They'll turn you up every time." Ryan's remarks were directed against Irene Adams, the Mineapolis girl, who helped the olice to find Brown, and whose telephone message resulted in he latter convict being shot ead by a detective as he was

9 Oh no, Mother, there is no need to worry about Jim's health. These symptoms of piety and unnatural goodness are quite seasonable. You know what's coming next month.

Father need not worry about his pocket book either. Children demand things that are new and interesting and modern, rather than expensive

I Yes, it is true he has a lot of young people to remember and buy presents for, but hundreds of factories know this and have been making things for twelve months to help him out of his difficulties.

There are Not so Many Stations Operating Now as at One Time-Ottawa Gives Attention

OTTAWA, Dec. 27 .- To be or not to be subsidized is a question which is engaging the attention of radio broadcasters throughout Canada, and which may soon require from the Dominion government a definite 'Yes" or "No." There are over 100,000 radio users in Canada and broadcasting is the life of the radio world. Again, it is of importance to Canadians that as much as possible of the broadcasting should be of Canadian

The radio vogue, too, has built un a new and flourishing industry in Canada—the making of radio supplies and there are features to it that make it desirable to have the radio encouraged and assisted ... Those at the head of the radio branch of the Department of Marine and Fisheries, however, are at a loss to learn how best to get their assistance to radiodom.

There Are Objections Encouragement of some form to the broadcasters would be one means, but if this were carried out the Dominion Government might be open to the accusation of subsidizing instruments of propaganda in its favor, such as newspapers which installed radio broadcasters. It is now being done in Manitoba, where the Provincial government it operating a broadcaster through the Telephone Commission's facilities. HROUGH the medium of slender strips of celluloid an actor appears simultaneously on thouands of screens in as many different towns. On the same evening, he entertains great armies of film fans who eagerly pay their money to see his performance.

Advertising does the same thing for a merchant or manufacturer. In a single day it takes his message into thousands of homes---to tell folks why they should have his goods and how to get them. Advertising endows him with a thousand voices with which to tell his story.

But the value of advertising is by no means confined to the advertiser. It has a very definite value to you.

A glance through this paper enables you to sift out the things that interest you. Sitting in your easy chair you can compare values and prices. in a moment you can tell exactly where to go for what you want and how much to pay.

Figure how much useless walking and talking and how much actual money you can save by spending a few moments daily with the advertisements.
