Sale of Crown-Granted Mineral Claims

For Unpaid Taxes in the Prince Rupert Assessment District

I HEREBY GIVE NOTICE that, on Monday, the 3rd day of November, 1924, at the hour of 10 a.m., at the office of the Provincial Collector, in the City of Prince Rupert, B.C., I shall offer for Sale at Public Auction the Crown Granted Mineral Claims hereinafter set out, of the persons in the said list hereinafter set out, for delinquent taxes unpaid by the said persons on the 30th day of June, 1924, and for costs and expenses, including the costs of advertising said sale, if the total amount due is not sooner paid.

The Collector will be pleased to receive any information respecting the following list where the owner was a member of the Overseas Forces and entitled to the benefits of Section 151 of the "Taxation Act," 1922.

LIST OF PROPERTIES:

NAME OF OWNER.	NAME OF CLAIM AND LOT NO.	TAXES	PENALTY	COSTS	TOTAL
	RANGE 2				
[illegible]	Gillis fraction, Lot 9185	$ 1.25	$ .06	$13.75	$15.06

Dated at Prince Rupert, B.C., the 11th day of October, 1924.

W. S. FISHER, Provincial Collector.

RUBY CREEK PLACER MINE AT ATLIN IS TO OPERATE 5 YEARS

Work Will begin with the Opening of Spring and it is Expected Thirty Men will be Employed

ATLIN, B.C., October 22. — The directors of the Placer Gold Mines Company, operating its placer gold property on Ruby Creek, Atlin district, have decided upon new work on their property there that will keep that company in the field for at least five years longer, according to word received from the company's head offices at Seattle. The decision of the board was unanimously in favor of the action taken.

The company has been hydraulicking up stream, and when it began it was realized that it had left good ground below the the place of beginning but it was thought the overburden would be too great to work the property at that time.

It has now been decided to begin again lower down the stream and work on the ground that was left. The investigations that have been carried on has convinced the management that the ground remaining to be worked is equally as valuable per square foot as that which has been worked.

John P. Hartman, the prominent Seattle lawyer, president of the company, and James M. Sparkman, leading Seattle real estate man and property owner, a heavy stockholder in the company and a member of the Board of Directors, visited the property in Atlin in August, and the decision to continue operations was made after their return to Seattle.

The Placer Gold Mines has been operating a hydraulic plant on Ruby Creek at a profit for a dozen years of more. About thirty men are employed. Preparations will be made this fall for the operation on the lower part of the property any hydraulicking will begin with the opening of spring next year.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 8,000 board feet per acre west of the Coast Range and 5,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price for first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partly free, permits are available for settlers, campers and travellers, up to ten head.

RADIO STATIC

By The Daily News Radio Expert.

"The radio is doing more to bring non-church-goers into the church than anything that I know of," declared Rev. Dr. Clem Davies in addressing the Victoria Radio Club on "Radio and Religion." "There are people who are so situated that they are unable to attend a church, and with the aid of this wonderful invention the doors of our finest churches are thrown wide open to them.

"All the leading churches have broadcasting stations," continued Dr. Davies. "When the large sets were installed many wondered who would pay for their upkeep. Some thought that it would react unfavorably. It reacted tremendously in favor and instead of smaller congregations, congregations grew by leaps and bounds which meant greater revenue to the church and helped to do even greater work. Not only has the radio helped the church, but also the hospital. Today modern hospitals are equipped with large sets and patients who heretofore could only lie in bed and do their best to pass off the weary hours, are now entertained with all kinds of the best music."

Dr. Davies spoke of the exceptionally fine programs that are broadcast every evening from the Pacific Coast stations. Radio was a constant friend of the fan. During the cold winter evenings one could sit by his set and listen to concerts from every corner of the continent.

KGO Program

The feature at KGO, Thursday, October 23, will be a violin ensemble of eleven instruments. Orley See, well-known California violinist, will lead in an interpretation of a Sochting Suite. Wandszetta Biers, soprano, will also be heard.

The Merced Boys' Band, led by George Bareilles, will play at KGO Saturday, October 25, at 8 o'clock. The program is contributed by the American Legion, Post No. 83, and will be made up of pieces by the band, vocal numbers, and an address by E. R. Fountain, Commander of the Post.

Trouble Shooting

If you are just trying out some new hook-up for the first time and you find it doesn't work like it should, don't get discouraged immediately and blame the hook up for not being right. Remember that every hook up has been tested at some time or other, or else it would never have been published. It will be very useful to read over the following rules before condemning a set entirely.

1. Use only good quality apparatus throughout. Rather pay a few cents more and get a good receiver, than buy cheap parts and get only fair results. Remember this: Spare the money, spoil the receiver. Of course this does not mean that you have to buy gilt edged tuning coils and condensers with platinum bearings, but use a little common sense in buying and you will benefit in the long run.

2. Go over your connections carefully. See that they conform to the diagram exactly, are perfectly tight, and are good joints both mechanically and electrically.

3. See that the tubes are making good contact in the sockets. This little insignificant fact alone has caused very many sets to be discarded as useless.

4. See that your batteries are in good condition and are connected correctly. Remember that the positive pole of the detector and amplifier B battery's should always connect directly to the plate of the tubes.

5. If your set is regenerative and it does not regenerate then reverse the tickler or plate variometer connections.

6. Be sure that you follow the directions given in the description of the set, to the T. It is time enough after you get it correctly hooked up to add original ideas.

7. Use fairly large wire for connections. The larger the wire the less resistance, No. 14 or 16 will be found very satisfactory.

8. Make sure no two wires cross each other, thus causing a short circuit. As a preventative use spaghetti tubing whenever two wires are likely to cross.

9. A phone condenser of .001 microfarod capacity will often help to make a set oscillate more easily. It also clears up reception considerably.

10. Give your set a fair trial. One night is not sufficient. Try it for at least two nights before you form your opinion of it.

If you can hear signals stronger on wet nights than on dry ones examine your ground connection, if it is an exterior one. The remedy is to change it to a wetter location or else see that it is kept continually damp. On the other hand if reception is better on dry nights than on rainy ones, look to the insulation of your aerial and lead in.

Remember to have the aerial stretched tight so that it will not swing with the wind. If it does it will interfere greatly with your reception, by causing the signals to swing too.

New Stations

Two large and powerful broadcast stations; KNX of Hollywood, and WJJD of Mooseheart, Illinois, have recently appeared on the air, and are being welcomed by fans all over the country, including Prince Rupert. The former is of 500 watts power and transmits on a wave length of 335 meters. It is owned and operated by the Los Angeles Express of Hollywood who are at present radiocasting from the Studebaker Building of the Paul G. Hoffman Co. Reception of their broadcast is reported by local listeners in to be excellent. Many fine programs have been served to date.

Moose Station

The latter station WJJD, as the latest acquirement of the Loyal Order of Moose. They plan by means of the far reaching effects of radio broadcasting to embrace every single member of their order on this continent. WJJD owns a 500 watt transmitter and operate on 278 meters wave length. At present WJJD is on the air for test purposes only, but it will be formally opened on Founder's Day, October 27. A bumper program is assured for that day.

An interesting little article descriptive of Telkwa appears in the current issue of the Western Home Monthly, a Canadian magazine published in Winnipeg. It was written by Mrs. H. Glynn Ward.
