In Prize Fight. People love a fight and adore a fighter. While it is matter of common knowledge that prize fighting is rather a degrading business and few prize fighters have ever amounted to much as citizens, yet there is something about the sport that attracts vision was upheld. the average man and holds him. Hundreds of people in every community of the United States and Canada and even of Europe anxiously awaited the result of yesterday's glove fight, even though it was expected to be a one-sided game. There was a phase of human nature appealed to, perhaps not the highest, but one that is deep seated in almost every man in the big contest between two physical super-men.

Those who have watched prize fights have noticed the type of men who are most in evidence on such occasions. Any man who gets his living in an illicit manner is there. Any man with a remnant of the barbarian about him has a prominent seat. As ! the barbarian is still dominant in most people at some time in their lives, most people either would like to watch a prize

fight or read about it.

We are still savages at heart even though we profess and try to make ourselves believe that we are becoming more civilized and that the brute nature is being subordinated to the spiritual.

#### Fourteen Millions To The Good.

The Canadian National Railway is fourteen million dollars to the good over last year's record, so far as reported, and the prospect is that the increase will go on throughout the year, closing with a balance in favor of the new management of at least thirty million dollars. It is a good record and one that will make the railway president solid with the people of the country.

Of course there were people who hoped that the railway would be a failure and that they would be given an opportunity to buy it for next to nothing. They have circulated reports about Sir Henry at various times and other interests have been none

too friendly.

One great thing about the new management is that all reports indicate a great improvement in the quality of service to kind we see there would be of the city to elect to office the the public. If the national railways can be made to properly sufficient. serve the people, that is what is wanted. Public service is needed from a public railway and the cost must not be too great. At the present rate of progress it looks as if the railway would democracy, Britain is attempting boards and the hospital board. Arm. in time become an asset instead of a liability.
