Sterling Furnace COAL

Delivered in Bulk.

At \$10.00 per ton.

This is a very superior furnace coal. It gives a clean hot fire and is entirely free from soot, clinkers, slate and dirt. Some of the largest heating plants in the city are now using it with entirely satisfactory results.

STERLING STOVE COAL,
Delivered in Sacks.

At \$12.50 per ton.

We are also Agents for the Famous **LADYSMITH-WELLINGTON** and **TELKWA COALS.**

Better than porridge

Children are apt to bolt down their food without chewing. That means poor teeth and poor digestion. The best food for growing children is Shredded Wheat because it encourages thorough mastication. Contains all the nutritive elements in the whole wheat grain, including the bran which is Nature's best food laxative. It is ready-cooked and ready-to-eat—delicious for any meal with hot milk, sliced bananas or other fruits.

Shredded Wheat

very wise measure and that it has worked no injury to the industry. I have in my possession several letters from those engaged in the canning business, and they claim that it is a good measure and imposes no handicap on them. We were fortunate last year in that we had a bumper harvest of salmon in the salmon rivers of the Pacific coast. We look to a further good season this year and we hope from time to time to see the white citizens of this country given ample opportunity to develop the fisheries of that province.

Use of Gas Boats

Another improvement we are very glad to observe in connection with the progress of our fisheries, and that is that while on the Fraser river for a number of years they have been allowed to use the fishing method known as the "gas boat" for some reason or other those who fish for a living on the Skeena and Nass Rivers in the north have been compelled to use the old British Columbia fishing boat equipped with a sail and oar. I never could appreciate why such a distinction should be made, but this commission that was out there last year, known as the Duff Commission, recommended that commencing with the year 1924 the use of gas boats be permitted on the Skeena. That recommendation comes into effect this year, and I know and am sure that the people who are making a living fishing will find it a very great advantage. I think if anything the regulations should have been just the reverse. The waters of the Fraser would be much more suitable for a boat with sail and oar than the placid waters of the Skeena. But we are to have the gas boat this year and it will be a great advantage to the people who make their living from the waters of the north.

One of the great issues in the province was the employment in the fisheries of nationalities other than whites or Indians. That was a very burning question with the people who live on the Pacific coast. The recommendation of the commissioner was that in their estimation those other than whites or Indians should be reduced by 40 percent. Much opposition was offered to the suggestion that that reduction would not interfere with the proper operation of the fishing industry. Anyway, the suggestion was carried into effect, and I am glad to report to you, Sir, that all the people resident along the Pacific coast are of the opinion that that was a

halibut business. There is another aspect of the fisheries in regard to British Columbia that I wish to mention, and that is the progress of the halibut trade. The construction of centralization grew up, and of late years a central office has been opened in the city of Vancouver. This does not in my estimation make for economy or efficiency. We have in the central office in Vancouver a considerable overhead expense. We have there a considerable staff, and all the positions are under the jurisdiction of the Civil Service Commission. All these officials commence at a minimum salary and work up to a maximum. The staff consists of the following:

	Maximum Salary.
Chief Inspector	\$2,600
Chief Clerk	2,800
Accounts Clerk	2,280
Purchasing Agent	2,280
Senior Clerk-Stenographer . . .	1,680
Clerk Stenographer	1,260
File Clerk	1,260
Lady Stenographer	1,260
Junior Stenographer	900
Junior Stenographer	900
Boy Messenger Clerk	900
Revenue Collector	1,920
Gas Engine Foreman	1,920
Resident Engineer	3,000
Assistant Resident Engr.	2,040
Inspector of Hatcheries	2,160
Total	\$30,160

Would Abolish Office

Eight of these officials do office. My advice to the minister considerable travelling from time to time would be to close these offices to time, and I am thoroughly satisfied that with the salaries indicated here, plus the travelling expenses, plus also the office rental and upkeep, the total cost to the country will be in the neighborhood of \$50,000. When I first came to Ottawa two years ago I took this matter up with that position at a salary of \$140 a month. I took it up last month. In view of his responsibilities, in view of the tremendous amount of work he has to do before there was any do, \$110 a month is a very inadequate remuneration. Before an or "A carnival of extravagance," official can qualify for a position So in pressing it upon the government I trust I am not stealing the department, and in view of this system of promotion he is an engineer. I would suggest that old man long before he can attain the position of inspector of the office be abolished immediately. I am satisfied that to revert to the old style method of the princely salary of \$140 a month each district report directly as an independent unit to headquarters at Ottawa will annul the maximum to
