#### URGES PREVENTION OF BLINDNESS BY APPLYING REMEDIES

TORONTO, June 7. - (Canadian Press) .- "One half of the blindness in Canada and in the world generally, is due to preventable causes," said Miss Hayhurst, Prevention- of- Blindness and Social Worker of the Canadian National Institute for the Blind, recently, in speaking of the facts and figures in a report she is preparing for delivery beifore a number of Canadian Medical societies and social workers in the immediate future. "Blintilness is almost always the result of abnormal, wrong conditions, ignorance, disease, dirt, illness, accident, shock, crime; therefore it is in the main, as preventable as other plagues such as smallpox, typhoid, venereal diseases or tuberculosis. It should be and often can be prevented. Think of the ravages of smallpox in older days, and of the neglible number of cases of this disease today. We hope the people of the next or [following generation will be able] to make the same comparison! when speaking of preventable blindness. That old fatalism. the age of prevention. Let us as a quarantine flag. then consider the facts regarding blindness and act upon them."
