

Soaking takes the place of rubbing-

IUST by soaking the clothes in the suds J of this new soap, dirt is gently loosened and dissolved.

Even the dirt that is ground in at neckbands and cuff-edges yields to a light rubbing with dry Rinso. Not a thread is weakened. The mild Rinso suds work thoroughly through and through the clothes without injury to a single fabric.

Rinso is made by the makers of Lux. For the family wash it is as wonderful as Lux is for fine things.

All grocers and department stores sell Rinso.

Last night Dr. Lamb proceeded

Here and There

It is estimated that ever 50,000 acres were sown with corn in Alberta in 1923, as compared with only 1,000 acres in 1919. This is a good indication of how rapidly corn culture is increasing in Western Canada in connection with mixed farming operations.

All previous records of Canadian freight transportation were broken when a solid train-load of automobiles reached the Pacific Coast from Windsor, Ont., over Canadian Pacific lines recently. The distance of 2,932 miles was covered in seven days, or exactly 169 hours and 20 minutes. The train, which consisted of 40 cars, each containing 6 Ford automobiles, was more than a third of a mile long and was handled on practically passenger schedule.

The splendidly sound position of the Canadian Pacific Railway is well shown in the annual report for the fiscal year ended December 31st, 1923, which has just been issued. The gross earnings of the Company for the year were \$195,827,089.61, the working expenses \$158,358,-079.54, and the net earnings, \$37, 479,010.07.

A large party of Scottish farmers, ploughmen, farm workers and their families, is expected to arrive at Montreal in June. The party, which will sail on the Canadian Pacific steamer "Marburn," will be conducted by the Scottish representative of the Canadian Pacific Department of Colonization and Development.

Alberta has maintained an average yield of spring wheat of 1914 bushels per acre over a period of twenty-six years, according to a chart prepared by the Department of Agriculture. In addition, winter wheat has averaged over the same period 20.19 bushels; oats, 35.79 bushels; barley, 26.10 bushels; rye, 18.84 bushels and flax, 8.71 bushels.

A feature of the annual banquet and convention of the officials of the Canadian Pacific Railway, which were held at Quebec on March 22nd, was the representation, in the banquetting hall, of a full-sized locomotive of the latest type emerging from a tunnel. Built of wood at all respects perfect. At a prearranged moment, it emitted steam and smoke, the bell rang and the whistle blew, while the headlight became a moving picture projector.

Indications of a great season in immigration are seen by Canadian of March 29-30, of 2,441 third-class passengers, aboard the Company's steamers Montcalm and Metagama. The Montcalm had on board 1,584 of these passengers, which constitutes a record for the season.

Out of a total production of 10,730,150 pounds of creamery butin 1923, Manitoba exported 3,863,264 pounds, valued at \$1,513,-169. Shipments were made to Great ped to the United States.

In a speech to the higher officers the occasion of the recent convention at Quebec, Mr. E. W. Beatty, President, pointed out that 50 per cent, of the company's stock is held in Great Britain, 21 per cent. in Canada and 20 per cent, in the United States. It is, therefore, a corporation absolutely controlled within the British Empire and, he added, that control is being appreciably strengthened as the years

Quebec's new goldfield in Rouyn township, north of the Des Quinze branch of the Canadian Pacific from Mattawa, is to be made accessible by an aeroplane service to be inaugurated by the Laurentide Air Service Limited, on May 18th. Prospectors, tourists and supplies will be able to cross the fifty mile gap between the end of steel and the goldfields, which formerly required two days to cover, in less than an hour in the flying boats to be used in the service.

SALT LAKES SERVICE
