Monday, July 28, 1924.

Difficulty Of Working When Weather Is Hot.

People here just now can quite understand why the people of tropical or semi-tropical countries are not as full of enthusiasm and energy as are those of the north. Often we complain of the cold but it is the coolness of these climates that makes for our progress, initiative and success. Canadians are in demand in the United States because they have been brought up to and other forest products are be active. They have not been trained to lethargy by example also forced to expend millions s and precept. A few hot days make a pleasant change but as a steady thing, heat is to be avoided.

Let MacLaren Know This A British Country.

It has been suggested that as this is the first British soil Stuart MacLaren, the aviator, will have reached since leaving Hong Kong, he and his companions should be made to know it in some very conspicuous manner.

It is to be assumed that he will land at Seal Cove and the ments twelvefold in ten years. it's cold we kick, and when it essentials were the only articles scheme as outlined is to have the Cove decorated with Canadian and British flags. Every available spot should be flag-bedecked. Even the float to which he is to tie might well have the Union up the sea ports of British Col-weather. Jack conspicuously flying, the buildings all around and the shore umbia. line and boats in the cove all would be decorated in the same way and pictures of these would be shown in such a way as to let the world know that this place is British and is out to do honor to the Britisher that has made such a splendid effort in his long and trying flight.

Details in the way of banners or streamers might be worked out that would be particularly attractive and striking and would add to the effectiveness of the scheme.

Doubtless the local regiment, the war veterans, the Daughters of the Empire and others would join in making this event a really big one. Preparations would have to be made in advance and it is possible the time may not be long before he is here. No one can say just when the British, flyer will arrive but it should be within two weeks and possibly less.

If the weather is like it is today it would be a unique occasion.

Further suggestions will be gladly received and passed on by this paper. Citizens are reminded that this is an event that will be recorded all over the world and anything we can do here, if of sufficient interest, will be telegraphed to the ends of the earth.

Rupert People Will Understand.

Prince Rupert people will quite understand the sentiment lar if they can see two in the was needed every fifteen minutes ments. expressed in the following editorial from "Overseas" published offing. by the Overseas League in Great Britain:

"The weather is not what is used to be," so say the grumblers among us, and they call to our minds the wonderful sum- ing taught a girl to flirt she mer of four years ago, when day of sunshine succeeded day of goes to another fellow for a post sunshine and from February to September we only had a dozen graduate course.

or so days of rain. "But humanity has a curious way of forgetting the unpleasant things of life and remembering only the pleasant, and likes is the one that goes withhence during the rest of the year, when we think of June, we out saying. call to mind memories of a month of roses, of blue skies and summer heat. As a matter of fact, despite our grumbles, if we are of a statistical frame of mind and cared to page through the that is, fairly good. past meteorological records we would probably find that a wet June was no uncommon event.

"The charm of our British climate is that you never know in Russia does not seem to prowhat quite to expect of it. Just when you have donned your tect the country against famines. summer clothing in all probability you have to put up with two or three weeks of damp or raw days. Certainly during the past four weeks we have had more than our fair share of thunder- just south of the line injured his storms and downpours of almost tropical intensity."

OGDEN'S LIVERPOOL

OF THE

PROGRESS OF PROVINCE DUE TO MAINTENANCE OF HUGE PURCHASING POWER.

Vast Developments By Land And Sea Due to the Initiative Of Lumbermen.

There are three great spending forces in the British Columbia forest industries with its purchasing power of \$100,000,000 per annum.

1. The Timberholder — the pioneer investor in the raw ma-

2. The Logger—the harvester of the timber crop.

3. The Manufacturer - the builder up of markets.

Upon the unimpeded function-\$1.00 ing of these branches depends the fair progress of British Col-\$6.00 umbia's vital industry. A set-\$7.50 back to one spells disaster to all

The timberholders of the province, faced with fire and storm risks against which there is no insurance, have contributed over \$45,000,000 to the provincial treasury during the last fifteen years. A worlds record in similar axation.

The loggers spend annually very large sums on new and costy equipment to keep pace with modern science and overcome the ever varying obstacles that nature puts in their paths. Eight hundred miles of private rail roads, now in actual operation, is one memorial of this energy.

The manufacturers of lumber, shingles, pulp and paper boxes every year on new machinery to maintain the efficiency of their petition and justify their prolumber manufacturers, by dint of ary of that sheet. strenuous market extension work have increased their export ship-

Head Of Telkwa Firm Resident of Victoria, Sued By Wife For Non-Support.

F. M. Rattenbury, head of Rattenbury Lands, Ltd., a firm that within the past few years operated extensively in selling wild lands to settlers, was sued by his wife in Victoria and ordered to pay \$300 a month until such time as a divorce suit against him-can be heard. He is wellknown in the northern interior where he purchased large tracts of wild lands from the Government during the McBride-Bowser regime, and later sold a large part of it to settlers. The case was heard in supreme court chambers, Robert Cassidy, K.C., acting on behalf of Mrs. Rattenbury and .H A. Maclean for the defendant. Reporting the case, the Victoria Times says:

Lived Apart Ten Years. Taking the stand in support of an affidavit alleging desertion and non-support, Mrs. Rattenbury stated that she had been married twenty-six years to the respondent. The past ten years they had lived apart, though sharing the same house. This was the residence at 1701 Beach drive. The past six months, witnes said, she had been deserted in the house except for the presence of her two children, a boy and a girl, both now grown-to;

adult age. For four years she had received no money from respondent, continued witness, but the house bills had always been paid. Within the past two months the bills were no longer paid, and she had no money with which to carry on. The water and electric light had been turned off at the house, and even two servants formerly employed, had been taken to the four-room dwelling now inhabited by respondent in
