## MINING ACTIVITY TERRACE AND DISTRICT

### ALL WORLD POWERS TO UNITE IN DRAWING AGENDA FOR CONFERENCE

#### Sixty Mineral Claims Located During Summer Terrace And District

#### Lot of Good Work Done by Kalem Lake Mines Ltd. and Other Properties Being Rapidly Developed

Prospectors have been very busy this summer both to the north and south of Terrace, some sixty mineral claims having been recorded, most of which are in the Kitsumkalum Lake district on Maroon and Goat Mountains. While none of the finds have been of a spectacular character, many of the prospects are affording considerable satisfaction to the locators. From the samples of ores to be seen in Terrace, prospectors have every reason to spend money in development. Unlike most mining communities, however, the Terrace prospectors do not deceive themselves by thinking they have got something, before they know, first.

Development work has been continued on the older properties on Maroon Mountain, notably on the Motherlode, Bear and Black Wolf groups. The locators of the Black Wolf have disposed of this group of five claims at a very satisfactory figure. The new owners intend to continue developing the property and to bring it to the producing stage as rapidly as possible.

Another deal involving the sale of the Silver Dollar group, situated some three miles west of Cedar River Crossing, is pending.

**Portland Group**  
What is regarded as the best gamble in the district is the Portland group owned by the Kalem Lakes Mines Ltd. This is the prospect found by "Smithie" late of the G.T.P. and developed by Terrace capital. A double compartment shaft has been sunk for 61 feet on the main vein. At this depth the vein is increasing in width and in value. Assay returns show values in gold \$54.40 and in silver of \$14.75 per ton. W. S. Bacon, M.E., examined his property last month and reported very favorably upon the work already accomplished as well as on future prospects.

On Cedar River, the Silver Cup group have very good showings. The ore exposed is high grade, the smelter tests running to \$65 in silver and \$15 in gold.

A very promising silver lead property is being developed by Mr. Egan some three miles back from the lake and 2,500 feet up, while on the lake shore Joe Beloway is working on a very interesting gold-copper prospect.

**Road Needed**  
All Kalam Lake district is handicapped, however, by the road to Kalam Lake from Terrace being still uncompleted. There is rather more than a mile still to be constructed and the prospectors to whom this road means so much were in hopes of it being finished this year so that it would pack during the winter with the snow and be in fine shape by next spring. Instead of
