#### Three Million Dollar Company Being Formed Following Merger Large Group Bear River Mines

VICTORIA, June 1.—With the opening of the season in a mining way, probably nothing is attracting greater attention among those interested in the Stewart camp than a recently organized group which goes under the name of the McCallum merger. Major A. H. McCallum, of this city, who is responsible for the organization, has just returned from Stewart, the attractive point for mining men at present.

The consolidation that has been effected takes in over sixty claims in the Bear River district. The groups include the International, formerly held by the Bear River Company; Rock of Ages, by Dan Munroe; Dalhousie, by George Cameron; Harry Seovil group, I.X.L., by Major McCallum and associates; Grey Copper, by William Forrest, and Argyle, by Hanson & McCallum. While in the North, Major McCallum secured a few other properties for the consolidation.

The merger is to be known as the Stewart Consolidated Gold Mines, Ltd., with a capitalization of \$3,000,000. The directors will be composed of residents of British Columbia. An active season is planned, looking to the expenditure of at least \$100,000, devoted to proving up the promising properties under control.

**Well-Located Property**

The incorporation of these properties is attracting considerable attention, not only in Stewart, but in all coast cities. This is not only caused by the position of the properties, which have a frontage of 6,000 on the bonanza property of this continent, the noted Premier mine, but also to the large exposures of high grade ore on the groups selected. On one of the properties a huge vein occurs about one hundred feet in width, which carries values in various minerals, including gold. Samples presumably picked, have been assayed, and give returns of several thousand dollars per ton in gold. This ledge has not been opened, but if these values persist with depth, the mine should prove to be one of prime importance.

The silver values on all of the groups runs very high, and the exposures of the ore show unusual strength and persistence. An average smelter return from one of these veins gave three hundred and fifty dollars in silver alone, and this when silver was very low in value as compared with present prices. Large samples taken from the hanging wall of the vein give over fifteen hundred dollars to the ton in silver.

**Prove Bear River**

It is evident, therefore, said Major McCallum, that when these mines are fully developed, that the Bear River side of the Premier mine will prove to the world that properties of great value also occur. This is more particularly the case as it is a well-known fact that many other properties of great promise also occur in that valley. American capital, however, is active there, and several of these have been acquired by large organizations controlled by our friends to the south of our boundary line. Of course, American capital is welcome here, and investors from below the line are given the same protection and fair play as Canadian and Old Country people receive. Major McCallum and his associates, however, desire to encourage the investment of the Canadian and British capital in this now famous district, and with this view a percentage

#### LUMBER TO MOVE SOON

**"Baby Squares" For Japan Will Arrive From Interior Next Week**

The 500,000 feet of lumber, which is to be shipped from the George Little mill at Terrace, the Lakelse Lumber Co.'s mill at Amsbury and the Royal mill at Manall to Japan will start moving to this port next week, it is anticipated. An inspector is expected from the south tomorrow to pass on the lumber.

On arrival here, the lumber, hemlock "baby squares," will be unloaded at the lumber wharf. The C.G.M.M. Canadian Transporter, which is to take the lumber to the Orient, is due in Vancouver today and is scheduled to arrive in Prince Rupert for the cargo on June 23.

#### TEN KILLED IN RELIGIOUS RIOT IN MEXICO CITY

MEXICO CITY, June 1.—Ten persons were killed and seventeen were wounded in a religious riot when a mob attacked the provincial palace and disarmed the mounted police and soldiers patrolling the streets.

of stock, sufficient to control the project will first be offered here, at Montreal and in London.

#### Essentially Gold Area

Mining operations are frequently looked upon as being too venturesome to be considered as a good investment, but under present world-wide market conditions, it must be admitted this conception must and is being reconsidered. The demand for gold is now overwhelming from all countries, and business cannot be fully stabilized until the supply of that precious mineral is largely increased.

The Stewart mining area is essentially a gold camp, notwithstanding the high grade silver veins found. This fact is assured by the existence of the huge porphyritic dyke that runs all through the section, and also by statements of engineers and geologists that the Premier lenses run easterly, in other words, into the Bear River. The great Granby organization has secured property in this vicinity and has been carrying on extensive exploration work for a long period, the results, of course, being only known to their engineers. One of the outside properties of the McCallum merger is adjacent to these properties. Several prominent citizens of Victoria and Vancouver are already interested in the new incorporation, which is now being organized.

#### IT ISN'T YOUR TOWN, IT'S YOU

If you want to live in the kind of a town, Like the kind of a town you like, You needn't slip your clothes in a grip, And start on a long, long hike, You'll only find what you've left behind, For there's nothing that's really new, It's a knock at yourself when you knock your town, It isn't the town, it's you.

Real towns are not made by men afraid  
Lest somebody else gets ahead,  
When every one works and nobody shirks,  
You can raise a town from the dead,  
And if while you make your personal stake,  
Your neighbors can make one, too;  
Your town will be what you will want to see,  
It isn't the town, it's you.

#### ANNIVERSARY OF BAPTIST CHURCH

**Will be Celebrated Next Sunday—Fourteen Years Activity**

Fourteen years ago in a tent owned by the late T. C. Birnie, a few Christians, drawn together by a common bond, determined to have a Baptist Church in Prince Rupert. After overcoming many obstacles, a full year after their tent meeting, the Baptist church was organized, the first meeting-place being the old feed store near the Salvation Army Citadel which is now a carpenter's shop. From there the church moved to McIntyre Hall, and during that time large gatherings attended the services. Very few of the charter members are now in the city. Almost all have gone to pastures new.

With the growth of the city, there came the need for a real church building and the result of the efforts to secure it now stands on the corner of Fifth Avenue and Young Street, a structure of which the Baptists are justly proud.

After the departure from the city of Rev. W. H. McLeod, the first pastor; W. W. Wright was called to the pastorate, was ordained in August 1914, and retained Pastorate doing efficient work until the calls of war depleted the young church of a large measure of its man-power, twenty-four members of the congregation responding to their country's call. Since then there have been various changes in the pastorate, among those ministering being Rev. G. Dunlop, Rev. G. B. Rowell and Rev. W. H. Redman, now in Victoria.

A long need of the church has been a settled ministry. This bids fair now to be met as the present pastor, Jas. J. Smithson, hopes to have Mrs. Smithson and family with him on his return from the Convention, for which he leaves next week. They will take up their residence here.

Special anniversary services are being held in the church next Sunday, notice of which will be given tomorrow. On Tuesday, Missionary Pageant, depicting life in different countries, will be given in the church.
