COPPER SALES ARE IMPROVING

Producers Holding Firm for 15c. Whereas Last Week Prices Were Low as 14 1/2c.

NEW YORK, July 19.—Foreign and domestic inquiry shows marked improvement in the copper market and indications are that weak second-hand and smelter offerings will soon be absorbed and out of the way.

Producers are holding firm at 15 cents, delivered. Second-hand and custom smelters are unwilling to sell under 14 1/2 cents, and indications are that prices will be advanced in the next twenty-four hours. Last week sales were made as low as 14 1/2 cents delivered, so that price has opened from 1-8 to 1/4 cent a pound above last week's low prices of 14 1/4 to 14 1/2 cents. Foreign feeling is distinctly better and with domestic inquiry increasing it would not be surprising to see quick recovery to 15 cents. Much depends upon development in the European situation.

Should favorable action grow out of the present developments in Europe, lowness of metal stocks in the hands of fabricators, both here and abroad, and small amount of finished copper and brass goods on shelves of jobbers and in hands of the trade generally would tend to result in rapid recovery in price to above 15 cents. Indications are that fair buying can be expected this week, with disappearance toward the end of the week of most of the under-price copper.

Price of electrolytic copper for domestic shipment is 14 3/4 to 15 cents a pound delivered to end of September, with producers holding at 15 cents firmly and second-hand and custom smelters less willing sellers than last week even at advanced price. Price of Lake copper is 15 cents a pound delivered to the end of September, with little available under that price. Price aside ship New York is 14 1/2 cents, New York. Prices asked by independent producers for shipments to Europe are at levels corresponding with 14 1/2 cents c.i.f. Hamburg or London, with Copper Export Association out of the market.

CROP PROSPECT IS UNIMPAIRED SAYS FIRM OF BROKERS

Will Not be Surprising if Yield Goes Over Half Billion Bushels

Outside some minor damage by hail and excessive moisture crop prospect for wheat in western Canada remains unimpaired says Burdick, Logan & Co. of Vancouver in their weekly report. Acreage is estimated at 20,900,000 acres and yield may easily average 25 bushels to the acre. The present outlook compares with that of 1882 and 1887, and is really much better than in 1916 when the great crop was raised. Prominent grain men say it will not be surprising if more than 500,000,000 bushels of wheat are harvested. Clean up of last year's harvest approximates 370,000,000 bushels. Oats crop promises to be by far the largest on record.

HAMBURG EMIGRATION TREBLES

HAMBURG, July 19.—German emigration from this port during May was more than threefold that of May last year. The emigrants numbered 6,391 including 4,811 Germans. In May, 1922 there were 2,864, of whom 1,516 were Germans.

Her Baby Suffered with SUMMER COMPLAINT

A fact mothers must face is that summer complaint with the prostration, often verging on collapse, which sometimes accompanies this disease, makes it one of the most serious and dangerous to contend with during the hot months.

Thousands of infants die annually whose lives could have no doubt been saved by the timely use of Dr. Fowler's Extract of Wild Strawberry, and it has been the experience of thousands of mothers during the past 78 years this valuable preparation has been on the market, that it is the safest and most effective remedy for use in all cases of looseness of the bowels.

Mrs. S. Lafontaine, Great Desert, Ont., writes: "My baby, when a year old, was suffering with summer complaint. Two doctors attended him, but nothing would stop the vomiting and diarrhoea. A friend told me to try Dr. Fowler's Extract of Wild Strawberry and after the second dose the baby was better and I can say it saved my baby's life."

"I wouldn't be without a bottle of 'Dr. Fowler's' in the house for untold gold." Price per a bottle, put up only by The T. Milburn Co., Limited, Toronto, Ont.

HOSPITAL COMMITTEE MEETS ARCHITECT ON NURSES' HOME PLANS

A committee consisting of S. K. Campbell (chairman), T. Ross Mackay and D. G. Melrae was delegated at last night's meeting of the hospital board to meet A. A. Cox, architect, in regard to plans and specifications for the new Nurses' Home. Mr. Cox arrived from Vancouver yesterday and is about to call for tenders for the erection of the building. The committee met with him today on the matter.

Another question that the committee is taking up with Mr. Cox is that of tendering for the heating pipes and other equipment in the old court house with a view to using it in the Nurses' Home. The Masons, who have acquired the old building, are proposing to sell this material and bids are to be in by Saturday of this week.

ELECTRIC WIRING AT HOSPITAL IS NEEDING REPAIRS

Ernest Love, superintendent of city utilities, reported to the hospital board last night that expenditure of \$360 would be necessary to put electric wiring in the hospital in proper shape. The matter was referred to the house committee for report.

Reporting that the present wiring of the hospital was overloaded, Mr. Love recommended that 100 ampere switches be installed to replace the present 30 ampere switches. He also recommended that all wiring be in conduit that electric fire alarms be installed instead of the present hand bells and that better exit lighting be provided.

REPAIRS AT PACIFIC PLACE HAVE STARTED

City is Doing Work and Railway Company is Paying For it—Crushed Rock and Macadam

The much needed repairs to Pacific Place leading from First Avenue and Second Street to the G.T.P. wharf approach have at last been started. The city is doing the work and the railway company will pay for it. After a foundation of crushed rock has been laid, the street will be resurfaced with waterbound macadam.

H. S. Wallace arrived from Vancouver on the Prince Rupert yesterday afternoon. He is here in connection with his business interests in the city.

FISHERIES MEN VISITING CITY

A. L. Hager is Here With Directors of New England Fish Co.—on Tour of Coast

A. L. Hager of Vancouver, western manager of the New England Fish Co. and president of the Canadian Fishing Co. and the Atlin Fisheries Ltd., arrived in the city on the Prince Rupert yesterday afternoon. He is accompanied by E. P. Randlett and Dana F. Ward, directors of the New England Fish Co. from Boston. A. Z. De Long, prominent Vancouver insurance man, and E. H. Grubbe, manager of the Cordova Street East branch of the Bank of Montreal, Vancouver, are also members of the party.

The trip of the party is in the nature of a combined business and pleasure tour. Mr. Hager taking the opportunity of paying his first visit to the new plants of the Canadian Fishing Co. along the coast and at the same time personally conducting the Eastern directors on a trip of inspection to their interests. On the way up the coast they have visited the Shushartie Bay, Margaret Bay and Butedale plants, having boarded the steamer Prince Rupert off the last-mentioned point yesterday morning. Today they are inspecting the local situation and the Atlin Fisheries plant and tomorrow they will embark for Ketchikan where the New England Fish Co. has a halibut cold storage plant. From Ketchikan they will return south to Vancouver. The party enjoyed some splendid trout fishing in the lake at Butedale.

GIVES ADDRESS TO LOCAL MOOSE LODGE

Sigurd Wallstedt Tells of Work Being Done at Mooseheart

Sigurd Wallstedt of Alaska, gave an interesting address to the local Moose Lodge at Metropolitan Hall last night.

Mr. Wallstedt has recently returned from a visit to Mooseheart, Ill., and was full of enthusiasm for the great work being conducted there and at Moosehaven for the conservation of childhood and the care of the aged. Some 1200 children are being reared and educated at Mooseheart under the banner of the Loyal Order of Moose. He made the striking comparison that while a quarter million babies were dying yearly in the States for lack of nourishment and proper maternity conditions and 1,500,000 children were annually sacrificed on the altar of child labor, at Mooseheart the death rate is less than 1-5 per cent.

"Education is often looked upon as a means to escape labor," he said, "but instruction at this great institution is based upon the idea that education furnishes the tools for achievement."

Mr. Wallstedt will remain in the city a few days before returning north.

DEEPENING WATER AT LUMBER WHARF

Railway Company Putting Dredge at Work to Clear Out Ledge of Rock

To give more depth for boats of the larger type loading at this port, the Canadian National Railways are about to start dredging operations at the lumber assembly wharf. Difficulty was experienced in loading the steamer Canadian Transporter when she was here for lumber last month because of the fact that there is a ledge of rock running out from

Blind Man's Buff

EVEN in this age of enlightenment some folks spend their money blindly. They buy with their eyes shut. They grope in the dark as truly as if their eyes were bandaged.

And all the time a powerful light is being thrown on the very things they need and want!

Advertising is a beacon to guide you in buying. It shows you what to buy--- where to buy--- and when to buy. At the same time, it protects you against fraud and inferiority.

Merchants and manufacturers who advertise deliberately focus thousands of eyes upon their wares. Their values must be honest and their prices right, or they could not advertise successfully.

Don't play blind man's buff with the elusive dollar. Spend a few minutes each day running through the advertisements in this paper. Then buy the products that have proved up in the light of advertising.

Read the Advertisements.
