

"I Had Bilious Attacks and Stomach Weakness"

Mrs. Wm. Robinson, Yorker, Saak., writes: "I suffered from stomach and liver trouble, and used to have bilious attacks so bad that I could do nothing for weeks at a time. My stomach would be so weak that not even a drink of water would stay on it. On my sister's advice, I began to use Dr. Chase's Kidney-Liver Pills, and must say that they have made me feel like a new woman."

DAILY EDITION

Tuesday, October 9, 1923.

Now Is Time For Winter Gardens.

This is the time to plant the winter window garden. No flowers are so beautiful, and so fragrant as those grown from bulbs during the winter or early spring and they do well in Prince Rupert as many can testify. The mild climate here makes the growing of winter flowers easy compared with places where cold is more intense.

This is the season to plant hyacinths, narcissus, lilies, tulips, daffodils, jonquils, crocuses, and next month the lilies of the valley should be started.

Soil for bulb growing should be rich, preferably made up of one third garden loam, one third leaf mould and one third decayed stable manure and a little sand. However these ingredients are not absolutely necessary, but spent soil from old window boxes should be avoided.

After potting, bulbs should be set in a darkened place to allow the roots to grow, with the possible exception of freesias, oxalis, callas and lilies. If they are forced too quickly the flowers will not be as large. If the bulbs are allowed to dry out, the leaves will grow but not the flowers.

Many people grow hyacinths in glass containers without any earth, and with good results. One warning is necessary and that is, it is useless to attempt to grow flowers, unless you are fond of them and unless you are willing to give them a little regular attention.

Greatest Little Man In The World Today.

Lloyd George is by many people looked upon as the greatest little man in the world today. Naturally, being still in politics, he has many enemies but most of his political enemies are willing to overlook his shortcomings in recognition of his greatness. It remained only for a few female fanatics in New York to show their hostility to one of the world's greatest men. In spite of the silly antics of those few, the great mass of the American people realize his worth as was shown by the fact that he was given the greatest reception in New York accorded to any man with the exception of General Pershing on his return from the war.

Lloyd George is a man who appeals to the Canadian or the American. He is a simple person, without titles and without the handicap of a cumbersome lineage. Like Gladstone he is a real commoner and is not even a member of the established church.

The great thing about Lloyd George is that in addition to being a man of outstanding mental ability he lives a clean life, refuses to be fuddled by alcohol and all his influence is used to promote better living among the people of Britain and the rest of the world. All we regret is that he is not able to see British Columbia on this trip and to travel over the C.N.R. by way of Prince Rupert.

Mountain Climbing As An Asset.

Mountain climbing should be an asset to Prince Rupert. Not only should it become a popular pastime for local residents but it should also be used as an attraction to tourists and others who might be induced to remain in the neighborhood for some time if it could be made known to them what wonderful scenery is going to waste at the top of such places as Mount Morse.

Some time ago W. E. Williams started an agitation to have a trail cut from the city to the top of Mount Oldfield. It was an excellent project and one that would have made climbing the mountain popular. Unfortunately Mr. Williams has been out of town a good deal this summer and the matter was not pushed.

While the view from Mount Oldfield is very fine it does not compare in extent or grandeur with that from the Mountain across the harbor, and the climbing conditions are better up Mount Morse than they are on Kaien Island.

FIFTH AVENUE GRADING PLANS

Further Discussed by Council Last Night and Laid Over Pending Receipt of Estimates

SURFACING AND SIDE WALK WIDTH DECIDED

Further progress was made by the city council last night in connection with the local improvement bylaws providing for the grading and surfacing and building of a sidewalk on Fifth Avenue East and Hays Cove, Circle from McBride Street to Hays Creek Bridge to replace the present plank roadway. A plan for surfacing by using local rock for a base, Smith Island rock for the top, bound with outside and local sand was adopted and it was decided to build the sidewalk to a width of five feet four inches. The question as to whether contour grade or a cut of three feet on the hill with a corresponding fill will be followed will be left over until further figures are received. Payment by five or ten year bonds was discussed but no decision was reached. In the meantime the bylaws are being sent south for the approval of Robert Baird, inspector of municipalities.

In connection with the sidewalk, which it was first proposed to make on the north side of the grading, City Solicitor Jones drew attention to the portion of the act which stated that the property on the side of the street in which the sidewalk was to be built would have to bear the cost. Ald. Munro expressed doubt as to whether or not this would apply to a street of this nature which was not being permanently graded to its full width. City Solicitor Jones was firm in his opinion that it would. Further information is to be sought pending a final decision as to which side of the street the walk is to be built on.

Favors Project

Speaking on the project as a whole, Ald. Collart sought to correct the impression that the council was opposed to it. Resources were, however, limited and care should be taken that too much of the city's credit was not used up on any particular piece of work at the expense of other work that would have to be taken care of.

Period of Payment

Mayor Newton suggested the adoption of the five year plan of payment instead of ten as a means of sustaining the city's credit.

Ald. Collart opposed a hard and fast rule in this regard. Future councils could not be bound and anyway the value of the property must be considered. Some properties might not be able to stand the annual cost made necessary by five year payments.

Ald. Stephens concurred in this view but felt that definite figures of cost should be presented before any plan of payment was finally adopted.

Ald. Munro felt the property on Fifth Avenue could stand the five year plan.

Matter of Surfacing

The plan for surfacing was then discussed. Ald. Munro favored the use of local rock as a base and Smith Island rock for the surface. The city engineer estimated the former would cost \$3.75 a yard and the latter \$5, but he (Ald. Munro) thought the latter could be obtained at a lower figure, perhaps not exceeding \$4 very much. Ald. Col-

Instrument Illustrated Victrola No. 260 \$200.00

Theatre of the Home "His Master's Voice" Victrola

To audiences in homes throughout the land, "His Master's Voice" Victrola brings all the entertainment of the world's greatest, most famous artists. Think of it in terms of a great animate theatre—a conservatory of music, through whose welcoming doors your fancy may pass at will.

Based on the same principles which give the human voice or the very finest violin their powers of reproduction—it IS the human voice, it IS the voice of the violin.

Only the living presence of the artist is missing but even this is overcome, for its performance pictures their personalities in a subtle lifelike

something—peculiar alone to this marvelous instrument. Combined with "His Master's Voice" Victor Records—it is the singer and his song. It were just as unthinkable that any instrument could take its place as that someone ELSE could be a Caruso, someone else could substitute for a Galli-Curci, a McCormack or an Elman.

No voice can take the place of "His Master's Voice". Pay it the homage it deserves. Prevent substitution by demanding that the instrument you buy bears our famous trade mark "His Master's Voice" (under the lid). Years of pleasure will repay you for this caution.

Genuine "His Master's Voice" Victrolas from \$37.50 to \$615.00

Red Seal Records now double-sided. Two selections for practically the price of one. New catalogue listing all double-sided Red Seal Records now ready. It's free.

HIS MASTER'S VOICE, LIMITED

fact suggested that better results and more economy could be obtained by discarding the present rock crusher in the city and buying a new one. The latter would soon pay for itself in the saving effected over using the present one which was very unsatisfactory. Ald. Munro felt that a new crusher could not be obtained in time to be used in time for this work.

Further discussion followed leading up to the grade that should be adopted, namely contour or three foot cut on the hill. Ald. Stephens felt the council, in deciding on the width of the sidewalk and the nature of the surfacing, had gone as far as it could at this time. The city engineer should now make his estimate giving the council ample time to consider it. It was finally decided that decision on the grade be laid over pending the receipt of the estimates.
