Power Of Mind Little Understood.

The marvellous powers of mind are little understood. We are all more or less groping in the dark but now and then a beam of light comes filtering through and then we do not always recognize it as light. We think it is something else.

This month Luther Burbank tells in *Hearst's Magazine* of powers he possesses which many others do not possess. He says he is able to communicate with those at a distance, just as Archbishop Du Vernet does, only without the aid of any instrument but the brain for receiving purposes. He cites case after case where messages were sent and received.

Broadcasting Is Continuous.

Burbank claims that all people all the time are broadcasting mind messages but only a few people are able to direct their thought waves where they wish them to go. The greater part of humanity simply broadcasts. He says thoughts are unquestionably produced by discharges of electrical energy. Radio messages are also sent by electrical energy. The two things are the same except that the human machine is infinitely more wonderful and capable of incomparably greater achievements. A billion and a half human brains are continuously sending off messages into the ether but they can only be received by tuning in and establishing harmony with them. The weaker vibrations are drowned out by the stronger. Thoughts held in common by millions may, because of their identical nature, swell into a tremendous chorus.

The present sick state of mind of the world Burbank ascribed to the thoughts that people are generating. For nine years millions of people in Europe were sending out vibrations of fear, hatred and despair while America was sending out vibrations of greed. What is needed, he thinks, is a new set of thoughts. Hatred, greed and fear will have to die down and broadcast less violently. Fear is the worst enemy in that it leads to hatred and greed. We are all broadcasting fear whereas few of the things we fear ever happen. Yet fear persists because it is the predominant note in human broadcasting. Everybody who thinks fear makes it more difficult for everybody else to live unafraid.

Power Of Healing By The Mind.

Burbank also tells of powers of healing which he possessed, especially during the years of his prime. He relates incidents in which he was able to heal people by the power of suggestion just as it is claimed by many that Dr. Price has been able to heal people in Victoria and Vancouver through the power of suggestion. He was amazed when he discovered he had this power and he says he would not have dared to tell about it 20 years ago. He believes Christian Scientists have a firm hold on certain great truths insofar as they preach the danger of fear and the value of cheerfulness and kindness. The reasoning of Gurne appeals to him more, however.

Broadcast Only Helpful Thoughts.

Burbank urges that people should broadcast only helpful thoughts. Each of us possesses in his brain the most powerful instrument that has ever come to the knowledge of mankind. The difficulty is that we use it so little and then often not intelligently. We injure each other with our destructive broadcasting and kill ourselves with our suicidal fears. He prophesies that it will not always be so but that we shall learn to control our thoughts and social penalties will be placed upon those who persist in putting into the ether destructive vibrations. Such will be regarded in the same light as we now regard those who poison wells.

Despaired of Life at 50 Strong and Well at 70

Mr. Jacob H. Macksey, 336 Midland Ave., Midland, Ont. writes:—

"I have used Dr. Chase's Kidney-Liver Pills for over 20 years and I feel that I owe my life to them. I suffered severely from rheumatism and heart failure. One doctor just gave me one year to live, and even told me I might be found dead at any time. A neighbor advised Dr. Chase's Kidney-Liver Pills and I have been using them as needed ever since. I am now 70 years of age, weigh 217 pounds and can work as well as any young man."

Ottawa Issues Complete Record of All Canadian Operations in Course of Great European War

OTTAWA, Ont., June 5.—(By Canadian Press).—The historical section of the general staff, Department of National Defence, has compiled the two exceedingly interesting lists appended covering the entire field of Canadian military operations in France and Flanders from the action of St. Eloi, March, 1915, in which the Princess Patricia's first bore Canadian colors into battle, to the taking of Mons on Armistice Day. These have not only prime historic value but will appeal directly to every Canadian soldier who served on the West Front.

The first list includes the important engagements in which Canadians participated. The second gives the complete and detailed record of all battles and engagements in which Canadians participated on the West Front, including the Canadian Cavalry Brigade.

For the first time the accepted nomenclature of the different engagements is made public, such being approved by the Battles Nomenclature Committee appointed by the War Office. The operations shown in capitals are those designated by the committee as "Battles"; operations shown in lower case are those designated by the same committee as "Actions" or "Tactical Incidents"—some of which would indeed have constituted a set battle a generation ago. Attention is drawn to the explanatory notes at end of list "B".

List "A"

Notes

"(a)"—Battles and actions in which a Canadian Division was responsible for a portion of the line.

"(b)"—Battles and actions in which the only color-bearing Canadian troops present were the P.P.C.L.I.

"(c)"—Battles and actions in which the only color-bearing Canadian troops present were cavalry regiments of the Canadian Cavalry Brigade.

In the case of operations not specially referenced as above the only Canadian troops engaged were detached formations, such as individual batteries, mining companies, etc., which do not carry colors.

The dates given are those during which Canadian troops were engaged, they do not necessarily cover the full period of the battle.
