Experience Can be Gained

N TAKING OVER the government of B.C., the Social Credit party starts with an advantage of youth and a handicap of inexperience. As experience can be gained but youth can not, it is not bad combination.

In addition, the party assumes its responsibilities with the pleasant prospect of being able to write its own record, for Social Credit is a new name in provincial politics.

As such, it has no obligations written against it except its pre-election promises and these are not too imposing for the reason that the party has not the numerical strength to put many of them into

At the same time, the outlook for the new government is by no means plain sailing.

This summer's outbreak of labor unrest has moderated, but the causes are all still there. These will require wise and close attention as will other problems characteristic of rapid industrial growth. As new business seeks entry into the province, the terms we offer must be attractive but not extrava-

In a province of such great natural wealth as ours, the temptation to be overly generous is an ever present threat. Consequently, danger always exists that this land of rivers might one day be sold down the river of its own making.

Not for any political reason, but for the sake of B.C.'s welfare, we wish the new government success. The province has already gone long enough without direction and election speeches are poor substitutes.

But propjected H-bomb - appear to new ones are being built and have possibilities for the treat- dog. still others are in prospect under ment of deep-seated cancer. the recently approved \$3,500,-000,000 expanding program.

As for the new foreign sources of raw uranium, the A.E.C. said the first of several plants being constructed in South Africa to recover uranium from gold ores of the famous old "Rand" gold field is nearly ready to start production.

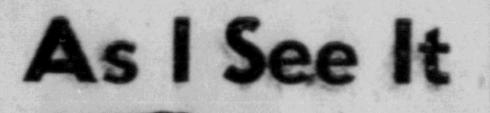

It will be the first product of a three-nation agreement-made in December 1950-whereby Britain and the United States will purchase from South Africa the by-product uranium. Potential quantities have been described by the A.E.C. as "relatively large because of the great quantities of (gold) ore mined."

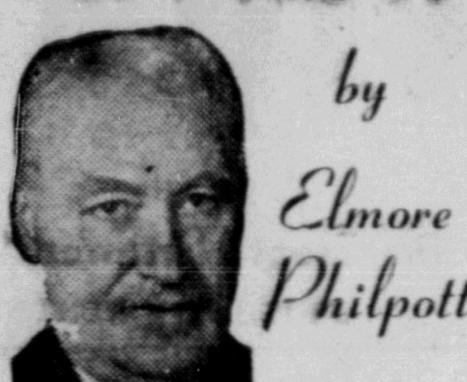

Concerning the Australian source, the A.E.C. said only that an agreement was reached with Australia to supply uranium to the United States.

The A.E.C.'s report also listed: . Progress in the development of atomic propulsion for aircraft -with certain phases of design and development work having gained momentum in the past

half-year. 2. Continuance of a project to build a second type of atomic engine for possible use in a submarine-even as work progresses on building a hull for a submarine which will house an atomic power plant of a different type. Regarding weapons develop-

ments, the A.E.C. followed its

Sleeping Strangers

GULL LAKE, Alberta-Here is a story I heard from one of the United Church ministers at this summer camp of the Alberta School of Religion:

A man and wife on a motor trip had car irouble, far from any hotel. They explained their plight to a woman in a small town. She gave them supper then took them downstairs and showed them a place to sleep. But before getting into the makeshift bed on the hard concrete floor the man got curious as to what was behind the cur-

To their astonishment they discovered a fully made-up hed with fine spring mattress and nice covers. They were not sure whether the housewife had been holding out something on them or whether they had been mistaken about where she told them

At any event they climbed into bed and went into a deep perfect Tired as they were from their exhausting previous day they did not awake till broad

they discovered they were asleen opening on the town's main street. About half the town was HERE gathered outside silently amazed at the spectacle of the sleeping
