. New storage dam for impounding water should be completed in three months. The use of Hydro-Electric power will enable the company to decrease the cost of producing copper one-half to one-third of a cent a pound. Diamond drill work is meeting with good results, and ore in sight is fully as large as at the first of the year. At that time estimate reserves of high-grade ore in sight were 10,761,527 tons of 2.34 per cent copper.

**Will Sell Coal**

Granby produces its own coal, mining about 25,000 tons monthly from its property on Vancouver Island. Most of this is used in supplying the Anyox smelter and mill. Some is sold commercially. After the completion of the Hydro-Electric plant Granby's coal will be used for making coke for the company's blast furnaces, and the surplus sold. The Granby have bonded the George Copper property, which consists of 20 claims situated on the south side of the Bear River, some 20 miles from tidewater at Stewart; extensive diamond drilling is planned. There are three veins on the property traceable for a thousand feet or more; the veins, aggregating 10 ft. of ore, average gold \$1.00, silver 30c. per ton, copper 3 per cent.

**"I Was Terribly Weak  
After Baby Was Born"**

Mrs. H. McClure, Norwood, Ont., writes:

"After my baby was born, I was terribly weak and run down, with pains across my back. I had heard so much of Dr. Chase's Nerve Food that I decided to try it. Three boxes proved enough to make me quite strong and well again. I also used Dr. Chase's Ointment for a rash which broke out on the baby, and the rash disappeared completely in a short time."
