

Today in Sports

Caledonia rugby team made Glace Bay, Nova Scotia, known for something besides coal. It was always rather a "backwater" team. It created interest in English rugby in the Maritimes, and about the Maritimes, for the first time, at the same time—but, at the same time, it was not to discourage the Maritimes from their own rugby history since 1901.

MONAGHAN IS WINNER

Beats Dado Marino but Britain Still Sees Peterson As Flyweight Champ

LONDON (CP) — The Irish crooner Rinty Monaghan last night was awarded a 15-round decision over Hawaii's Dado Marino and won acclaim virtually everywhere but in Britain as the world's flyweight champion. Jackie Peterson of Glasgow is still recognized officially in Britain.

MILWAUKEE MAN HAS BIG TROUT

Dr. William Thomas Caught Two-Pound Four-Ounce Speckled Beauty

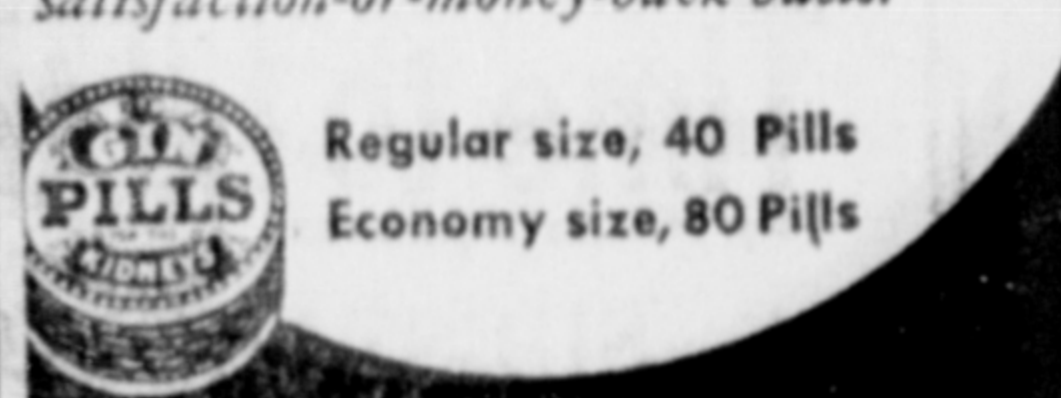

JASPER — Dr. William B. Thomas, Milwaukee, won the 1947 gold button award of the Maligne River Anglers' Club when he hooked a two-pound four-ounce speckled trout on September 2, it was announced yesterday by John Stark, manager of Jasper Park Lodge and secretary of the club. The committee awarded the silver button for runner-up to James F. Russell, Ottawa, who caught a two-pounder at the mouth of the river on August 18.

Dr. Thomas took his 16-inch speckler with a parmachene belle and tattle bug using a three-and-half ounce rod.

The competition was participated in by anglers from all parts of the continent and close to 200 trout were entered. In addition to the above membership buttons were awarded to Frances E. Stern, Hartford, Connecticut, and Harold A. Black, Los Angeles, California.

GETTING UP AT NIGHT?

How miserable you feel when your sleep is disturbed. Tired, aching, listless all day long. Why not take Gin Pills—an old reliable remedy for relieving kidney trouble? Compounded to help soothe and tone up the kidneys Gin Pills are sold on a satisfaction-or-money-back basis.

Invention Saves Lives of Salmon

VANCOUVER, (CP) — World-famous Campbell River Tye salmon, threatened for a time by developments of a large power dam project, have been given a new lease on life.

When the river was shut off to permit storage at Elk Falls, fish for a mile below the falls faced the danger of being stranded.

A. J. Whitmore, chief fisheries department supervisor, said, however: "The critical stage has passed and not one salmon was lost in the river."

The feat was accomplished mainly through installation of three big special gate valves in the lower power dam, through which water could escape. This, plus normal leakage, provided enough water to fill fish pools.

PIONEER SKIPPER LOSES EFFECTS IN HOTEL BLAZE

Some rare and valuable documents were among the possessions lost by Capt. Jack Wells, pioneer Prince Rupert halibut skipper, whose home for the last 20 years went up in flames when the Central Hotel burned last week. The 78-year-old retired skipper lost his chances to save his effects when he pitched in to help the firemen fight the blaze.

Among his effects were his extra master mariner's and captain's papers, the former being among the few on the B.C. Coast.

Possessions accumulated in more than 40 years on the coast, including mementoes of the early halibut fishing days and family pictures and records were lost, in addition to his clothes and other possessions.

He stood in the wind and rain wearing nothing more than a pair of trousers until a kindly lady lent him an umbrella.

Later, his son, Jack, jr., provided him with a complete outfit of clothing, but this did little to compensate him for the loss of his cherished possessions.

Capt. Wells was one of the first halibut skippers to operate out of Prince Rupert in the old dory fishing days. He came here

in 1908 from England under contract with the Canadian Fish and Cold Storage Co. when it was founded. It is said of him that he often brought in more fish than the company could handle.

He is known among some fishermen as the "discoverer" of Yakutat Bank and those who doubt it at least agree that he was among the first to fish halibut there.

He learned sailing the hard way, shipping before the mast, under sail, when he was 11 years old. He later became one of the most famous fishermen in the North Sea, which led to his being brought to British Columbia by the newly organized Canadian Fish and Cold Storage Co.

He retired from the sea 20 years ago but kept a few boats which he later sold. In the early days, he is said to have been paid \$1,000 a month as chief skipper for the cold storage company.

He lived in the Central Hotel for 20 years before it was destroyed. Now, he is living with his son in a cabin at Cow Bay.

GRIT WOMEN IN SESSION

First Postwar Convention of Liberal Federation Being Held

OTTAWA (CP)—Over 150 women, representing every electoral district in Canada, gathered here Monday for opening of the first postwar convention of the National Federation of Liberal women.

Senator Cairine Wilson said women's place may be in the home but, if she is a true Canadian, she must learn also to busy herself with the country's affairs.

HOW CAN I ???

By ANNE ASHLEY

Q. How can I keep the leather in shoes soft after it has become wet?

A. When the toes of shoes are wet, stuff them with tissue paper, and they will keep their shape. They should not be dried too quickly, because it will make the leather stiff and weak.

Q. How can I make a paste?

A. Take one-half cupful of lump starch and mix thoroughly into one quart of water, and boil slowly for a few minutes.

Q. How can I remove paint from window glass?

A. Rub with hot, strong vinegar. Repeat, if necessary.

on light tough aluminum

BEEN in a toy shop lately? Or a hardware store? Or a sporting goods department? Then you have noticed the amazing number of things now being made with Aluminum — skates and scooters knitting needles and clothes pins, cookers and, cocktail shakers and curtain rods.

Aluminum is today one of the four most widely used metals in the world . . . for a lot of reasons. It has brought new beauty into architecture and into the kitchen. Its lightness has made work easier — and enabled planes to fly higher and faster.

It has the strength to build bridges — and to take the beating a two-year-old gives his toys . . . It is the metal of the Twentieth Century.

One hundred years ago Aluminum was more valuable than gold.

Today its low cost creates thousands of everyday uses.

At Arvida, Canada, the largest Aluminum smelter in the world can produce two million pounds of ingots a day. One result is that Aluminum costs less in Canada than anywhere else in the world. Another is that nine out of every ten pounds of this huge capacity are available for export. Today Canadian Aluminum is sold in every country in the world — is a major factor in providing Canada with needed purchasing power abroad.
