Not? All Are Delighted-with Vicks

Western Families Find It Wonderful for Cold Troubles

British Columbia people became acquainted last winter with Vicks Vapo-Rub, the vaporizing salve for all cold troubles.

In the hundreds of homes where it has, been tried, Vicks is already a stand-by for croup, children's colds, bronchitis, catarrh and various skin hurts and itchings.

oils.

When Vicks is applied it has two immediate actions. Externally, it is absorbed through and stimulates the skin, relieving the soreness and tightness of the chest. Internally, the volatile ingredients, released as vapors by the body heat, are inhaled directly into the affected air passages, loosening the phlegm and relieving the congestion and inflammation.

For croup and common colds you just rub Vicks over throat and chest and cover with a warm flannel cloth. One application at bed-time usually prevents a threatened attack of croup. Colds are ordinarily broken up over night. Croup attacks are usually eased in 15. minutes.

For deep chest colds, tonsilitis, bronchitis, or incipient pneumonia, hot. wet towels should first be applied over the throat and chest, to open the pores

In the United States where Vicks originated, it is almost universally used in preference to internal "dosing." Mothers prefer it for children's cold troubles because it acts directly and quickly, and because it is applied externally and hence does not disturb the most delicate stomach. It is fine, also, for cuts, burns, scalds, bruises, sores, bites, stings, itching skin troubles and other forms of skin inflammation.
