business

To-day as you spend your money to fill your needs, advertisements are waiting to direct you. They are the guide posts of business. They point the short, straight road to satisfaction in buying. They will serve you well, whether you spend much or little.

Do you stop to read the advertisements? They are published to tell you exactly where to go for what you want. They lead you to values which you would never know were they not there to guide you.

And remember that advertising always points out goods of unquestioned value. When a store or manufacturing concern puts its name on goods and tells you about them, you may be sure that they are worth consideration. It does not pay to advertise unworthy merchandise.
