**INSIST on "Cascade"—the better beer—at the Government Vendor's.**

**VANCOUVER BREWERIES LIMITED**

# Cascade PALE

"The Beer without a Peer"

## HOSPITAL HAD MANY VISITORS

New X-Ray Equipment Proved Interesting — Was Fully Demonstrated

National Hospital Day was fittingly observed at the Prince Rupert General Hospital yesterday afternoon when from 3 to 5 o'clock the institution was thrown open for inspection. The popularity of the hospital day movement was clearly demonstrated by the large number of citizens who took advantage of the opportunity to see the hospital organization in operation. D. C. McKee, president of the Hospital Board, Miss Edith McCaul, matron, and Harry Birch, secretary to the hospital, received the guests as they arrived and willing nurses were on hand to show the visitors around. The operating room, the nursery, surgical ward, women's ward, men's ward, in fact one and all of the various departments came in for commendation and gifts of flowers and fruit found their way to the bedsides.

### X-Ray a Wonder

The most frequented portion of the building and the one to create the most interest was the X-Ray room situated in the basement. Secretary Birch and Dr. L. W. Kergin demonstrated the work so easily performed by the equipment which was recently installed. The ease with which the apparatus is worked and the results so quickly obtained must be seen to be realized. When the average person thinks of X-raying he is apt to conjure up electric shocks and all sorts of weird happenings but there is nothing of the kind to worry about.

There are three main parts to the apparatus which is of considerable dimensions. First there is the generator, controls and switch board which throws the penetration of electrical current through high tension wires to the second part of the apparatus, the X-ray proper, otherwise known as the Coolidge tube. The penetration through the Coolidge tube thrown on to a movable table underneath it on which the patient is laid on a Bucky diaphragm gives an X-ray of the body or members thereof, photographs being taken on a sensitized plate.

The third piece of the apparatus is called the fluoroscope which consists of a screen like piece of furniture connected with tubes at the back and in front of which is a movable heavily frosted plate, similar to the viewfinder of a camera. This plate works up and down at will. A patient placed behind it, the bones, heart and other parts of the body are plainly discernible. With the fluoroscope it is possible for the doctors to locate a fracture or break in the wrist, arm or leg immediately and when such injured member has been set this part of the X-ray apparatus will show whether the member has been correctly set.

## WARNING WORD WILDCAT STOCK

Issued by F. M. Mason, Mining Writer, in Vancouver Sun

In the past the people of British Columbia have shown such complete indifference to the possibilities of the mineral industry of their province that one hates to run the chance of checking the little enthusiasm that has been aroused within the last few months. Still, a note of warning is necessary. Just now a good deal of mining is being done on paper. For the purpose of selling stock or of raising the market quotations of stocks that already have been sold some promoters and brokers have been issued absurdly extravagant statements about the values of ores and the geological conditions occurring on mineral properties. Ore values running into the thousands of dollars per ton are being tossed around with a savoir faire that might lead the uninitiated to believe that the promoters know something about what they are saying.

One concern stated that the geological conditions at the surface of a property indicated that the grade of ore found in the outcrop, which assayed more than \$1000 per ton, persisted to a depth of 1000 feet.

### Will Do Harm

This kind of thing is all poppycock, promulgated to snare the unwary into buying stock. If there were the slightest geological indication that ore assaying \$1000 per ton persisted to a depth of 1000 feet it is safe to say that the shares of the company owning it would not be on the market. There are scores of well-financed concerns hunting for anything one-tenth as attractive and willing to pay a good price for it—if they could find it. This claptrap, however, catches a certain class of people—unfortunately, those who can least afford to lose their money—and if not exposed is certain in the long run to harm the mining industry of British Columbia.

### Risks Are Great

People who are asked to invest in the exploration of prospects should be told candidly and fairly that the risks are great, but in the event of success the rewards also are great and usually more than commensurate with the risks. The exploration of prospects is an expensive enterprise, and usually can be done successfully only by combined efforts; hence the formations of companies for this purpose are fair and legitimate promotions, provided they are not hoodwinked out of their money by false and extravagant statements. Some undoubtedly promising mining investments are being offered to the public at this time, but, also, some exceedingly doubtful ones are being offered. It behooves investors, therefore, to make a careful investigation into any concern into which they propose to put their money, and particularly to ascertain that the money subscribed is used for mining and not for promotion.

## BRIDGE PARTY

Mrs. G. E. Gulick Entertained Last Night on Eve of Departure For East

Mrs. and Mrs. G. E. Gulick entertained delightfully at their home, 666 Seventh Avenue East, the occasion being the eve of departure of Mrs. Gulick and family on a visit to her home in Michigan. Mrs. F. Salter was the winner of the ladies' prize and Mrs. H. Menzies took the consolation prize. H. Menzies was winner of the gentlemen's prize and S. Webb the consolation. At the conclusion of card playing, delicious refreshments were served after which music was much enjoyed. Contributing to the musical program were Mrs. G. E. Gulick, R. Howe, G. H. Arnold and F. W. Moersch. Those present were Mr. and Mrs. B. Balagan, Mr. and Mrs. G. H. Arnold, Mr. and Mrs. J. Lawrence, Mr. and Mrs. F. W. Moersch, Mr. and Mrs. F. Salter, Mr. and Mrs. H. Menzies, R. Howe and S. Webb.

## VICTOR CO. GETS CANADIAN RIGHTS

## SINGS IN VANCOUVER

VANCOUVER, May 16.—Amelita Galli-Curci will sing here on May 28 in the Arena. She is leaving shortly for Europe to fill a six year engagement contract so she is on her farewell tour to America for the time being at least.

# INTO THE ATTIC

Few youngsters today ever saw a horse-hair sofa. They wouldn't know what to do with a fire taper, carpet stretcher, or coal oil lamp. They couldn't braid rags into a rug, or wind yarn without tangling. But they know the how and why of typewriters, phonographs, telephones, automobiles; what happens when a push of the button gives light, or a kodak's flash fixes their image on paper.

Their education is as modern as the advertisements they see. They have no more use for the lamp and chimney of yesterday than you for the wick and tallow of the day before.

Advertisements induce such progress. They urge wide use that means improvement. They help you lift the out-of-date into the attic—rid you of the water buckets and soap kettles of slavery. They bring late improvements within your reach.

Read the advertisements regularly. Keep alert to the new.

Without advertising, you would never know a product's worth until you had bought it.

## TIMBER SCALE APRIL LARGE

In Excess of Same Month Last Year and March of This Year

Log scaling in Prince Rupert district for the month of April totalled 8,626,668 feet according to the report of P. S. Bonney district forester. The figure exceeds that for April 1923 by nearly one million feet and that for March 1924 by over two million feet.

The varieties of logs scaled were as follows:

Douglas fir	108,729
Red cedar	401,711
Spruce	4,354,140
Hemlock	2,909,785
Balsam	631,707
Jack pine	12,860
Cypress	261
Interior spruce	206,361
Cottonwood	184

Poles scaled during the month totalled 83,360 lineal feet against 87,860 lineal feet in April last year and 106,915 feet in March this year.

Cedar pile scaling during last month totalled 61,069 feet which is about half as high as the pile scale in April last year but higher than March of this year.

Other scaling records for the past month were as follows:

Cordwood, cords	300
Shingle bolts, cords	28
Ties, hemlock	10,910
Ties, pine	174,772
Fence posts, cords	24
Pulpwood, cords	105 1/4

### WAS KNOWN HERE

The death occurred last week in Winnipeg of J. M. Bannerman, superintendent of the investigating department of the

## PET BEAR CUB BITES LITTLE TERRACE GIRL

Susie is a Little Too Playful for Miss Kathleen Burnett

TERRACE, May 16.—Kathleen Burnett, the twelve year old daughter of Mr. and Mrs. W. Burnett, had her lip badly cut in two places by Susie, their pet bear cub. They had been playing together and Kathleen had just picked the cub up and was burying her face in the fur when the bear, continuing the romp, bit her lip.

Susie was brought to town a couple of months ago by some Indians who had killed her mother and taken the cub from the den. When the Burnetts got her she only weighed two pounds but has gained rapidly. She has a playful disposition and is the pet of the whole neighborhood.

Mr. Bennett had already written to Jasper Park and to Vancouver offering to present her to them and will keep her till he receives a reply from them.

### HOTEL ARRIVALS
