Here and There

Russia has more illiterates, and at the same time, more bookshops than any other country in Europe.

The largest consignment of silk from the Orient for many months, consisting of 5,500 bales, valued at \$9,000,000, formed part of the cargo of the "Empress of Russia" recently.

A shipment of silk from China, consisting of ten carloads, valued at two million dollars, went forward from Vancouver to New York under special guard over the Canadian Pacific lines recently.

The first of a series of six new seaplanes being constructed for the Canadian Government has just been delivered. The new planes are to be used in forest patrol for the prevention of destruction by fire.

Following the disastrous earthquakes and fires which devastated large areas in Japan, the Canadian Pacific liners "Empress of Canada" and "Empress of Australia" were thrown open to the accommodation of thousands of refugees, while the officers and men of the vessels did splendid work in organizing and assisting rescue parties.

The rapid increase in the export butter trade of Saskatchewan during the past year or two, has been the outstanding feature of the Provincial dairy industry. Recently the Saskatchewan Co-operative Creameries made a shipment of 25,000 lbs. of butter to China.

For almost two decades the major portion of the world's supply of cobalt has been derived from the silver-cobalt-nickel arsenides of the Cobalt district, according to figures compiled by the Dominion Bureau of Statistics. The cobalt production of Canada in 1922 was 569,960 pounds, which at \$3.25 a pound, would be worth \$1,852,370.

Canada's trade within the Empire is increasing. For the twelve months ended July, Canada exported to other parts of the Empire goods amounting to \$453,487,899. This is in comparison with \$354,992,074, the figure for the corresponding twelve months previous. Imports from British Empire countries during the two twelve months' periods were: Ended July, 1923, \$195,811,190; ended July, 1922, \$153,185,561.

A wheat crop of 382,514,000 bushels is forecasted in a report issued by the Dominion Bureau of Statistics. The report is based upon the condition of crops at the end of July, and indicates that the Prairie Provinces will produce 357,296,000 bushels of wheat if weather conditions continue favorable. Manitoba, it is expected, will have a total wheat yield of 44,468,000 bushels; Saskatchewan 211,061,000; and Alberta 101,776,000 bushels. Alberta is the only province to show an increased yield as compared with 1922.

A party of five journalists, representing the leading newspapers of Switzerland, who recently arrived at Quebec, are the guests in Canada of E. W. Beatty, President of the Canadian Pacific Railway. They will tour the Dominion in the interests of Swiss colonization. Steps will be made at different points where Swiss people are farming, and opportunity will be given to members of the party to converse with them and get first hand knowledge as to the desirability of Canada as a place for Swiss colonists.

In a letter on "Canada and Land Settlement," published by the Morning Post, Sir Geo. McLaren Brown, European manager of the Canadian Pacific Railway, says that the agricultural salvation of Western Canada lies in mixed farming, which calls for smaller and more numerous agricultural holdings than wheat growing does, and results in closer settlement and better communication. The bigger and more densely settled the rural population, the more social amenities there are and greater advantages generally, he says.

MOTHERS SHOULD NOT NEGLECT BRONCHITIS IN THE BABIES

Mrs. E. Langdon, Kingston, Ont., writes:—"My baby boy had bronchitis when he was two weeks old, he recovered from the attack but took it again, several months later, and on account of the severity I was almost panic-stricken to know what to do for him. My mother advised me to try Dr. Wood's Norway Pine Syrup, as she had used it for several years with splendid results.

I got a bottle, and after I had used it I could see a decided improvement in him; after several bottles he was completely relieved.

My boy is now two years old, and he has never had an attack of bronchitis since.

As a mother, raising a family, I am very grateful to know that I have found a real remedy for bad colds and bronchitis, as it lifts care and anxiety from an anxious mother's shoulders."

Dr. Wood's Norway Pine Syrup is 35c a bottle; the large family size 60c; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Now that each team in the several basketball leagues playing in the city this winter have appeared in at least two games, the most of them in three and some in four, further ideas of the merits of play may be gathered from the score averages as well as from the team standings. These figures often throw a different light on things than does the straight record of wins and losses.

While the Sons of Canada are leading in the Senior League standing, their score averages per game of 31 points is not as high as that of the Colts which is 34. The Teachers seem to be in their proper position with a score average of 27. The Colts in four games have scored 131 points, the Sons of Canada in three, 93, and the Teachers in three, 80. The Colts piled up score with the Teachers while the tighter games with the Sons did not get them so many points. In spite of the fact that the

Sons have a good lead in the standing there is still little to choose between them and the Colts in the matter of quality of play.

In spite of the fact that the High School have been putting up play of a high quality in the Intermediate League, they are outclassed by the Colts in average score as well as standing. The Colts have played three games for a total of 106 points and an average 35 per game while the High School in a similar number of games have totalled 79 points or an average of 26. The Grotto and Elks, playing two games each, have made 38 and 33 points respectively or
