Neptune Holds Court on a Famous Canadian Ship

A REMARKABLE photograph of the ceremonies that took place when the Canadian Pacific steamer "Empress of France" crossed the line on her recent "round-the-world" tour. Neptune accompanied by his royal harber, and other officials came aboard in the early morning and duly initiated those who were crossing the line for the first time. His Majesty's stay on board was short, but the same cannot be said of the little god Cupid. He came on board early and stayed until the end of the trip, as may be gathered from the fact that out of a total of 800 passengers on that famous 30,000 mile cruise, no less than forty came to the end of the trip as engaged couples. This fine photograph of Neptune's court was made by Miss Margaret Miller of Waterbury, Conn., who was one of the ship's passengers.

TOURISTS MAKE JASPER BUSY

Place Is Just Beginning to be Appreciated as Holiday Resort

JASPER, AUG. 16.—The town of Jasper, Alta., situated in the very heart of the Rockies, hums with activity. While the normal population is around 500, at least 1,000 are living here temporarily. The scenic beauties of the surrounding district is the charm that attracts the tourist with the trails leading to Mount Edith Cavell, Pyramid Lake, Henry House and many other places. The trout fishing is about the best in the country. Hunting is not permitted in this great national park of 4400 square miles, therefore game is easily seen by the tourist. Mountain climbing seems to be a great attraction to the members of the Canadian and American alpine club and many others who are coming to Jasper in increasing numbers from all parts of the North American continent.

The park board, headed by Col. Mandy Rogers is in official authority and its jurisdiction extends all over the park. Efforts are being made to induce the board to proceed with plans for electrifying Jasper and it is claimed that much cheap power can be developed from Athabasca falls which would not, it is said, be difficult to harness. The power so developed would also provide power for the C.N.R. machine shops. On the falls which are 10 feet high the government recently built a bridge from which a very fine view is obtained. The celebrated "lodge" which only accommodated 85 guests last year, has been enlarged so that 250 guests may be handled and plans are being made to increase the building in order that 500 may be accommodated next season.

Appeals to Tourists

Jasper park is just beginning to be appreciated as a most desirable spot for a vacation. One of the most accessible ways of touring the country is by saddle horses and pack trains and quite recently a party of 18 from Tonawanda, N.Y., was taken out,

their retinue being 52 horses with five guides and two cooks.

Another party, the largest to make the trip, was 200 members of the school teachers' special (the G.N.R. second annual personally conducted tour), who made the 15 miles to Molson lake, from where 14 mountain peaks and 8 glaciers are visible.

A gentleman who is a member of the Alpine Club of America, recently left on what is his 52nd mountain ascent of more than 10,000 feet.

Building Boom on

During his two weeks' vacation in Jasper, Sir Henry Thornton, president of the C.N.R. spent considerable time in exploring the district, saddle horses being the method of transportation. About 28 miles from Jasper and 15 miles from Pocahontas on the C.N.R. there exists, so the claim is made, of one of the greatest natural hot springs in the country.

Already there is a building boom on in Jasper, several stores being in course of construction or plans being made for same, and many new residences are to be built to accommodate the families of the crews transferred from Lucerne (the C.N.R. divisional point) to this town. Jasper boasts a school, hotel and several churches, a moving picture theatre and a poolroom. The Imperial bank has an office here and it is understood it contemplates putting up a new building next year.

Hospital Planned

Dr. O'Hagan, the medical health officer who has been stationed at Lucerne, where he looks after the men engaged on the C.N.R. and their families, is transferring to Jasper, where the old C.N.R. station is being altered for utilization as a hospital. It is believed that the yard at Lucerne will not be abandoned, but used as a car-shortage yard. The shop equipment will be moved to the new terminal in a very short time.

ARE WE GOING TO HAVE RAIN?

Sir Auckland Geddes, the British Ambassador at Washington said at a recent dinner: "Young men rise easily from the ranks here in America because the American spirit is so democratic. In Europe, now, it

is different. One day a clerk remarked to his employer: 'I think we are going to have rain, sir.' 'We?' snarled the employer. 'We are going to have rain? How long have you been a member of the firm?'—Everybody's Magazine.

BOAT ARRIVALS

The C.N.R. steamer Prince Rupert, Capt. D. Donald, arrived in port at 6:15 last evening from the south, three hours and forty-five minutes late. The delay was caused early yesterday morning when the steamer had to stop for over four hours near Bella Bella on account of a very dense fog.

Blind Man's Buff

EVEN in this age of enlightenment some folks spend their money blindly. They buy with their eyes shut. They grope in the dark as truly as if their eyes were bandaged.

And all the time a powerful light is being thrown on the very things they need and want!

Advertising is a beacon to guide you in buying. It shows you what to buy--where to buy--and when to buy. At the same time, it protects you against fraud and inferiority.

Merchants and manufacturers who advertise deliberately focus thousands of eyes upon their wares. Their values must be honest and their prices right, or they could not advertise successfully.

Don't play blind man's buff with the elusive dollar. Spend a few minutes each day running through the advertisements in this paper. Then buy the products that have proved up in the light of advertising.

Read the Advertisements.
