#### Sports Equipment Sales Up 25 P.C.

OTTAWA, (P)-Canadian production of virtually all types of sports equipment has increased "substantially" during recent years and may open new avenues of export, trade department officials have disclosed.

Basing their figures on surveys of major producers, the trade experts estimate the industry has a present potential production of \$125,000,000 annually, 25 per cent more than before the war.

The sporting goods possibilities were emphasized by Ian Eisenhardt, national director of the council on physical fitness, who told the Canadian Bicycle and Sports Goods Association that dealers at present are selling their merchandise to only about five per cent of those who should be using the equipment.
