DAILY EDITION

WHOM Friday, October 5, 1923.

Financial Position Of Canada Today.

Canada's financial condition compares favorably with other countries, in spite of efforts being made to convey the impres- John Stubson, Hagensborg, Amersion that it does not.

In 1914 Canada's taxation per capita was \$21.21; in 1922 it was \$42.63—an increase of 100.99%. Our national debt per Herbert capita was \$43.67 in 1914; in 1922 it was \$270.12—an increase of 516.25 per cent. In Australia the per capita expenditures was \$27.39 in Charles Albert Giggey, Terrace,

1914; in 1922 it was \$57.32-an increase of 163.90 per cent. The per capita debt of Australia in 1914 was \$18.96; in 1922 it was \$359.60-an increase of 1801 per cent.

In New Zealand, the per capita expenditure in 1914 was \$55.32; in 1922 it was 111.06—an increase of 100.76 per cent. or practically the same as Canada's increase. The debt per capita in New Zealand was \$409.45 in 1911; in 1922 it was \$811.90-an increase of 98.29 per cent.

In South Africa the per capita taxation of the White population was \$58.07 in 1916; in 1922 it had grown to \$96.03-an increase of 65.36 per cent. The per capita debt of South Africa (White population) was \$424.35 in 1914; in 1922 it was \$533.05—an increase of only 20.15 per cent.

As compared with the sister Dominions of Australia, New Zealand and South Africa, our Federal faxation and our per capita debt are away below theirs while our national wealth per capita, the value of our resources, and our per capita production of new wealth are all greatly in excess of theirs. We have doubled our per capita national expenditures since 1914. Australia has increased hers by 164 per cent. Our national debt per lowing: capita has increased since 1914 by 516 per cent. Australia has increased hers by 1802 per cent.

The per capita national debt of Australia is \$89.48 greater Jens Dahl, Prince Rupert, Northan Canada's. The per capita national debt of New Zealand is \$541.70 greater than Canada's. The national debt of South Africa (White population) is \$262.96 greater than Canada's.

Comparison With

Mother Country. The comparison with the Mother Country whose staggering burden during the war was, of course, immeasurably greater than ours, is still more striking. The revenues or in other words, the taxation of the United Kingdom in 1914 averaged \$17.06 per capita. For the last fiscal year, converting sterling at par, the taxation was approximately \$100 per head of population, estimating the total population at 44,000,000. The increase in per capita taxation from 1914 is approximately 577 per cent as compared with Canada's increase of only 100 per cent.

In regard to the net debt per capita, Great Britain at the beginning of the war, had a per capita debt of \$74.83. It is now approximately \$850 per capita; an increase of over one thousand Charles Oscar Ortquist, Prince per cent as compared with Canada's increase of 516 per cent.

United States Figures Large.

Turning to the United States, the comparison with Canada 'also affords considerable consolation to the Canadian taxpayer. In 1914 the United States was spending on its Federal administration \$7.42 per capita. In 1920 this had mounted to \$63 per capita as compared with Canada's \$42.52 per capita. In 1921 the United States reduced its per capita taxation to \$52.05 and last year to \$37.35 per capita as compared with Canada's \$42.63 per capita last year. The increase in the public debt of the T United States was \$10.41 per capita in 1914 to \$206.77 per capita in 1922, an increase of no less than 1886 per cent as compared with Canada's increase of 516 per cent. The percentage increase in per capita taxation was 403 per cent, from 1914 to 1922 as compared with Canada's increase of 100 per cent.

The satisfactory feature of the American budget for, the last three years is that both the per capita debt and the per capita of the Mainland Fire Under- then proceeding to Victoria for a taxation are being steadily reduced and the comparison with writers Association tendered a similar purpose, He spent two IT is suggested that a person Canada's efforts during the first two of these years serves to complimentary banquet to F, days here making a thorough in- needs to live longer today than bring more forcibly into relief the fact that we did not seriously Seley, assistant manager, af the vestigation into the circulation he did fifty years ago or he start upon our own attempt to secure an equilibrium between G.T.P.
