IT GETS AROUND ... THE WORLD

Every country in the world is today buying Canadian Aluminum produced at Arvida, Canada, home of the largest Aluminum smelter in the world. The "Alcan" ingot has become a major factor in world trade — and a valuable source of the foreign exchange which Canada needs to cover her own buying abroad.

a uminum in the north woods? Yes, even there this versatile metal makes itself useful in a dozen ways. That canoe is aluminum. So are the paddles. So is the rod, and the reel, and the tackle box. Nonrusting, light-as-a-feather aluminum is proving itself a natural for an ever-growing list of sports equipment; skis and skates and hockey sticks and bicycles . . .

And, of course, that's just one small part of the story. From industrial castings to objects of art, Canadian manufacturers are leading the way to stronger, lighter, more attractive articles of every-day use. Our own development and research is helping them to blaze new trails - places at their disposal a wealth of technical know-how. Today over six hundred Canadian companies are turning out products made with this miracle metal of the Twentieth Century.

Producers and Processors of Aluminum for Canadian Industry and World Markets
