A "FORESTER'S PARADISE"

VANCOUVER ISLAND POSSESES DENSEST STAND OF MATURED SOFT WOOD IN EXISTENCE

Island's Annual Cut One Two-Hundredth Part of its Total Resources

Vancouver Island for its size, contains the densest and most valuable stand of mature soft wood timber on the earth's surface.

It possesses one-third of the timber in British Columbia—one sith of Canada's total stand. Into its area of 12,000 square miles is squeezed one-thirtieth of the world's available soft-wood supply.

Vancouver Island has been called a "forester's paradise," because in no place are conditions more favorable for a continuous new growth to replace the raw material now ready for the saw.

This favored island possesses 43,000,000,000 feet, or 60% of all the Douglas fir saw timber in the Province. Her cut last year of this species did not exceed 600,000,000 feet.

The Island also grows 36% of the red cedar and 42% of the Western Hemlock in British Columbia. More than one-fifth of the world's existing supply of these two great species is to be found on Vancouver Island.

Yet the annual timber cut of the Island forests is only about a two-hundredth part of i otsitla two-hundredth part of its total stand.

There are between 70 and 80 sawmills and shingle mills on Vancouver Island, representing a capital of $15,000,000, and about 200 logging concerns, including some of the largest in British Columbia, have invested another $25,000,000 in camps, railroads and equipment.

HEMORRHOIDS

Do not suffer another day with Itching, Bleeding, or Protruding Piles or Hemorrhoids. No surgical operation required. Dr. Chase's Ointment will relieve you at once and afford lasting benefit. 60c a box; all dealers, or Edmanson, Bates & Co., Limited, Toronto. Sample box free.

TERRACE NOTES

Mr. and Mrs. R. L. McIntosh are staying at their sumer home at Kitsumgallum.

Mr. and Mrs. R. Jeatts and family left for Vancouver last Saturday.

Tom Dingley was another passenger for Vancouver by the same train.

Mrs. Anderson and her son Tom are guests at Hill Farm while Tom is trying the High School examinations.

Miss Neilson of Minnisota is also a guest at Hill Farm.

Mrs. R. Halcron of Prince Rupert is visiting in Terrace for a few days.

The departmental examinations were held in Kitsumgallum School last week, presided over by Miss Fowler and Miss Dobb.

Miss Waldron left for the south on Wednesday.

Mrs. Marintette and children are staying at Hill Farm.

Dr. Grant spent the week on his ranch here.

Miss Elsie Kenney has arrived home for the holidays.

Mrs. M. Hatt has returned from Smithers.

Mrs. Tiffin has returned from University Hospital, Edmonton, and is much improved in health.

Tom Brewer, one of the old timers of Kitsumgallum days, is in town this week.

Mrs. Taper and son and daughter of Pacific are staying at the hotel while the children are trying the High School examinations.

Miss Etanda Marsh returned home Friday night.

SECOND PRIZE FOREST ESSAY

Written by Miss Sheila Stuart in Forestry Departments Recent Competition

After listening to a lecture on the Prevention of Forest Fires by the Assistant District Forester, certain facts are imprinted on my memory. They are that in the past five years there have been 7813 fires, that the loss caused by these fires reached the enormous sum of five million dollars and that 6740 or eighty-six per cent of them were due to human agency.

There are three kinds of forest fires, namely, crown, ground and surface fires. Crown fires burn in the tops of the trees. Ground fires burn deep in the ground destroying any seeds that may be there. Surface fires burn up the brush and undergrowth and may develop into either crown or ground fires. The ground fire is extremely hard to extinguish and often it is necessary to dig trenches to get the flames under control. In dry weather these fires travel rapidly and the fire fighters have a hard time to master the "Red Enemy."

Awful Results

Let us think for a moment of some of the awful results of a forest fire. There is loss of life and habitation, destruction of shelter for the birds and wild animals, and often of the birds and animals themselves. The country has lost its beauty and has no attraction for the tourists thus affecting the traffic of trains and boats. Another bad effect is on the land itself. Forest land is like a sponge and retains the moisture so giving the streams a constant supply of water but land denuded of its trees does not hold the moisture. In the spring the water flows away in turbulent floods often causing much destruction and in summer the streams dwindle away and periods of drought are frequent.

In addition to the revenue from timber, we have that arising from the fur trade, an indirect product of the forest. For the past two years the revenue from this source was two and three-quarter million dollars which shows the great importance of the fur trade to our province.

Chief Industry

Lumbering is one of the chief industries in British Columbia. There are about four hundred lumber and shingle mills besides several pulp and paper mills employing directly in the industry over 25,000 people. The yearly cut is about two billion feet, worth about sixty million dollars. If our forests were burned, these mills and logging camps would have to close down and thousands would be thrown out of employment.

How can we prevent any further damage to our forests? Prospectors, campers and sportsmen should see that their fires are completely out before they leave them, and they should never throw lighted matches away. Settlers should observe the laws laid down by the Forestry Department for clearing land.

We should remember that a tree which may be destroyed by fire in a few minutes takes a century to grow. Let us make "Save the Forest" a household word so that green forests may be handed down to posterity.

(Note.—The foregoing essay, written by Miss Sheila Stuart of Prince Rupert, was awarded second prize in the intermediate Grade classification of the Forestry Department's recent essay competition. The writer is 10 years of age and was taught last term at Borden Street school by Miss M. I. Weatherhead.)

FRED STORK URGED CUT IN NUMBER OF ORIENTAL LICENSES

Despatches to southern papers recently state as follows: A recommendation to the minister of marine and fisheries in favor of a further cut of fifteen per cent in the number of commercial fishing licences issued in British Columbia in 1925 to others than white and Indian fishermen was adopted by the Marine and Fisheries Committee of the House.

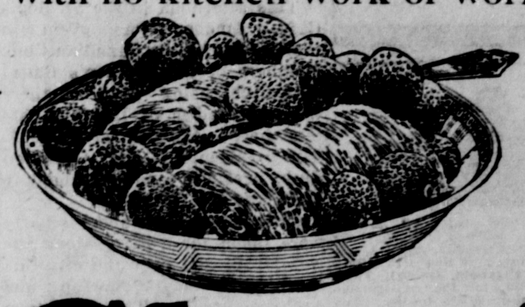

W. G. McQuarrie, Conservative, New Westminster, moved for a cut of ten per cent, but Alfred Stork, Liberal, Skeena, thought this too low, and suggested twenty-five per cent. Eventually agreement was reached on a fifteen per cent basis.

Mr. McQuarrie suggested further the reopening of negotiations with the State of Washington regarding the protection of sockeye salmon on the Pacific Coast. He proposed that instead of insisting on a complete closed season, an effort should be made to secure an international agreement prohibiting the catch of salmon until August 1 of each year.

The committee agreed to forward the suggestion to the minister of marine and fisheries.

This is Nature's dish

for breakfast, for lunch, for dinner—big, ripe, red strawberries piled on top of Shredded Wheat and eaten with cream and sugar—a wholesome, nourishing combination for youngsters and grown-ups. A delicious short-cake made in a jiffy without cooking—no white flour soggy dough—just crisp, flavory shreds of whole wheat with berries—the best food on earth, with no kitchen work or worry, and all the iron and all the bran you need to keep the bowels healthy and active.

GRAIN SHIPMENTS STILL BEING MADE

Six and Half Million Bushels Still Stored in Country Elevators

WINNIPEG, June 30. — With over six and a half million bushels of grain still in storage at country points over the Canadian National Western lines and nearly half of the daily loadings still coming direct from farmers' granaries the flow of the grain to both eastern and western outlets of the Canadian National system continues unabated. In the week ending at midnight on Thursday over 5,000,000 bushels were loaded of which 2,750,000 bushels came from Saskatchewan. Total loadings to that date have reached 216,741,000 bushels as against 161,986,000 bushels in the same period of the last grain year, an increase of 24,755,000 bushels. In cars the total has been 161,131 against 122,558 in the corresponding period of the previous year, an increase of 36,573 cars. During the week under review the total loadings were 2,563 in advance of loadings in the period of the previous year.

That the flow of grain will continue for some time to come is evident from the fact that 6,688,000 bushels remained in storage at country points at midnight, June 26, against 2,159,000 bushels on the same date last year. Deliveries to Vancouver during the period September 1 to June 26 have been 16,921 against a total for twelve months previous to September 1 of 4,545 cars or more than four times the total loading.
