In the columns adjoining are given the actual experiences of a number of British Columbia families who have adopted the use of Vicks VapoRub since it was introduced here last winter.

Though new here, Vicks is old in the States, where over 17 million jars are used yearly-for croup, children's colds, babies' colds, adults' colds, catarrh, sore throat, bronchitis and all other such troubles down to incipient pneumonia.

### A Vapor Lamp in Saive Form

Vicks is an ingenious combination in salve form, of the world's best remedies for congestion and inflammation. It contains Camphor, Menthol. Eucalyptus, Thyme, Oil of Turpentine and other volatile oils, which are released as vapors when the salve is acted upon by the heat of the body. These vapors are taken with each breath, into the nose, throat and lungs, clearing the passages, loosening phlegm and relieving the congestion.

At the same time, the application acts like a liniment, poultice or plaster, drawing the blood away from the congested parts and relieving that soreness and lightness.

#### Double Direct Action Brings Quick Results

This treatment often gives amazingly quick results. Colds vanish over night. Croup is relieved inside of 15 minutes. Or one application at bedtime may keep croup away altogether. For deep chest colds, bordering on bronchitis or pneumonia. it is unexcelled. Melted in a spoon and inhaled, Vicks clears the head instantly. Fine for nasal calarrh and mouth-breathing at night.

Vicks is especially favored in homes where there are young children. Its use does away with dosing for colds-saves their delicate stomachs. It is not necessary, as with vapor lamps, to close the windows at night.

Vicks is equally good for cuts, burns, sores. bruises, bites, stings and skin itchings. Thus it is useful every day in the home.
