ACCUSE GREEKS OF
CRUEL TREATMENT

Albanian Minister in London
 Makes Protest to British
 Government

LONDON, Jan. 23. (Associated Press).—While Greece has been raising pathetic cries to the world against the treatment of her subjects at the hands of the "terrible Turk," she has been practicing the same sort of brutality and unwarranted persecution upon thousands of Albanians within her own borders, according to Mehmed Bey Konitza, the Albanian Minister to London, who has just made a vigorous protest to the British government on this subject.

This protest was made after M. Konitza had received official reports from his government at Tirana stating that the Albanian population of Tehamouria, a province near the island of Corfu, was in terror as a result of atrocities committed by the Greek Civil and Military authorities. Tehamouria, although it was ceded to Greece in 1913 by the Conference of Ambassadors in London, contains more than 100,000 Albanians, constituting the great majority of the population, who have been attached to the soil since antiquity.

Campaign of Persecution
 When Greek refugees began to pour in from Asia Minor, said M. Konitza, the great problem of finding homes for them became a perplexing one, and the Greeks, it is alleged by the Albanians, began their campaign of persecution in order to force the Albanian peasants to leave their ancestral soil to make room for incoming refugees.

Instances after instance of cruel treatment is recited in the official reports received by M. Konitza. One of the most striking was that which took place late in September when a Greek officer, according to the report, summoned the inhabitants of Rakelke, in the neutral zone, and marched them off to unknown destinations, under the pretext that they were to be searched for arms. The men of this group, the report says, were beaten almost to death and the women were handcuffed and forced to walk barefooted over a specially prepared spiked path.

Moslems and Christians
 Another instance recited was that of a large number of Albanian Moslems and Christians, placed in a stream up to their necks, forced to remain over four hours, taken out, cruelly thrashed and then exiled.

Albania, declared M. Konitza, looks to Great Britain and America to come to the aid of these unfortunate Albanians. Since these things have happened, he said, all the Albanians in Greece are living in constant terror lest the same treatment be visited upon them.

AEROPLANES TO PLAY
PART IN PROTECTION
OF ONTARIO FORESTS

Immense Mileage to be Covered
 Under Contract With
 Government

TORONTO, Jan. 22. — Aeroplanes will play an important role in the operations of the Department of Lands and Forests of the Government of Ontario during the year 1923. The arrangements entered into with the Laurentide Air Service Ltd., between 100 and 1,200 hours flying will be done by that concern for the Ontario government during next season. It is understood that the Department plans to

Her Heart Skipped
Every Third Beat

Mrs. James Burleigh, 248 King St. E., Chatham, Ont., writes:—

"I think it my duty to let you know what Milburn's Heart and Nerve Pills have done for me.

I suffered for years with palpitation of the heart, my nerves were very bad, and I could not be left alone at any time. I doctored for over a year, and the doctor said my heart was very bad as it skipped every third beat.

I gave up just at this time, and then my mother advised me to try Milburn's Heart and Nerve Pills, saying my eldest brother had been relieved by using them when he was very bad with his heart and nerves. I got a box and started to take them, and when I had used it I felt a lot better. I could sleep a little and felt stronger. I continued taking them for about three months, and felt better than I had for years.

When I think of the misery and suffering I went through before I started Milburn's Heart and Nerve Pills, I feel like letting everyone know what they did for me."

Price 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

carry out a special aeroplane survey of extensive territories which are difficult of access by the ordinary methods of transportation. Where opportunity is afforded for suitable landing places in territories of which more detailed information is required as to resources and physical features, ground parties will be taken in by aeroplanes to do the work.

These air maps will show many small lakes and rivers which are shown on existing maps while at the same time it will be possible to locate new mineral resources and compile entirely new and accurate maps in a fraction of the time and at much less expense than would be otherwise possible.

Viking Amphibian

The machines to be used are of the same type as used last year when 12,000 square miles of northern territory bordering the main line of the Transcontinental railway and Hudson's Bay were surveyed for the Ontario government. The Vickers-Viking Amphibian which lands and takes off from either land or water is a sister ship to the machine in which Sir Ross Smith was to have flown

round the world and a Loening air yacht which until very recently held the world's speed and altitude records for flying boats. A number of machines specially designed for forestry operations which are at present being built will also be used, the details of which are, however, being kept strictly secret.

100,000 Miles

In flying on this contract the machines will cover a total distance of probably 100,000 miles or a mileage almost equal to four times round the world at the Equator.

PROHIBITION
FOR MEXICO

Bill Likely to be Introduced at
 Next Session of Congress

MEXICO CITY, Jan. 23.—The "wets" are breathing a trifle easier, now that it is impossible for a "bone dry" bill to be considered by the present regular session of congress, which adjourns sine die, December 30. Although there was small fear that such a measure would pass the lower house, it was expected in many quarters that the "dry" element, receiving inspiration from certain high government officials, would attempt to have such a bill at least brought up for discussion. But other legislation intervened, and a new liquor law was forgotten.

It is now considered likely that when congress meets in regular session next May, a prohibition bill will be introduced and the various organizations in the republic dealing with the manufacture and sale of intoxicants are already conducting a vigorous campaign to counteract the "dry" propaganda.

A "bone dry" Mexico is not generally considered here as even a remote possibility, but it is believed that drastic regulation of the low mountains will be under-
