CHOLERA INFANTUM
A Fatal Disease of Children

Cholera infantum or summer complaint of children is one of the most dangerous bowel complaints during the summer months.

It begins with a profuse diarrhoea, the stomach becomes irritated, very often accompanied by vomiting and purging and the matter excreted from the stomach has a bilious appearance. The child rapidly loses flesh, is soon reduced to languor and prostration, and in a great many cases death ensues.

Mothers, if any of your children become sick with cholera infantum do not endanger their health, perhaps their life, by experimenting with some new and untried remedy; get one that has stood the test of time; one that will quickly offset the vomiting, purging and the diarrhoea. This you will find in Dr. Fowler's Extract of Wild Strawberry, a remedy that has been on the market for the past 78 years.

Mrs. W. A. Harrison, 10 Elevator Court, Halifax, N.S., writes:—"Dr. Fowler's Extract of Wild Strawberry saved the lives of three of my children when all other remedies failed. It stopped the vomiting and terrible diarrhoea with which they were troubled. I always keep a bottle of it on hand in case of emergency." "Dr. Fowler's" is 50c a bottle; put up only by The T. Milburn Co., Limited, Toronto, Ont.
