PREHISTORIC PAST OF THE PHILLIPINES

Recent Discoveries Indicate Islands Were Once Inhabited by Chinese

ANN ARBOR, Mich., Oct. 30. -The veil has been lifted from the prehistoric past of the Philippine Islands and discoveries have been made rivalling those in the tomb of Tutenkhamin, according to a report which has just been received at the University of Michigan from Dr. Carl E. Guthe, heading an archaeological expedition now in the islands.

Dr. Guthe's report hints strongly for the first time Chinese formerly inhabited the island, a conclusion which he says is substantiated by the deposits unearthed by him during the last year. Material so far discovered, Dr. Guthe's report says, includes hundreds of pieces of pottery, broken and unbroken. much of it of the Ming period. some Tang, some Sung and much yet to be identified. There also have been found human bones chip-stone and iron implements and weapons, copper and bronze articles, gold inlaid teeth and gold, shell, coral, glass and stone ornaments.
