SALMON NOT FISHED OUT

Chairman Duff Says Strong Arguments For and Against Orientals

VANCOUVER, Sept. 7.—Chairman Duff of the fisheries commission arriving here from Victoria expressed the conviction that the predictions that the salmon fisheries of British Columbia were doomed to extinction were exaggerated. He said that while the Fraser River apparently was off the list of great salmon rivers, the rivers of the north were good for many years to come. Conservation was apparently necessary, he said.

Strong arguments both for and against Orientals in the fisheries had been put up, Mr. Duff said.

SOVIET UNABLE TO PAY FOR ENGINES

STOCKHOLM, Sept. 7.—After having ordered 1,000 locomotives from an engineering firm here and having received 300 of them, the Russian government has intimated that it is now unable to pay.

When the contract was made it was agreed that the engines were to be paid for as they were delivered, and the manufacturers obtained a guarantee for their money.

It is now considered probable that the Soviet government will cancel the balance of the order, and that the present financial state of Russia and the failure of the Genoa and Hague conferences is responsible.

FAMINE FLOUR IS UNFIT FOR FOOD

Samples Reach New York From Russia, Mixed With Clay.

NEW YORK, Sept. 6.—(By Canadian Press)—The first sample to reach this continent of the now famous "famine flour" of the Russians has just been received at the offices of the National Lutheran Council, which has a number of representatives doing relief work in Russia. It was sent by a Canadian minister who left his home in Alberta to investigate conditions in Russia and aid in relieving the sufferings of the unfortunate people of that country.

Gritty, dark brown in color, and smelling like new earth from the garden, this substance of which the starving Russians bake their bread appears unpalatable, unwholesome, and totally unfit to be eaten. No substance like it is used for food, nor would be tolerated, by the people of any portion of Canada. The "flour" is composed of the ground up seed of Lebeda, with clay mixed in for adhesiveness. It has been used for eighteen months throughout the Volga region, and is now in use in the Ukraine and the Black Sea area, where the famine is still raging.

The particular sample received by the National Lutheran Council left Russia by way of Poland, being carried along by the cholera refugees who streamed across the border to the west last spring. It was not taken out of Russia as a curiosity to be exhibited, but as the only food to be carried along on the weary journey of several hundred miles on foot. The little box was sent by Rev. Rudolph Kersten, Canadian pastor from Bashaw, Alberta, who volunteered last year to go to Poland to take care of a vacant Lutheran parish which includes four cities and 140 villages.

WAGE QUESTION RAILWAY SHOPS

Hon. James Murdock Hears Protest Against Finding of Majority

OTTAWA, Sept. 7.—Minister of labor, Hon. James Murdock, answering the shopmen's protest against the finding of the majority award of the Board of Conciliation in the wage dispute, assured the shopmen that the department of labor was most anxious to find an amicable settlement but is not at all convinced that anything would be gained by referring back the dispute to the same board on the ground that it had not brought in a finding on the permanent wage question. He said that the Union representatives apparently overlooked many salient facts in the wage question in submitting evidence. He promised to complete the investigation.
