PEPS

the real breatheable tablets, make the throat, chest, and lungs cold-resisting. When a nasty cold or a coughing bout foretells the revival of your old bronchial trouble, the best thing to do is to take Peps at once to strengthen and

PROTECT

the chest. When a Peps tablet is taken from its preserving silver wrapper and allowed to dissolve in the mouth, it gives off powerful medicinal and germicidal fumes that immediately circulate with the breath through all the air-passages, and destroy any germs that have got into

YOUR

nostrils and throat. At the same time the sore, inflamed membrane is soothed, healed, and protected, phlegm is released from the bronchials, breathing is made easy, and that distressing cough and throat soreness disappear.

By this direct treatment Peps keep trouble off the

CHEST

and lungs, and the worst weather can be faced without fear of evil consequences. It is the safest plan to always have a few Peps handy to arrest a cold, and prevent it reaching the lungs or starting bronchitis and chest weakness.

SOME COMPARISONS MADE IN RAINFALL

VICTORIA, Oct. 26. — Despite the rainfall of the last few days, Victoria's annual precipitation, the publicity bureau seizes the opportunity to point out, is comparatively light. A new comparison table just compiled shows that the yearly rainfall is 27.45 inches, exactly the same as that of the famous summer resort of Brighton, England. Of twelve other well-known cities, Brighton and Victoria stand lowest in the amount of rain. Vancouver heads the list with 59 inches, over twice as much as in Victoria. Jumping right across the continent, Halifax is next with 58 inches. Portland, Ore., and Sydney, Australia, each have a rainfall of 47 inches. New York has 45 inches; Auckland, New Zealand, 42 inches; Seattle, Wash., and Guernsey each have a fall of 35 inches; Naples' annual rainfall is 24 inches, Chicago's 33 inches and Toronto's 32 inches.

CANDIDATES PROPOSED FOR THE MAYORALTY

Major Gibson Prominently Mentioned as One Who Would be Likely to Receive Strong Support

Mayoralty candidates are already being discussed in civic circles, and a number of names are being mentioned as likely to come before the people at the election in January.

It is generally understood, although not officially announced, that Mayor Newton will again be a candidate. Several of the aldermen too are being discussed but no one seems to be quite sure whether any of them would consent to nomination. The names mentioned most prominently are George Munro, M. M. Stephens, Theo. Collart and S. D. Macdonald. It is understood also that the aldermen have no particular corner on the candidatures. Two former mayors are also being mentioned as possibilities. Both ex-mayor McClymont and ex-mayor Rochester are said to have had the matter brought to their attention with a view to securing their consent to nomination.

Perhaps the most serious suggestion outside the council is that of Major Gibson. He has already been requested to give the matter serious consideration, it being felt that his independent position coupled with his well known ability fit him for the position and that he would make a splendid mayor. A number of citizens it is said are willing to back the major if he will only consent to go into the contest.

WARM WEATHER IS SIMPLY A CYCLE

BERLIN, Oct. 25.—The warm weather reported from the Arctic regions is not to be taken seriously, according to Prof. Karl Kassner, of the Berlin Meteorological Institute. A hot wave hits the North Pole about every 35 years, and this is the time it is due. The climate does not really change. Warmer weather comes in cycles, and history is merely repeating itself. Antics of the sun are supposed to be responsible for the changes which come in the Arctic regions, as well as elsewhere in the world.

The rise in temperature in the Arctic regions has been going on now for several years, Dr. Kassner continues, if the reports of Norwegian fishermen may be believed. Dr. Boel, the Norwegian scientist, discovered new coal fields in Spitzbergen last August because of the thin covering of ice which lay over the ground. A Norwegian captain who has sailed the Arctic for 34 years reports that he began to notice the appreciable lessening of the ice five years ago, and that the flower and animal life have been much changed by the milder climate.

HAWAII MAY BE RADIO HUB OF PACIFIC OCEAN

HONOLULU, Oct. 25.—Hawaii is destined to become the radio hub of the Pacific, according to Arthur A. Isbell, of the Radio Corporation of America. Due to its geographical location at the cross roads of the Pacific, the territory is the logical location for army, navy and commercial radio stations working with the United States and the remainder of the Pacific area.

Chin Ying, Chinese, 618 Seventh Avenue, West, was found guilty by Magistrate McClymont in the police court this morning on a charge of supplying liquor to Indians and was fined $200 and costs. The prosecution was in the hands of the Royal Canadian Mounted Police and Milton Gonzales defended. Peter Wesley was the star witness.
