A shoe to fit the foot not the foot to fit the shoe

OR how many years have people spoken of "breaking in" a pair of shoes, i.e. suffering tortures till the foot had, in time, shape the shoes to fit the foot? But now Arch Defende have banished all that and your foot glides the shaped-to-nature insole of the shoe like glove to the hand. Note also how different ar shapely is the last upon which Arch Defender are built compared with the old style.

In addition to the concealed Spring Steel Support and the special foot-form insole, the lasts upo which Arch Defenders are built, with their cupped heel and foot-contour sole, are so different from the flat shapeless lasts of ordinary shoes
